Art Of Leadership:

The Arts of Leadership Keith Grint, 2000-04-13 Leadership is still much discussed, studied and sought after even though we now live in supposedly more democratic times with flatter organizations and empowered employees. But how can we best understand leadership? Are leaders born or made? Do they have particular traits or are we all potential leaders? Do the requirements for leadership change over time or are there timeless patterns? Do traditional approaches help us to pick and develop leaders or are there alternative ways that advance our understanding? In this book Keith Grint, who has been studying and teaching leadership for over a decade, investigates the notion of leadership in a series of historical case studies and rich essay portraits of some of the most famous and infamous leaders: e.g. Florence Nightingale, Richard Branson, Horatio Nelson, Martin Luther King, Henry Ford etc. The scenarios are drawn from right across the spectrum to include business, politics, society and the military. The first part of the book considers four sets of parallel cases where leadership appears to be a major explanation of success and failure. The second part takes the four critical issues arising from these parallel cases: identity, strategic vision, organizational tactics and persuasive communication and explores them in detail. One main reason we have such difficulty in explaining and enhancing leadership, Grint argues, is because we often adopt perspectives and models that obscure rather than illuminate the issues involved. The reliance upon traditional scientific analysis has not provided the anticipated advances in our understanding because leadership is more fruitfully considered as an art or more exactly an array of arts rather than as a science. Grint's rich and meticulously researched profiles combine to reveal these Arts of Leadership.

The Art of Leadership Michael Lopp, 2020-05-13 Many people think leadership is a higher calling that resides exclusively with a select few who practice and preach big complex leadership philosophies. But as this practical book reveals, what's most important for leadership is principled consistency. Time and again small things done well build trust and respect within a team. Using stories from his time at Netscape, Apple and Slack, Michael Lopp presents a series of small but compelling practices to help you build leadership skills. You'll learn how to create teams that are highly productive, highly respected and highly trusted. Lopp has been speaking and writing about this topic for over a decade and now maintains a Slack leadership channel with over 13,000 members. The essays in this book examine the practical skills Lopp learned from exceptional leaders as a manager at Netscape, a senior manager and director at Apple and an executive at Slack. You'll learn how to apply these lessons to your own experience.
