management and marketing. However, the focus has been on material forms of culture such as arts, music, or crafts. The impacts of national culture on tourist behavior and travel decision making have not been paid much attention. Only in the last two years have cross-cultural issues begun to generate significant interest among academics. An examination of cultural characteristics and differences is extremely important to the tourism industry because today's tourism environment is becoming increasingly international. Information on the nature of the cultural differences between international tourists and locals is not readily available in tourism literature. The concept of culture is very complex and includes such abstract concepts as satisfaction, attitude, and loyalty. International Tourism brings these concepts to the undergraduate student in tourism as well as students in the related fields of marketing, management, international business, and cross-cultural communication. Designed as a textbook, it is organized and presented in an integrated and relevant way for the benefit of a worldwide audience.

The Mind in Therapy Katherine D. Arbuthnott, Dennis W. Arbuthnott, Valerie A. Thompson, 2014-02-04. Human mental capacities and processes are the raw materials with which psychotherapists work. Thus, what cognitive scientists have discovered in recent decades is potentially tremendous value for psychotherapeutic practice. But the new knowledge is not readily accessible to therapists who find both language and methodology off-putting. *The Mind in Therapy* bridges the gap. It offers a comprehensive overview of the relevant range of cognitive activities ranging from complex mental operations such as problem solving, decision making, reasoning, and metacognition to basic functions such as attention, memory, and emotion. The authors integrate key new findings about the interaction between cognition and emotion, inhibition, and counterfactual thinking processes that loom large in practice. Each chapter reviews an area of cognitive research, clearly explains the findings, and highlights their implications and applications in diverse models of therapy: cognitive-behavioral, psychodynamic, humanistic, and family. Each includes case vignettes that illustrate the ways in which the concepts are important and useful in practice. All therapists rely on the human mind to effect the change they seek. The clearer understanding of human cognitive capacities, idiosyncrasies, and limitations, their own as well as clients', that they will gain from this book will enhance the effectiveness of both beginning and experienced practitioners, whatever their orientation.

The Challenge of Preaching John Stott, 2011-04-27 This book strongly challenges the notion that there is no place for preaching in the contemporary world It sets out the theological case for preaching and then goes on to describe what constitutes good preaching It does not focus on techniques to be used but on the nature of the task and the character of the one who preaches The good preacher works to build a bridge between the listeners and the truth being proclaimed To be able to do this the preacher must study both the Scriptures and the today s world The book offers some suggestions on how to go about preparing a sermon and calls for preaching delivered with sincerity earnestness courage and humility John Stott s thoughtful and practical advice given at some length in *I Believe in Preaching* has here been abridged by eliminating quotations and examples that spoke more directly to readers in the UK and the US in the 1980s Greg Scharf has retained the core of the original book but made it more accessible to contemporary readers

Teaching Adolescents Religious Literacy in a Post-9/11 World Robert Nash, Penny A. Bishop, 2009-11-01 For thousands of years religion has been a key element of human societies Whenever we as educators exclude or minimize religion s vast role in society we leave out a large part of our world s shared history This is a serious act of educational omission even neglect on the part of our nation s public middle and secondary schools particularly when adolescents are so ready to engage in meaningful conversation about the world that surrounds them Our book s central purpose is to provide middle level and high school teachers with the necessary background knowledge and pedagogical skills necessary to help adolescents become religiously literate learners and citizens Currently there is no text like ours on the market that both covers a number of world religions and presents concrete recommendations for teaching and learning this material Our book is meant to educate the following audiences teacher educators middle level and high school teachers in all content areas administrators school boards and parents For us educating for religious literacy is all about bringing adolescents into the 21st century of teeming religious and spiritual diversity a long neglected component of the multicultural curriculum in public schools In a post 9 11 world religious literacy requires that students understand the whats and whys of differing religious beliefs both in their own country and elsewhere It means looking for commonalities as well as differences between and among the great wisdom traditions both nationally and internationally It is about understanding how all of us might live peacefully in a religiously diverse world Our book accomplishes these goals by being informative practical experiential case based and above all accessible to beginners
