transformando o mundo os algoritmos não se escrevem sozinhos eles representam escolhas da sociedade Assim ao me voltar para a presença da internet no sistema da arte procuro identificar a atuação dos seus diferentes atores e instituições e seus compromissos O meio online abre muitas possibilidades tanto em termos de novos alcances questionamentos como de deslumbramentos controles e manipulações Vejo este livro também como um alerta em relação à necessidade de assumir os desafios do contexto digital que nos envolve com projetos decoloniais pluralistas e inclusivos Este livro resultado de um projeto de pesquisa sobre arte e internet no Brasil iniciado em 2015 a ele estão conectados sites e blogs que também integram e difundem os processos de trabalho e os resultados obtidos em meus estudos sobre o tema Não acredito que a pesquisa seja neutra nem desinteressada pelo contrário ela está sempre comprometida com as escolhas do pesquisador e com seu lugar de observação e de fala Assumo que meu lugar crítico do sistema da arte no panorama da cultura contemporânea feita de dentro dele e a favor da reflexão crítica do engajamento social da participação coletiva da formação de comunidades e dos processos democráticos de mudanças

Educação Brasileira visando ao estímulo da criatividade por meio do uso de imagens digitais em turmas do Ensino Médio. Para tanto foram concebidas práticas pedagógicas fundamentadas nas Estratégias criativas desenvolvidas por De La Torre 2005 almejando explorar o potencial educacional das imagens digitais. Isto porque estudos evidenciam que as deficiências nas habilidades digitais dos adolescentes desafiam a precepção de que são automaticamente proficientes em tecnologia sublinhando assim a imperatividade de uma abordagem crítica no âmbito da educação digital. Com intuito de sanar as duas estratégias didáticas para criação de imagens fazendo uso de imagens digitais foram minuciosamente analisadas ambas evidenciando um significativo potencial para fomentar o desenvolvimento da criatividade reflexiva e autonomia dos estudantes com destaque para aquela que incorpora as estratégias de De La Torre 2005 a qual possibilita um leque mais abrangente de possibilidades aos discentes. Além disso esta pesquisa investiga os benefícios e desafios intrínsecos à integração das tecnologias digitais na educação salientando a relevância da reflexiva para otimizar os benefícios e assegurar uma abordagem inclusiva e significativa para o desenvolvimento dos estudantes.
