Being the first volume of the proceedings of the 7th Conference on Sustainable Mobility CSuM 2024 held on September 4-6, 2024 at Plastira s Lake, Greece, it focuses on research and practical strategies for developing sustainable and resilient transportation systems and guidance for their green and digital transition. All in all, this book offers extensive information to academicians, researchers, practitioners and decision makers working on effective strategies to enhance resilience of transportation systems.

*The Combat Edge*, 1997      *Unsettled Topics Concerning Automated Driving Systems and the Transportation Ecosystem* Rahul Razdan, 2019-11-05. Over the last 100 years, the automobile has become integrated in a fundamental way into the broader economy. A broad and deep ecosystem has emerged, and critical components of this ecosystem include insurance, after-market services, automobile retail sales, automobile lending, energy suppliers (e.g. gas stations), medical services, advertising, lawyers, banking, public planners and law enforcement. These components, which together represent almost 2 trillion of the U.S. economy, are in equilibrium based on the current capabilities of automotive technology. However, the advent of autonomous vehicles (AVs) and technologies like electrification have the potential to significantly disrupt the automotive ecosystem. The critical cog governing the rate and pace of this shift is the management of the test and verification of AVs. In this SAE EDGE report, six senior industry leaders in the impacted ecosystems essay articles which describe sectors of the current automotive ecosystem and the manner in which AV technology can potentially reshape them, providing a mosaic of the massive infrastructure shifts which will be required to absorb AV technologies. NOTE: SAE EDGE Research Reports are intended to identify and illuminate key issues in emerging but still unsettled technologies of

interest to the mobility industry The goal of SAE EDGE Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues SAE EDGE Research Reports are not intended to resolve the issues they identify or close any topic to further scrutiny Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2019005>
