The book is characterized by its enlightening prose, which interweaves historical context with visual analysis, making complex artistic movements digestible for novices and students alike. Waters' keen eye for detail and her organizational structure guide readers through the significant styles, techniques, and cultural implications of art from antiquity to the modern era, emphasizing not only the aesthetics but also the socio-political influences that shaped artistic expression. Clara Erskine Clement Waters was a prominent art historian and educator in the late 19th and early 20th centuries, whose academic pursuits were fueled by her passion for democratizing art education. Her extensive travels and studies in European art provided her with a rich understanding of the themes and trends that resonate throughout history, inspiring her to create a foundation for those seeking to delve into the art world. With a background in both art and literature, Waters' interdisciplinary

approach enriches her narrative making it a valuable resource for learners This book is highly recommended for anyone seeking an introductory guide to art history whether you are a student embarking on this journey or simply an art enthusiast eager to deepen your understanding With its clear illustrations and well researched content Waters text serves as an essential companion inviting readers to appreciate the profound narratives behind the works of art that have shaped our cultural landscape

ARCHITECTURE seems to me to be the most wonderful of all the arts We may not love it as much as others when we are young perhaps we cannot do so because it is so great and so grand but at any time of life one can see that in Architecture some of the most marvellous achievements of men are displayed The principal reason for saying this is that Architecture is not an imitative art like Painting and Sculpture The first picture that was ever painted was a portrait or an imitation of something that the painter had seen So in Sculpture the first statue or bas relief was an attempt to reproduce some being or object that the sculptor had seen or to make a work which combined portions of several things that he had observed but in Architecture this was not true No temples or tombs or palaces existed until they had first taken form in the mind and imagination of the builders and were created out of space and nothingness so to speak Thus Painting and Sculpture are imitative arts but Architecture is a constructive art and while one may love pictures or statues more than the work of the architect it seems to me that one must wonder most at the last We do not know how long the earth has existed and in studying the most ancient times of which we have any accurate knowledge we come upon facts which prove that men must have lived and died long before the dates of which we can speak exactly The earliest nations of whose Architecture we can give an account are called heathen nations and their art is called Ancient or Heathen Art and this comes down to the time when the Roman Emperor Constantine was converted to Christianity and changed the Roman Capitol from Rome to Constantinople in the year of our Lord 328 The buildings and the ruins which still remain from these ancient times are in Egypt Assyria Persia Judea Asia Minor Greece Etruria and Rome Many of these have been excavated or uncovered as during the ages that have passed since their erection they had been buried away from sight by the accumulation of earth about them These excavations are always going on in various countries and men are ever striving to learn more about the wonders of ancient days and we may hope that in the future as marvellous things may be revealed to us as have been shown in the past EGYPT As we consider the Architecture of Egypt the Great Pyramid first attracts attention on account of its antiquity and its importance This was built by Cheops who is also called Suphis about 3000 years before Christ At that distant day the Egyptians seem to have been a nation of pyramid builders for even now after all the years that have rolled between them and us we know of more than sixty of these mysterious monuments which have been opened and explored Of all these the three pyramids at Ghizeh are best known and that of Cheops is the most remarkable among them Those of you who have studied

the history of the wars of Napoleon I will remember that it was near this spot that he fought the so called Battle of the Pyramids and that in addressing his soldiers he reminded them that here the ages looked down upon them thus referring to the many years during which this great pyramid had stood on the border of the desert as if watching the flight of Time and calmly waiting to see what would happen on the final day of all earthly things There have been much speculation and many opinions as to the use for which these pyramids were made but the most general belief is that they were intended for the tombs of the powerful kings who reigned in Egypt and caused them to be built The pyramid of Cheops was four hundred and eighty feet and nine inches high and its base was seven hundred and sixty four feet square It is so difficult to understand CLARA ERSKINE CLEMENT AUTHOR OF HANDBOOK OF LEGENDARY AND MYTHOLOGICAL ART PAINTERS SCULPTORS ENGRAVERS ARCHITECTS AND THEIR WORKS ARTISTS OF THE NINETEENTH CENTURY

**A History of Art for Beginners and Students** Clara Clement, 2015-07-27 *A History of Art for Beginners and Students* Painting Sculpture Architecture With Numerous Illustrations By Clara Erskine Clement In speaking of art we often contrast the useful or mechanical arts with the Fine Arts by these terms we denote the difference between the arts which are used in making such things as are necessary and useful in civilized life and the arts by which ornamental and beautiful things are made The fine arts are Architecture Sculpture Painting Poetry and Music and though we could live if none of these existed yet life would be far from the pleasant experience that it is often made to be through the enjoyment of these arts In speaking of Painting just here I wish to include the more general idea of pictures of various sorts and it seems to me that while picture making belongs to the fine or beautiful arts it is now made a very useful art in many ways For example when a school book is illustrated how much more easily we understand the subject we are studying through the help we get from pictures of objects or places that we have not

seen and yet wish to know about Pictures of natural scenery bring all countries before our eyes in such a way that by looking at them while reading books of travel we may know a great deal more about lands we have never seen and may never be able to visit Who does not love pictures and what a pleasure it is to open a magazine or book filled with fine illustrations St Augustine who wrote in the fourth century after Christ said that pictures are the books of the simple or unlearned this is just as true now as then and we should regard pictures as one of the most agreeable means of education Thus one of the uses of pictures is that they give us a clear idea of what we have not seen a second use is that they excite our imaginations and often help us to forget disagreeable circumstances and unpleasant surroundings The cultivation of the imagination is very important because in this way we can add much to our individual happiness      *History of Modern Art: Painting, Sculpture, Architecture* H.
