Building High Tech Clusters Silicon Valley And Beyond:

Building High-Tech Clusters Timothy Bresnahan, Alfonso Gambardella, 2004-04-05 This book was first published in 2004 National economic growth is fueled by the development of high technology clusters such as Silicon Valley The contributors examine the founding of ten clusters that have been successful at an early stage of growth in information technology Their key finding is that the economics of starting a cluster is very different from the positive feedback loop that sustains an established cluster While nothing succeeds like success in an established cluster far more difficult risky and unlikely are the initial conditions that give rise to successful clusters The contributors find regularities in the start of the successful clusters studied including Silicon Valley around 1964 These cases contain old economy factors such as competencies firm building capabilities managerial skills and connection to markets more than the flamboyant new economy factors that have been highlighted in prevailing years *Building High-tech Clusters* Timothy F. Bresnahan, Alfonso Gambardella, 2004

Pathways to High-Tech Valleys and Research Triangles Willem Hulsink, J. J. M. Dons, 2008-05-23 About the book The contents of most of the chapters included in this volume were originally presented and discussed during the academic workshop High tech Valleys and Research Triangles in the East of the Netherlands and elsewhere held on 30 November and 1 December 2005 at the Wageningen International Congress Centre WICC in the Netherlands At that time we had an informal agreement with Rob Bogers series editor of the Wageningen UR Frontis book series that if the quality and quantity of the talks and papers at the seminar would be sufficient and if there was willingness among the potential authors an edited book volume based upon the results of the workshop would be a possibility After the workshop when we had a critical mass of ten chapters and a dedicated group of committed authors the book project was given the green light As editors we realized that there were still a couple of topics and themes missing and when we had found colleagues for these four additional chapters that needed to be written our Frontis book was on the roll Although most of the time it was great fun the whole process of writing reviewing rewriting editing and proofreading took a lot of time much more time than we originally had foreseen We would like to thank all authors of the fourteen chapters of this book for their excellent contributions *Global Clusters of Innovation* Jerome S. Engel, 2014-09-26 In the geography of the global economy there are known hot spots where new technologies germinate at an astounding rate and pools of capital expertise and talent foster the development of new industries and new ways of doing business These clusters Competition, Competitive Advantage, and Clusters Robert Huggins, Hiro Izushi, 2012-09-20 Harvard professor Michael Porter has been one of the most influential figures in strategic management research over the last three decades He infused a rigorous theoretical framework of industrial organization economics with the then still embryonic field of strategic management and elevated it to its current status as an academic discipline Porter's outstanding career is also characterized by its cross disciplinary nature Following his most important work on strategic management he then made a leap to the policy side and dealt with a completely different set of analytical units

More recently he has made a foray into inner city development environmental regulations and health care services Throughout these explorations Porter has maintained his integrative approach seeking a road that links management case studies and the general model building of mainstream economics With expert contributors from a range of disciplines including strategic management economic development economic geography and planning this book assesses the contribution Michael Porter has made to these respective disciplines It clarifies the sources of tension and controversy relating to all the major strands of Porter's work and provides academics students and practitioners with a critical guide for the application of Porter's models The book highlights that while many of the criticisms of Porter's ideas are valid they are almost an inevitable outcome for a scholar who has sought to build bridges across wide disciplinary valleys His work has provided others with a set of frameworks to explore in more depth the nature of competition competitive advantage and clusters from a range of vantage points

Innovation and Finance Andreas Pyka, Hans-Peter Burghof, 2013-07-18 Innovation and finance are in a symbiotic and twin track relationship a well functioning financial system spurs innovation by identifying and funding stimulating entrepreneurial activities which trigger economic growth Innovations also open up profitable opportunities for the financial system These mutual dynamics cause and need innovative adaptations in the financial system in order to better deal with the changing requirements of a knowledge based economy The volume comprises different contributions which focus on the central imperative of this evident connection between financial markets and innovation which despite its importance is only barely considered in academia as well in practice so far The book is about the mutual interdependence of innovation processes and finance This interdependent relationship is characterized by a high degree of complexity which stems on the one hand from the truly uncertain character of innovation and on the other hand from the different time scales in both domains Whereas innovation processes are long term and experimental financial markets are interested in shortening time horizons in order to optimize financial investments Economies which do not manage to align the two realms of their economic system are in danger of ending up in either financial bubbles or economic stagnation The chapters of this book deal with different aspects of this complex interrelationship between innovation and finance highlighting for example the role of stock markets venture capital and international financial transactions as well as the historical co development of the financial and industrial domains Thus far the communities in economics dealing with both issues are almost completely disconnected The book brings together economic research dealing with the interface between innovation and finance and highlights the importance of the Neo Schumpeterian perspective This topic is of particular interest in the current economic crisis affecting the Eurozone and its currency Most of the policy instruments discussed and implemented so far are focused on short run targets This discussion of the relationship between innovation and finance suggests a long run perspective to create new potentials for economic growth and a sustainable way out of the economic crisis

