From publisher's description **The Japanese Buddhist World Map** D. Max Moerman, 2021-12-31 From the fourteenth through the nineteenth centuries Japanese monks created hundreds of maps to construct and locate their place in a Buddhist world This expansively illustrated volume is the first to explore the largely unknown archive of Japanese Buddhist world maps and analyze their production reproduction and reception In examining these fascinating sources of visual and material culture author D Max Moerman argues for an alternative history of Japanese Buddhism one that compels us to recognize the role of the Buddhist geographic imaginary in a culture that encompassed multiple cartographic and cosmological world views The contents and contexts of Japanese Buddhist world maps reveal the ambivalent and shifting position of Japan in the Buddhist world its encounter and negotiation with foreign ideas and technologies and the possibilities for a global history of Buddhism and science Moerman's visual and intellectual history traces the multiple trajectories of Japanese Buddhist world maps beginning with the earliest extant Japanese map of the world a painting by a fourteenth century Japanese monk charting the cosmology and geography of India and Central Asia based on an account written by a seventh century Chinese pilgrim monk He goes on to discuss the cartographic inclusion and marginal position of Japan the culture of the copy and the power of replication in Japanese Buddhism and the transcultural processes of engagement and response to new visions of the world produced by Iberian Christians Chinese Buddhists and the Japanese maritime trade Later chapters explore the transformations in the media and messages of Buddhist cartography in the age of print culture and in intellectual debates during the eighteenth and nineteenth centuries over cosmology and epistemology and the polemics of Buddhist science The

Buddhist World Glen Valentine, 2018-01-16 Buddhism is a religion practiced by an estimated 495 million in the world as of the 2010s representing 9% to 10% of the world's total population China is the country with the largest population of Buddhists approximately 244 million or 18.2% of its total population They are mostly followers of Chinese schools of Mahayana making this the largest body of Buddhist traditions Mahayana also practiced in broader East Asia is followed by over half of world Buddhists The second largest body of Buddhist schools is Theravada mostly followed in Southeast Asia The third and smallest body of schools Vajrayana is followed mostly in Tibet the Himalayan region Mongolia and parts of Russia but has been disseminated throughout the world Buddhism was almost entirely unknown in western countries until the 19th century European diplomats and scholars who travelled and lived in Asia collected Buddhist texts to have them translated into English German and French Awareness of Buddhism arrived in the United States around the 1840s when the first Chinese immigrants settled in the western part of the country Still in general Buddhism remained poorly understood in the west until the 1960s when the first Buddhist teachers started arriving and quickly found thousands of followers However curious westerners without serious study tended to view Buddhism as more of a mystic movement rather than an encompassing spirituality involving meditation Buddhism gained more popularity across Western culture by the end of the 20th century when celebrities and other well known people like Steve Jobs Richard Gere or Phil Jackson openly talked about the positive influence Buddhism has had on their lives The author of this book has joined the debate and examines the issues bringing fresh insights on the subject In this book the author seeks to prove that the consciousness of the individual and individuality which at the empirical level involves the rise of private property family and the state finds its most sophisticated and rational expression in early Buddhism

Being Human in a Buddhist World Janet Gyatso, 2015-01-20 Critically exploring medical thought in a cultural milieu with no discernible influence from the European Enlightenment *Being Human in a Buddhist World* reveals an otherwise unnoticed intersection of early modern sensibilities and religious values in traditional Tibetan medicine It further studies the adaptation of Buddhist concepts and values to medical concerns and suggests important dimensions of Buddhism's role in the development of Asian and global civilization Through its unique focus and sophisticated reading of source materials *Being Human* adds a crucial chapter in the larger historiography of science and religion The book opens with the bold achievements in Tibetan medical illustration commentary and institution building during the period of the Fifth Dalai Lama and his regent Desi Sangye Gyatso then looks back to the work of earlier thinkers tracing a strategically astute dialectic

between scriptural and empirical authority on questions of history and the nature of human anatomy It follows key differences between medicine and Buddhism in attitudes toward gender and sex and the moral character of the physician who had to serve both the patient s and the practitioner s well being Being Human in a Buddhist World ultimately finds that Tibetan medical scholars absorbed ethical and epistemological categories from Buddhism yet shied away from ideal systems and absolutes instead embracing the imperfectability of the human condition Agricultural and Pastoral Societies in Ancient and Classical History Michael Adas,2001 Introduces readers to the cross cultural study of ancient and classical civilizations The book is divided into two sections the first examining the ongoing interaction between ancient agrarian and nomadic societies and the second focusing on regional patterns in the dissemination of ideas
