Drama Research Methods: Provocations of Practice, 2018-11-26 At a time when universities demand immediate and quantifiable impacts of scholarship the voices of research participants become secondary to impact factors and the volume of research produced Moreover what counts as research within the academy constrains practices and methods that may more authentically articulate the phenomena being studied When external forces limit methodological practices research innovation slows and homogenizes This book aims to address the methodological interpretive ethical procedural challenges and tensions within theatre based research with a goal

of elevating our field's research practice and inquiry. Each chapter embraces various methodologies, positionalities, and examples of mediation by inviting two or more leading researchers to interrogate each other's work and in so doing highlighted current debates and practices in theatre-based research. Topics include ethics, method, audience, purpose, mediation, form, aesthetics, voice, data, generation, and research participants. Each chapter frames a critical dialogue between researchers that take multiple forms: dialogic, interlude, research conversation, dramatic narrative, duologue, poetic exchange, etc.

Bearing Witness Stephanie N. Arel, 2023-09-26. Museum memorialization has long been about politics, design, implications, and visitor experience, rarely focused upon the people mired in commemorating the dead. Profound challenges confront those who memorialize mass trauma at memorial museums. Listening to the voices of those called to do this work enables insight into the critical role they play in preserving and disseminating history's most painful narratives, expanding views of recovery from mass trauma, and revealing the value in the profession. As an Andrew W. Mellon Fellow at the National September 11 Memorial Museum, Dr. Stephanie Arel recognized costs: psychological, spiritual, and physical, aligned with responding to mass trauma and participating in communal recovery. The impact of bearing witness at memorial museums emerged in the lives of workers. To explore the phenomenon, she visited Auschwitz, interviewing those who remember the Holocaust's horrors while resisting its infiltration in their personal lives. The immensity of honoring the dead for others inspired additional sojourns in Bosnia, Herzegovina, Cambodia, Israel, South Africa, and the United States. She discovered dimensions of pride and care evident in those who honor memory, the capacity of workers to address reverberating political tensions while tending to visitor needs, the passion workers have for giving voice to the voiceless who died during traumatic events, while offering care and support to the survivors, and the reality that reassembling the fragments of mass trauma is not for the weary but instead emerges as a calling and a vocation. Bearing Witness places value on what workers do: opening space for workers' testimonies to be heard for the first time and creating a global community of and for these workers who have otherwise never been given a platform to speak about their experiences. The interviews reveal the entanglement of politics with commemoration, the sacredness of remembering, and the multidimensional aspects of care transforming the reader's understanding of humanity forever.

Reviewing Qualitative Research in the Social Sciences Audrey A. Trainor, Elizabeth Graue, 2013-03-05. Foundational characteristics of qualitative research include flexibility, variation in application, critique, and innovation, all of which derive from its subjective roots in interpretivism and constructivism. While the scholars who design qualitative research projects envision these qualities as strengths, such as a breadth of practices and the assumptions that undergird them, they may present challenges during the peer review process. As a result, those who review and consume qualitative research often have important and difficult questions to answer about the project's design, strategies, tools, and analysis, with few guidelines for gauging the merit of the work. The mission of this book is to provide a useful guide for researchers, reviewers, and consumers who are charged with judging the quality of qualitative studies. In order to embrace

the challenges and controversies that accompany this goal the editors have solicited experts representing multiple disciplines and methods of qualitative inquiry Their contributions represent the rich diversity in the field while simultaneously producing a pragmatic and useful guide While it is neither possible nor desirable to compartmentalize qualitative approaches and issues into neatly organized categories the construct of method has been chosen as a common organizing device The introductory chapter explains the need for such a book and underscores the foundational strengths of qualitative research flexibility variation critique and innovation The remaining chapters review the principal approaches to qualitative research with care taken not to standardize rigidly define or oversimplify any approach For ease of use all methodological chapters are organized around the following elements of inquiry which reviewers tend to examine definition sampling data collection data analysis representation and congruency
