The Pyramid Complex of Senwosret I Dieter Arnold,1992 As a result of The Metropolitan Museum of Art s renewed excavations in Lisht the Egyptian Department published *The Pyramid of Senwosret I* by Dieter Arnold in 1988 followed in 1990 by *The Control Notes and Team Marks* by Felix Arnold The first volume examined the main pyramid and its related mortuary installations while this third volume *The Pyramid Complex of Senwosret I* by Dieter Arnold discusses the monuments and objects found within the outer enclosure wall of the royal pyramid mainly the nine subsidiary pyramids and other tombs belonging to members of the royal family and their households Although the pyramids and their surrounding installations are much destroyed and the burials pillaged it has been possible to reconstruct to some degree the architecture from these ruins Such a reconstruction is particularly important as no other pyramid enclosures of the Middle Kingdom and very few of the Old Kingdom have ever been so thoroughly excavated and published The results of this enterprise provide an important contribution to our understanding of the structure and development of the royal funerary complexes of the Middle Kingdom As with the other volumes on the Museum s excavations this publications provides complete information and

archaeological context for a number of important objects from Lisht that were given to the Museum as a result of the division of finds and are now displayed in the Egyptian Galleries of the Metropolitan Museum Also significant is the discovery of timbers from one or more ancient ships described in the appendix When these vessels were no longer thought to be seaworthy they were disassembled and their timbers embedded in roads used during the construction of the pyramid complex

ruled over Imperial Egypt during its Golden Age **Statuary from Royal Buildings at Amarna** Marsha Hill, Kristin Thompson, 2024-04-15 Over more than a century and a quarter of excavations the royal and administrative buildings in the city of Amarna have yielded the remains of many hundreds of statues that had been part of Akhenaten's visionary plan. But fragmentation and dispersal have up until now made the results almost invisible. Only a relatively small number of the original statues have been widely known even to experts. The present publication brings together all these traces of the city's past to reveal the abundance, beauty, variety and novelty of the statuary and to begin the process of reintegrating it in considerations of the temples and palaces of the city. The work is presented in two parts. The first volume presents extensive observations about the creation of the statuary comprising chapters dealing with the range of materials and the methods of working them; a detailed explication of the novel creation of composite statuary; and an overview of the workshop buildings that have been identified so far at Amarna. In the second volume the excavated fragments themselves, most of them previously unpublished, are catalogued in a series of chapters devoted to individual royal buildings. The original statues are envisioned and analysed for their contexts, resulting in new information about these buildings, the intentions and concerns behind them, and the evolution in those intentions.
