God's Image and Global Cultures Kenneth Nehrbass, 2016-08-26 Globalization has raised numerous questions about theology and culture for Christians How should we respond to outsourcing and immigration How does anti Western sentiment affect the proclamation of the gospel What is the role of the church in society This book argues that Christians will be most fulfilled and most effective if they embrace their cultural activity rather than feel ambivalent about it The central question of this book is how does bearing God's image relate to cultural activity Nehrbass explains that spheres of culture such as political technological and social structures are systems that God has instilled in humans as his image bearers so that they can glorify and enjoy him forever Therefore a theology of culture involves recognizing that the kingdom of God encompasses heaven and Earth rather than pitting heaven against Earth The text surveys anthropological explanations for humanity's dependence on culture and shows that each explanation provides only partial explanatory scope The most satisfying explanation is that a major functional aspect of bearing God's image is engaging in culture since the Trinity has been eternally engaged in cultural functions like ruling communicating and creating Each chapter contains a summary and questions about what it means to be a world changer in the twenty first century

Russell Turney, 2017-09-15 In this second volume of the new APTS Press Monograph Series Dr Russ Turney presents a compelling case study of why some missionaries leave the field far too soon Normal attrition occurs because of health problems retirement or the obvious call of God to go elsewhere However Turney notes that far too often missionaries leave due to interpersonal conflicts with their colleagues or nationals problems with authority and other issues that Turney contends could be significantly reduced He then presents an excellent strategy for dealing with these and other issues enabling missionaries to continue in their calling long term and finish well This strategy will help equip not only missionaries and mission leaders from both the West and the Majority World but also pastors and church members who love and support missionaries and who want to learn how to strengthen them better through prayer and action Anyone who shares the warm hearted conviction that missionaries can and should leave a legacy will benefit from this book From the Foreword *Circulations in the Global History of Art* Thomas DaCosta Kaufmann, Catherine Dossin, Béatrice Joyeux-Prunel, 2016-03-03 The project of global art history calls for balanced treatment of artifacts and a unified approach This volume emphasizes questions of transcultural encounters and exchanges as circulations It presents a strategy that highlights the processes and connections among cultures and also responds to the dynamics at work in the current globalized art world The editors introduction provides an account of the historical background to this approach to global art history stresses the inseparable bond of theory and practice and suggests a revaluation of materialist historicism as an underlying premise Individual contributions to the book provide an overview of

current reflection and research on issues of circulation in relation to global art history and the globalization of art past and present They offer a variety of methods and approaches to the treatment of different periods regions and objects surveying both questions of historiography and methodology and presenting individual case studies An Afterword by James Elkins gives a critique of the present project The book thus deliberately leaves discussion open inviting future responses to the large questions it poses

Aesthetic Hybridity in Mughal Painting, 1526-1658 Valerie Gonzalez, 2016-03-03 The first specialized critical aesthetic study to be published on the concept of hybridity in early Mughal painting this book investigates the workings of the diverse creative forces that led to the formation of a unique Mughal pictorial language Mughal pictoriality distinguishes itself from the Persianate models through the rationalization of the picture s conceptual structure and other visual modes of expression involving the aesthetic concept of mimesis If the stylistic and iconographic results of this transformational process have been well identified and evidenced their hermeneutic interpretation greatly suffers from the neglect of a methodologically updated investigation of the images conceptual underpinning Valerie Gonzalez addresses this lacuna by exploring the operations of cross fertilization at the level of imagistic conceptualization resulting from the multifaceted encounter between the local legacy of Indo Persianate book art the freshly imported Persian models to Mughal India after 1555 and the influx of European art at the Mughal court in the sixteenth and seventeenth centuries The author s close examination of the viscosity metaphysical order and aesthetic language of Mughal imagery and portraiture sheds new light on this particular aspect of its aesthetic hybridity which is usually approached monolithically as a historical phenomenon of cross cultural interaction That approach fails to consider specific parameters and features inherent to the

artistic practice such as the differences between doxis and praxis conceptualization and realization intentionality and what lies beyond it By studying the distinct phases and principles of hybridization between the variegated pictorial sources at work in the Mughal creative process at the successive levels of the project intention the practice realization and the result product the author deciphers the modalities of appropriation and manipulation of the heterogeneous elements Her unique
