Schneider, 2006-11-06 It is well known that B la Bart k had an extraordinary ability to synthesize Western art music with the folk music of Eastern Europe What this rich and beautifully written study makes clear is that contrary to much prevailing thought about the great twentieth century Hungarian composer Bart k was also strongly influenced by the art music traditions of his native country Drawing from a wide array of material including contemporary reviews and little known Hungarian documents David Schneider presents a new approach to Bart k that acknowledges the composer s debt to a variety of Hungarian music traditions as well as to influential contemporaries such as Igor Stravinsky Putting representative works from each decade beginning with Bart k s graduation from the Music Academy in 1903 until his departure for the United States in 1940 under critical lens Schneider reads the composer s artistic output as both a continuation and a profound transformation of the very national tradition he repeatedly rejected in public By clarifying why Bart k felt compelled to obscure his ties to the past and by illuminating what that past actually was Schneider dispels myths about Bart k s relationship to nineteenth century traditions and at the same time provides a new perspective on the relationship between nationalism and modernism in early twentieth century music      *Beyond Art: A Third Culture* Peter Weibel, 2005-05-17 A new theory of culture presented with a new method achieved by comparing closely the art and science in 20th century Austria and Hungary Major achievements that have influenced the world like psychoanalysis abstract art quantum physics Gestalt psychology formal languages vision theories and the game theory etc originated from these countries and influence the world still today as a result of exile nurtured in the US A source book with numerous photographs images and diagrams it opens up a nearly infinite horizon of knowledge that helps one to understand what is going on in today s worlds of art and science
