Art Of Remembering:

The Art of Memory Frances Amelia Yates, 1966 The subject of this book will be unfamiliar to most readers Few people know that the Greeks who invented many arts invented an art of memory which like their other arts was passed on to Rome whence it descended in the European tradition This art seeks to memorise through a technique of impressing places and images on memory It has usually been classed as mnemotechnics which in modern times seems a rather unimportant branch of human activity But in the ages before printing a trained memory was vitally important and the manipulation of images in memory must always to some extent involve the psyche as a whole Moreover an art which uses contemporary architecture for its memory places and contemporary imagery for its images will have its classical Gothic and Renaissance periods like the other arts Though the mnemotechnical side of the art is always present both in antiquity and thereafter and forms the factual basis for its investigation the exploration of it must include more than the history of its techniques Mnemosyne said the Greeks is the mother of the Muses the history of the training of this most fundamental and elusive of human powers will plunge us into deep waters

Art Of Memory F A Yates, 2013-10-08 First Published in 1999 This title is the third volume in the ten volume set titled the Selected Works of Frances Yates Greyscale illustrations and figures are included throughout alongside the related descriptive work where applicable The art in this volume seeks to memorise through a technique of impressing places and images on memory It has usually been classed as mnemotechnics which appears an unimportant branch of human activity However the author discusses in this title that the manipulation of images in memory must always to some extent involve the psyche

The Art of Remembering Lauren Pirritano, 2016 This project explores the topic of memory and its place in contemporary art The project will address the topic in three sections An essay a short audio project and an artists book The essay begins with touching on memory s earliest recordings in art and its history it will then go on to examine the idea of voluntary and involuntary memory from here it transitions to talking about indexicality and then leads into other forms which memory can be represented in art diary autobiography in film etc It continues by touching on the ability that memory reenactment artworks have in the reshaping of the way we see history memory as an archive and finally it discusses the various projects artists book and audio recordings I did to supplement the paper
