Field Guide to the Bees of Great Britain and Ireland Steven Falk, 2015-10 This field guide to Britain's bees makes this fascinating and important group of insects accessible to the general naturalist It covers over 270 species and is fully illustrated with stunning photographs and Richard Lewington's beautiful colour artwork Revision of the Plant Bug Genus *Tytthus* (Hemiptera, Heteroptera, Miridae, Phyllinae) Thomas J. Henry, 2012-09-10 A revision and the first phylogenetic analysis of the widely distributed plant bug genus *Tytthus* is presented All 24 species of this genus including five described as new prey exclusively on planthopper Delphacidae eggs making them of great importance on agricultural monocots Two species have been used successfully in biocontrol programs to suppress populations of sugarcane delphacid on sugarcane and brown planthopper on rice All species of *Tytthus* are relatively small but the tiny brachypterous males of one species ranging from 1.08–1.30 mm long rank it as possibly the world's smallest known plant bug Members of this genus are found in nearly all biogeographic regions including 18 restricted to the Nearctic and Neotropics and three from the eastern Oriental and Indo Pacific regions There are also two Holarctic and one circumtropical Afrotropical Neotropical and Oriental species A hypothesized relationship with several Nearctic plant bug genera suggests a New World origin for this group of important predatory bugs *Insect Conservation: Past, Present and Prospects* Tim R. New, 2012-03-14 The history of interest and practice in insect conservation is summarised and traced through contributions from many of the leaders in the discipline to provide the first broad global account of how insects have become incorporated into considerations of conservation The essays collectively cover the genesis and development of insect conservation emphasising its strong foundation within the northern temperate regions and the contrasts with much of the rest of the world Major present day scenarios are discussed together with possible developments and priorities in insect conservation for the future *Guide to Garden Wildlife (2nd edition)* Richard Lewington, 2019-09-05 The definitive go to wildlife guide for all 16 million British gardens Mike Dilger Even the smallest garden can be an important haven for wildlife and this authoritative guide enables everyone to explore this

wealth on their back doorstep It covers all the main animal groups including pond life likely to be found in a garden in Great Britain and Ireland Detailed descriptions and information on life history behaviour and occurrence are provided for more than 500 species as well as practical information on creating a pond for wildlife making nestboxes and feeding birds Richard Lewington acknowledged as one of the finest natural history artists in Europe has teamed up with his brother Ian one of our most respected bird artists to provide nearly 1 000 superbly detailed colour artworks to complement the text Presented in an accessible easy to use format this fully updated and expanded edition covers everything from blue tits to bumblebees and hedgehogs to hawkmoths

Field Guide to the Bees of Great Britain and Ireland Steven Falk, 2019-09-19 Bees are a fascinating and indispensable group of insects but many species are in decline and efforts to help determine distributions and changes in abundance have to date been compromised by a serious lack of identification resources This book is from author Steven Falk who is a professional naturalist and conservationist with over forty years experience of working with bees It is a comprehensive introduction to bee classification ecology field techniques and recording a full glossary and information on how to separate the sexes and distinguish bees from other insects Also included are introductions to families and genera describing key characters and life histories as well as detailed species descriptions covering field and microscopic characters similar species variants flight season habitat flowers visited nesting habits status distribution and parasites associates A series of innovative illustrated keys to genera and species are designed to guide the user step by step through the identification process The book is illustrated with over 1 000 colour and black and white artworks by Richard Lewington one of Europe's leading insect artists It also includes stunning photographs of living insects as seen in the wild and 234 up to date distribution maps This eagerly anticipated new addition to the highly acclaimed British Wildlife Field Guides series will unravel the complexities of identification and is designed to cater for people new to the bee world as well as to more experienced recorders who wish to identify every species accurately It provides the latest information on the identification ecology status and distribution of all 275 species of bee in Britain Ireland and the Channel Islands
