Wooden Warship Construction Brian Lavery,2017-04-30 A wonderful book detailing the construction of the Royal Navy s sailing warships from the maritime historian and author of Nelson s Navy Pirates and Privateers The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve This book takes a selection of the best models to both describe and demonstrate the development of warship construction in all its complexity from the beginning of the 18th century to the end of wooden shipbuilding For this purpose it reproduces a large number of model photos all in full color and including many close up and detail views

These are captioned in depth but many are also annotated to focus attention on interesting or unusual features which can be shown far more clearly than described Although pictorial in emphasis the book weaves the pictures into an authoritative text producing an unusual and attractive form of technical history This book includes plentiful visual representations of actual ships in model form and the accompanying graphics make for wonderful reading I cannot express enough how enjoyable this book is to read Spotter Up A high quality book which is recommended to all ship historians and modellers Military Modelling
