Constructing Professional Discourse Concepción Orna-Montesinos,2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursive and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced

Resources in Education ,2001-04 The FIDIC Red Book Contract Christopher Seppälä,2023-04-25 Conditions of

Contract for Construction known universally as the Red Book published by the International Federation of Consulting Engineers known by its French acronym FIDIC is the most widely used standard form of international construction contract. This book is a detailed commentary on the 2022 reprint of the 2017 FIDIC Red Book. For each of the Red Book's 168 Sub Clauses, the commentary identifies changes from the 1999 edition, analyses the meaning and significance of the Sub Clause, and lists related Sub Clauses, describes related international arbitration awards, national court decisions, and legal principles, and where appropriate, proposes amendments to improve the Sub Clause. As the FIDIC Yellow and Silver Books are very similar to the Red Book, much of the commentary is equally applicable to those forms of contract. The author is a FIDIC insider, having served for more than thirty years as Legal Special Adviser to or Member of the FIDIC Contracts Committee, which is responsible for preparing FIDIC's contracts. This book is an indispensable resource for all parties called on to work with a FIDIC contract. With guidance for every stage of a construction project, whether in drafting, negotiating, performing, interpreting, or administering a FIDIC contract, the book's easy-to-use structure includes such issues and topics as the following: introduction to FIDIC and its contracts; and to publications of FIDIC and others relevant to the Red Book, including the 2022 FIDIC Contracts Guide; critical examination of each Sub Clause and advice for amending the same in order to better adapt it to the interests of each party, the Employer or the Contractor; special attention to each Sub Clause relating to the Contractor's and the Employer's claims and claims procedure; and to how to assert claims effectively, as well as to time bars and other pitfalls; and how they may be overcome; detailed examination of Sub Clauses relating to the referral of issues or disputes to the Dispute Avoidance/Adjudication Board, and if necessary, to international arbitration; and optimal strategies for doing so; discussion of the changes required to the 2017 Red Book by The World Bank's Conditions of Particular Application (COPA) reference, where appropriate, to the UNIDROIT Principles of International Commercial Contracts and trade usages; comprehensive discussion of practical issues that arise under common law, civil law, and international legal principles, especially when a contract is with a state or public body; comparison of common law and civil law methods of contract interpretation; and a suggested practical approach to interpretation given a FIDIC contract's international arbitration clause, and overcoming problems that can arise when a contract is governed by the law of a less developed country. Legal and technical terms are clearly defined, and numerous figures and tables are included to illustrate steps in contract procedures. Detailed attention is paid to terminological distinctions among the various legal traditions, including a comparison of British English and American English construction contract terms. Unquestionably, the most detailed and thorough commentary ever published on the FIDIC Red Book, this highly practical work enables preparers of FIDIC contracts to amend and adapt the Red Book's provisions to a particular project. Dispute adjudicators, arbitrators, and judges will welcome the book's authoritative guidance on interpreting the provisions of a FIDIC contract, and engineers and other construction professionals involved in contract administration will appreciate the book's many practical features.
