Art Of Oboe Reed Making:

The Art of Oboe Reed Making Melvin Berman, 1988 Melvin Berman's varied experience as a much sought after pedagogue as well as a performing oboist of international repute make him eminently qualified to write a book about oboe reed making Having recorded over 15 albums performed on the soundtracks of more than 200 films participated in literally hundreds of television and radio broadcasts played thousands of symphony orchestra opera and ballet performances as well as solo chamber music concerts too numerous to count he has had to make reeds for practically every conceivable performing eventuality It is not surprising that he was chosen to demonstrate the oboe and english horn on The Orchestra an album narrated by Peter Ustinov for MRP Digital Records In The Art of Oboe Reed Making Mr Berman has removed the mystery from reed making In simple and direct language amply illustrated with 32 diagrams he guides the reed maker step by step to the finished product an oboe reed which responds well in all registers and produces a beautiful warm and centred tone The Art of Oboe Reed Making is an invaluable manual and guide in the search for a good reed [The Art of Oboe Reed Making](#)

Melvin Berman, 1988 **The Art of Oboe Playing** Robert Sprenkle, David Ledet, 1999-10-16 The Art of Oboe Playing is actually two books in one one part by Robert Sprenkle on playing the oboe and another part by David Ledet on reed making Sprenkle was the renowned teacher of some of the finest oboists among them Robert Bloom of the Rochester Philharmonic Ledet has an exceptionally broad professional background including assistant band director teacher of oboe and theory and administrator

The Philadelphia Influence on the Art of Reed Making Reid Gerard Messich, 2012
ABSTRACT The oboe reed is both a blessing and a curse the bane and the delight of every oboist There is nothing greater than the satisfaction of creating an amazing reed that will do everything an oboist requires A great reed allows one to play for hours and not grow exhausted It helps produce easier articulation and response from the instrument as well as a better musical line to help the oboist sound more fluid in his phrasing A bad reed however will cause a lot of stress in the life of an oboist forcing him to spend countless hours behind a reed desk Due to the uniqueness of each reed and each oboist no two players will ever produce an identical tone on the oboe This is true even if two players use the same oboe with the exact same reed The whole purpose behind reed making is not to create another level of difficulty for the oboist but to uniquely bring out the best qualities of the oboe and the oboist's individuality Reed making while stressful in the early stages of learning eventually becomes a very personal endeavor for each oboist The more knowledge gained in the reed making process the greater the strive to perfect it In reality there is no such thing as a perfect reed An oboist's goal when making reeds is to strive for response correct pitch stability and a tone that is unwavering in beauty The tone should not be so strident and shrill that it lacks depth yet also not be so dark that the flexibility of the tone is hindered As the majority of reed making taught today is based on the American style of reed making few students get the opportunity to learn about reed making from the Philadelphia point of view Most do not even realize the school of reed making they learn from is derived from the

Philadelphia style There are many guides already published and available for oboists today but none refer to the oboe reed through the Philadelphia influence This paper is not meant to state the Philadelphia reed making process is the only correct way to make a reed It is intended to enlighten young and professional oboists and to tweak their interest in experimenting with their own reeds to create an even better product It is the goal of this project to present ideas of reed making to both amateur and professional oboists who have not had the opportunity to study within the aforementioned Philadelphia music schools It will allow them to take a look at their current reed making skills and apply new ideas One of the most beautiful aspects of reed making is that it is constantly changing It is my hope that the information provided in this document and supplied from other oboists influenced by the Philadelphia style will open new reed making ideas to many oboists This document will contain all information I have accumulated in the years of study in Philadelphia and present the knowledge of reed making through my eyes It will follow the process of reed making from raw materials through the finished reed and discuss each detail that goes into creating the Philadelphia reed Surveys on reed making from other graduates from the Philadelphia area are included in this study to serve as reinforcement to the ideals and principles that still hold true in the Philadelphia area today Reed making has always been one of my strongest passions as an oboist and it is my wish to share the knowledge I have obtained throughout my years of study

Bassoon Reed Making Christin Schillinger, 2015-12-14 Withheld by leading pedagogues in an effort to control competition the art of reed making in the early 20th century has been shrouded in secrecy producing a generation of performers without reed making fluency While tenets of past decades remain in modern pedagogy Christin Schillinger details the historical pedagogical trends of bassoon reed making to examine the impact different methods have had on the practice of reed making and performance today Schillinger traces the pedagogy of reed making from the earliest known publication addressing bassoon pedagogy in 1687 through the publication of Julius Weissenborn's *Praktische Fagott Schule* and concludes with an in depth look at contemporary methodologies developed by Louis Skinner Don Christlieb Norman Herzberg and Lewis Hugh Cooper Aimed at practitioners and pedagogues of the bassoon this book provides a deeper understanding of the history and technique surrounding reed making craft and instruction

The Oboe Geoffrey Vernon Burgess, Geoffrey Burgess (oboist.), Bruce Haynes, Instructor of Baroque Oboe Geoffrey Burgess, MR Geoffrey Burgess, Obo, 2004-01-01 The oboe including its earlier forms the shawm and the hautboy is an instrument with a long and rich history In this book two distinguished oboist musicologists trace that history from its beginnings to the present time discussing how and why the oboe evolved what music was written for it and which players were prominent Geoffrey Burgess and Bruce Haynes begin by describing the oboe's prehistory and subsequent development out of the shawm in the mid seventeenth century They then examine later stages of the instrument from the classical hautboy to the transition to a keyed oboe and eventually the Conservatoire system oboe The authors consider the instrument's place in Romantic and Modernist music and analyze traditional and avant garde developments after World War II Noting the oboe's appearance in paintings and other iconography as well as in distinctive musical contexts they examine what this reveals about the instrument's social function in different eras Throughout the book they discuss the great performers from the