Upgrading Clusters and Small Enterprises in Developing Countries Jose Antonio Puppim de

Oliveira,2016-02-24 SME s are acknowledged as effective sources of jobs and incomes gaining an important position in the development agenda subsequently cluster policies were conceived as a framework to augment the effects of SMEs and to optimize resources used to support them Based on case studies from Brazil Vietnam Indonesia and India this volume examines SME clusters and argues that unless they counteract common problems such as very low wages poor working conditions poor quality products and lack of environmental regulation they will be pushed out of the market and so become unsustainable This book suggests that the SME clusters currently being stretched should react by socially upgrading in order to improve their innovation capacity as well as social environmental and labour standards It puts forward conceptual frameworks which explain the way firms can upgrade through markets interaction among cluster members through Corporate Social Responsibility and other such public policy and through the better enforcement of regulation

Technological Communities and Networks Dimitris Assimakopoulos,2007-05-17 The first book to analyze how new technologies are emerging against a background of continuing globalization of research and development activities This unique book explores how technological communities and networks shape a broad range of new computer based technologies in regional national and international contexts Offering a critique of exist **The Capacity to Innovate** Sarah Giest,2021 In *The Capacity to Innovate* Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations The book offers a detailed view of the vertical multi level and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported Using the biotechnology field as an example Giest highlights challenges in the collaborative efforts of public bodies private companies and research institutes to establish a successful eco system of innovation in this sector The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance Currently governments operate at different levels local to supranational in order to support clusters and cluster policies are often pursued in parallel to other programs As the book shows this can lead to uncoordinated efforts and ineffective cluster strategies Relational dynamics are often overlooked when working backwards from performance indicators since their effects are largely indirect but Giest demonstrates that both the cluster organization and the cluster eco system play a role *The Capacity to Innovate* advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context *Biotechnology: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2019-06-07 Biotechnology can be defined as the manipulation of biological process systems and organisms in the production of various products With applications in a number of fields such as biomedical chemical mechanical and civil engineering research on the development of biologically inspired materials is essential to further advancement *Biotechnology Concepts Methodologies Tools and Applications* is a vital reference source for the latest research findings on the application of biotechnology in medicine

engineering agriculture food production and other areas It also examines the economic impacts of biotechnology use Highlighting a range of topics such as pharmacogenomics biomedical engineering and bioinformatics this multi volume book is ideally designed for engineers pharmacists medical professionals practitioners academicians and researchers interested in the applications of biotechnology

Greedy Science Michael D. Gordin, W. Patrick McCray, 2025-02-18 The authors in this edited collection of essays explore this particular attribute greed by looking how it informed intersected and interlaced with science and technology and scientists and technologists during the 1980s During this decade greed although undeniably present in earlier eras became an extensive expansive and at times explicit characteristic of science both in the United States and around the world 3 The global scientific community was reshaped in a multitude of ways large and small by money fame and the pursuit of celebrity

The Economic Geography of Innovation Karen R. Polenske, 2007-04-12 This critical addition to the growing literature on innovation contains extensive analyses of the institutional and spatial aspects of innovation Written by leading scholars in the fields of economic geography innovation studies planning and technology policy the fourteen chapters cover conceptual and measurement issues in innovation and relevant technology policies The contributors examine how different institutional factors facilitate or hamper the flows of information and knowledge within and across firms regions and nations In particular they provide insights into the roles of important institutions such as gender and culture which are often neglected in the innovation literature and demonstrate the key role which geography plays in the innovation process Institutions and policy measures which support entrepreneurship and cluster development are also discussed The result is a comparative picture of the institutional factors underlying innovation systems across the globe

Comparative Approaches to Biotechnology Development and Use in Developed and Emerging Nations Bas, Tomas Gabriel, Zhao, Jingyuan, 2016-10-19 The development of biotechnological innovations is quickly becoming a globalized phenomenon as emerging nations are making major strides to compete with more developed economies Though efforts to bridge the gap between emerging and developed nations have been successful there are still many barriers that need to be overcome Comparative Approaches to Biotechnology Development and Use in Developed and Emerging Nations evaluates the importance of manufacturing biotechnological products around the world Highlighting a comparative analysis of public policies technological policies innovations and marketing capabilities of developed and emerging nations this publication is a pivotal reference source for government officers policy makers academics and practitioners
