The Art of the Stone Age Hans-Georg Bandi, 1970 Includes p 241 266 The rock art of Australia by Andreas Lommel separately catalogued **Art of the Stone Age** Hans-George Bandi, 1979-06-01 An exposition of ancient prehistoric art includes recent archaeological findings [The Art of the Stone Age](#) Breuil Bandi (Berger-Kirchner, Lhote, Holm and Lommel), 1961 **The Art of the Stone Age** HANS-GEORG. BANDI, 2018-03-06 Excerpt from *The Art of the Stone Age* Forty Thousand Years of Rock Art The birth of advanced hunter culture must be sought in the last phases of the Ice Age some years ago Its demise can be observed in our own day for there are still some peoples the Bushmen in South Africa for example who are the last surviving practitioners of this once wide spread mode of economic life With peoples in this stage of development their entire existence in all aspects economic social and spiritual is dominated by hunting Everything is focussed upon the quest for game All man's thoughts and emotions are centred Upon the constant conflict practical and spiritual with animals This leads to a conception of the relationship between man and beast as a very real unity of substance that is to say to a belief in the unity of the entire animal world and the interchangeability of human and animal forms of existence 1 These far reaching problems cannot be gone into in detail here but it may be pointed out that in many places advanced hunters had to their credit varied artistic achievements a genuine ritual art which gives us most interesting insights into the spiritual world in which these peoples lived We are concerned here with rock pictures although the art of the advanced hunters also comprises minor arts such as sculpture engraved or painted decoration on movable objects and much else besides But one should not jump to the conclusion that all the rock engravings and paintings scattered over the entire globe are the work of advanced hunters Rock pictures can also be produced by peoples in other stages of cultural development although in such cases one must frequently reckon with the possibility that in usences or traditions derived from hunters play a certain role Naturalistic works are found most particularly in the southern parts of the region inhabited by advanced hunters This fact will be illustrated in the various sections of the present volume These sections do not amount to an exhaustive survey Such a survey would have to comprise much more than the few glimpses given here of Franco Cantabrian and Eastern Spanish art in south western Europe of the rockpaintings in North Africa a region where pictures by hunters are interspersed with others by cattle raisers which are also treated here of the rock art of South Africa and finally that of Australia Some other centres of rock pictures principally in Africa and the Near East have had to be omitted Nor has it been possible to mention the rock art of the Arctic although it may be pointed out here that in Scandinavia in addition to engravings executed by agriculturists of the Bronze Age there is also a very impressive widely diffused group of works by Stone Age hunters and fishermen Other evidence of Arctic art is to be found in Karelia Western Siberia and Central Asia Finally no attention has been paid in these pages to rock art in the western hemisphere which also belongs in part to hunter culture Despite these limitations this volume will perhaps help to show that the ritual art works of the advanced hunters

some of which date back to the Ice Age and some to more recent periods are as impressive and beautiful as they are diversified and informative The fact that the various regions of rock art are dealt with independently by different authors and that each is alone responsible for the opinions expressed shows how varied the approach to these problems can be While some authors have kept rather to the traditional method of interpretation others have attempted to strike out along new paths But all endeavour to introduce the reader to a subject which owing to the magnificence of many of the works discussed can also give something to those who are not so familiar with the mysterious world in which the minds of these hunter peoples moved Early Art of the Northern Far East National Park Service,U.S. Department of the Interior,2011-03 **The**

Art of the stone age ,1961 *Gardner's Art Through the Ages: Art in the Stone Age* Helen Gardner,Fred S. Kleiner,2021 I take great pleasure in introducing the extensively revised and expanded 16th edition of Gardner s Art through the Ages The Western Perspective which like the 15th edition is a hybrid art history textbook the first and still the only introductory survey of the history of art of its kind When Helen Gardner published the first edition of Art through the Ages in 1926 she could not have imagined that nearly a century later instructors all over the world would still be using her textbook in their classrooms In this new edition in addition to revising the text of every chapter to incorporate the latest research and methodological developments and dividing the former chapter on European and American art from 1900 to 1945 into two chapters I have added several important features while retaining the basic format and scope of the previous edition Once again the hybrid Gardner boasts roughly 1 600 photographs plans and drawings nearly all in color and reproduced according to the highest standards of clarity and color fidelity Once again scales accompany the photograph of every painting statue or other artwork discussed another innovative feature of the Gardner text The scales provide students with a quick and effective way to visualize how big or small a given artwork is and its relative size compared with other objects in the same chapter and throughout the book Also retained in this edition are the Quick Review Captions brief synopses of the most significant aspects of each artwork or building illustrated Each chapter also again ends with the highly popular full page feature called The Big Picture which sets forth in bullet point format the most important characteristics of each period or artistic movement discussed in the chapter Feature boxes once again appear throughout the book and fall under nine broad categories one of which is new to the 16th edition Architectural Basics Materials and Techniques Religion and Mythology Art and Society Written Sources Artists on Art The Patron s Voice Problems and Solutions and new to the 16th edition A Second Opinion in which an individual work of art that is the subject of current debate or has recently been reinterpreted is discussed These essays underscore for students that the history of art and architecture is not a static discipline and that scholars are constantly questioning and rethinking traditional interpretations of paintings sculptures and buildings adapted from Preface pages xi xii **The Art of the Stone Age; Forty Thousand Years of Rock Art [by] Hans-Georg Bandi [and Others].** Hans-Georg Bandi,1970 **The Art of the Stone Age.
