I. OBJECTIVES:

Art Humanities: Masterpieces of Western Art is intended to teach you how to look at and evaluate art, so that you can more effectively think, talk, and write about it. During the semester we will look at some of the great monuments of western art and architecture, and study the visual language developed by the masters who created them. Along with this new way of seeing, we will learn a new vocabulary to be able to accurately and confidently put what we see into words. Therefore, **well-prepared class discussions** will be the heart of the Art Humanities experience. However, while the course will rely heavily on its website (see below), it is also focused on using the resources of New York City, one of the greatest cities in the world for art.

This course should help you:

- Be exposed to some of the great masters of Western art, fascinating characters who produced thought-provoking works.
 - relate to earlier peoples and ages through art.
 - Learn to facilitate discussion about abstract issues.
 - Look at new ways to engage with art through technology as well as discussion and writing.
-

I. Requirements

A. Attendance and classroom behavior: Students are expected to attend all scheduled class meetings, to be punctual, to be prepared and to contribute actively to class discussions. **Unavoidable absences, due to illness, religious observance, or emergency must be reported to the Instructor (preferably BEFORE the scheduled class in question)** and recurrent absences may need to be verified by a third party (i.e. Health Services physician).

Department of Art History and Archaeology,1996 **Masterpieces of Western Art** Robert Suckale,2002 This volume traces the history of painting from medieval times to modern times with a focus on each era and its major artists This volume traces the history of painting from medieval times to modern times with a focus on each era and its major artists Art Humanities Masterpieces of Western Art ,1997 Teaching Art History with New Technologies Kelly Donahue-Wallace,Laetitia La Follette,Andrea Pappas,2009-05-05 Digital images Internet resources presentation and social software interactive animation and other new technologies offer a host of new possibilities for art history instruction Teaching Art History with New Technologies Reflections and Case Studies assists faculty in negotiating the digital teaching terrain The text documents the history of computer mediated art history instruction in the last decade and provides an analysis of the increasing number of tools now at the disposal of art historians It presents a series of reflections and case studies by early adopters who have not just replaced older materials with new but who have advanced the discipline s pedagogy in doing so The essays illustrate how new technologies are changing the way art history is taught summarize lessons learned and identify challenges that remain Given the transitional state of the field with faculty ranging from the computer phobic to the computer savvy these case studies represent a broad spectrum from those that focus on the thoughtful integration of new technologies into traditional teaching to others that look beyond the familiar art history lecture or seminar format They provide both practical suggestions and theoretical models for historians of art and visual culture interested in what computer mediated applications have been successful in art history teaching and where such new approaches may be leading us Vermeer's Family Secrets Benjamin Binstock,2013-03-07 Johannes Vermeer one of the greatest Dutch painters and for some the single greatest painter of all produced a remarkably small corpus of work In Vermeer s Family Secrets Benjamin Binstock revolutionizes how we think about Vermeer s work and life Vermeer The Sphinx of Delft is famously a mystery in art despite the common claim that little is known of his biography there is actually an abundance of fascinating information about Vermeer s life that Binstock brings to bear on Vermeer s art for the first time he also offers new interpretations of several key documents pertaining to Vermeer that have been misunderstood Lavishly illustrated with more than 180 black and white images and more than sixty color plates the book also includes a remarkable color two page spread that presents the entirety of Vermeer s oeuvre arranged in chronological order in 1 20 scale demonstrating his gradual formal and conceptual development No book on Vermeer has ever done this kind of visual comparison of his complete output Like Poe s purloined letter Vermeer s secrets are sometimes out in the open where everyone can see them Benjamin Binstock shows us where to look Piecing together evidence the tools of art history and his own intuitive skills he gives us for the first time a history of Vermeer s work in light of Vermeer s life On almost every page of Vermeer s Family Secrets there is a perception or an adjustment that rethinks what we know about Vermeer his oeuvre

Dutch painting and Western Art Perhaps the most arresting revelation of Vermeer's Family Secrets is the final one in response to inconsistencies in technique materials and artistic level Binstock posits that several of the paintings accepted as canonical works by Vermeer are in fact not by Vermeer at all but by his eldest daughter Maria How he argues this is one of the book's many pleasures **Art of the Western World** Bruce Cole, Adelheid M. Rethinking Frank Lloyd Wright Neil Levine, Richard Longstreth, 2023-03-03 Among the general public Frank Lloyd Wright remains the best known American architect of the twentieth century And yet his larger than life profile in the popular realm contrasts sharply with his near invisibility in academic and professional circles In *Rethinking Frank Lloyd Wright* Neil Levine and Richard Longstreth have assembled a group of eminent scholars to address this most puzzling paradox of the great architect's career In a series of engaging and well illustrated essays the contributors draw on their wide ranging understanding of modern architecture to reveal the ways in which Wright continues to play an instrumental role in domestic and international spheres making the case for reevaluating his popular and professional reputations Prompted by the transfer of the architect's archive from its home at Taliesin West in Scottsdale Arizona to the Avery Library at Columbia University and the Museum of Modern Art this volume revisits Wright's relevance for a contemporary audience Contributors Barry Bergdoll Columbia University Daniel Bluestone Boston University Jean Louis Cohen New York University Cammie McAtee independent scholar Neil Levine Harvard University Dietrich Neumann Brown University Timothy M Rohan University of Massachusetts Amherst Richard Longstreth George Washington University Jack Quinan University at Buffalo Alice Thomine Berrada cole des Beaux Arts Rescuing Socrates Roosevelt Montás, 2023-03-21 A Dominican born academic tells the story of how the Great Books transformed his life and why they have the power to speak to people of all backgrounds What is the value of a liberal education Traditionally characterized by a rigorous engagement with the classics of Western thought and literature this approach to education is all but extinct in American universities replaced by flexible distribution requirements and ever narrower academic specialization Many academics attack the very idea of a Western canon as
