**Building in a New Spain** Pauline A. Saliga, Kenneth Frampton, Martha Thorne, 1992 *Architecture for Spain's Recovered Democracy* Manuel López Segura, 2023-03-30

Historical studies on the involvement of architecture in twentieth century politics have overlooked its contribution to building Spain's democracy This pioneering book seeks to fill that void Between the late 1970s and early 1990s Spain founded representative institutions launched its welfare state and devolved autonomy to its regions The study brings forth the architectural incarnation of that threefold program as it deployed in the Valencian Country a Catalan speaking region on Spain's Mediterranean shores There social democratic authorities mobilized architects planners and graphic artists to devise a newly open public sphere and to recover a local identity that Franco's dictatorship had repressed for decades The research follows the impetus of reform and its contradictions through urban projects designs for cultural amenities and the renovation of governmental and professional bodies Architecture for Spain's Recovered Democracy contributes to current debates on nationalism and the arts the environments of democratic socialism and postmodernism and neoliberalism As a result it widens our understanding of how peripheral regions may yield egalitarian architectures of resistance This book is written for students and researchers in architecture and planning art history spatial politics and Hispanic studies as well as for a general readership interested in inclusive politics in the built environment

The Moderns Paul Julian Smith, 2000 This book offers a radically new account of the rich and varied culture of contemporary Spain It focuses on three intellectuals who chronicle contemporary life including journalist Francisco Umbral three filmmakers who engage with the many nationalisms of the Spanish state Victor Erice Bigas Luna and Julio Medem and three crucial topics that are expressed in many media the replaying of history the rise and fall of the city and the practice of everyday life Ranging from the ethnographic photography of Cristina Garcia Roderio to the high tech architecture of Santiago Calatrava and from the hyperrealist painting of Antonio Lopez to the neo flamenco dance of Joaquin Cortes this book is also the first to draw on theorists of the intellectual field the production of space and the arts of bricolage Pierre Bourdieu Henri Lefebvre and Michel de Certeau Refuting the charge that contemporary Spanish culture is trivial or superficial this book argues that it is fully engaged in the aesthetic and historical project of modernity
