Building Europe's Parliament Democratic Representation Beyond The Nation State:

Building Europe's Parliament Berthold Rittberger, 2005-03-24 Why have the national governments of EU member states successively endowed the European Parliament with supervisory budgetary and legislative powers over the past fifty years Building Europe's Parliament sheds new light on this pivotal issue and provides a major contribution to the study of the European Parliament Rittberger develops a theory of delegation to representative institutions in international politics which combines elements of democratic theory and different strands of institutionalist theory To test the plausibility of his theory Rittberger draws on extensive archival material and offers theory guided in depth case studies of three landmark decisions in the history of the European Parliament the creation of the Common Assembly of the ECSC in 1951 and the concomitant acquisition of supervisory powers vis vis the quasi executive High Authority the delegation of budgetary powers following the signing of the Treaty of Luxembourg in 1970 and the delegation of legislative powers resulting from the adoption of the Single European Act signed in 1986 This is followed by the charting of more recent key developments culminating in the adoption of the Constitutional Treaty in 2004 The book provides a welcome addition to the literature on institutional design by reflecting on the conditions under which governments opt for the creation and empowerment of parliamentary institutions in international politics It also makes a valuable contribution to the application of democratic theory to the study of the European Union by demonstrating that political elites shared the view that the new supranational polity which emerged from the debris of World War II suffered from democratic deficit since its inception thus disproving the claim that the lamented democratic deficit is a recent phenomenon Winner of the European Union Studies Association Prize for Best Dissertation 2002 2004 **The Oxford Handbook of the European Union** Erik Jones, Anand Menon, Stephen Weatherill, 2012-08-30 The Oxford Handbook of the European Union brings together numerous acknowledged specialists in their field to provide a comprehensive and clear assessment of the nature evolution workings and impact of European integration **Dynamics of Change in the European Union** Daniel Naurin, Anne Rasmussen, 2013-09-13 Agreements concerning inter institutional rules in the treaties of the European Union often give rise to reactions and processes of adaptation within the EU institutions Recent literature on EU legislative politics has increasingly examined decision making within the EU institutions but has largely overlooked how these internal processes react and adapt to changes in relations between the EU bodies To fill this gap the authors present a series of empirical studies that examine how shifts in inter institutional rules and procedures affect intra institutional politics They show that the resulting intrainstitutional adaptations may in turn both have distributive consequences and affect the efficiency of the initial inter institutional reforms In addition they provide some stepping stones for theory building on how treaty reforms affect organizational structure and decision making within the EU institutions by outlining a series of mediating variables that link these two types of change processes This book was originally published as a special issue of West European Politics Inventing the EU as a Democratic Polity Claudia Wiesner, 2018-08-02 The EU as a

democratic polity has been invented it is a product of creative and innovative actors and thinkers that conceptualized and by and by helped to realise it from the beginning up to the present But the concepts ideas and utopias of a democratic Europe differ considerably The processes of inventing and building a democratic EU are marked by conceptual controversies in both public and academic debates These are the resource for the present book which focuses on the concepts actors and controversies related to inventing the EU as a democratic polity The chapters study exemplary long term and detail cases related to inventing and institutionalizing the decisive elements of representative democracy in the EU a parliament citizens that vote for it in universal suffrage and governmental bodies that are linked to parliament in much the same way as government is in a parliamentary democracy *The Institutions of the European Union* Dermot Hodson, John Peterson, 2017 This book is the key text for anyone wishing to understand the functions powers and composition of the EU's institutions From the Council of Ministers to the European Central Bank all of the most important organizations are analysed and explained by international experts providing students with everything they need to know *The European Parliament's Committees* Richard Whitaker, 2011-04-05 This book analyzes the development of the European Parliament's EP committees and their relationship with national political parties in the light of the EP's increased legislative role over the last three decades The book argues that national parties have a greater incentive to care about what goes on in the EP given the growth in its legislative power Because most of the EP's detailed legislative work takes place in its committees national parties should be concerned about their involvement with the EP's committee system Based on extensive original research this book shows how the EP's committees have changed over time in response to legislative empowerment and analyzes how national parties and individual MEPs use the committee system to further their policy goals The book makes a theoretical contribution by providing an explanation for the variation in powers of committees between separated and fused systems of government and by adapting theories of legislative organization developed in the context of the US Congress to the EP The European Parliament's Committees will be of interest to students and scholars studying the European Parliament EU institutions policy making and the development of legislatures and political parties **European Union Politics** Michelle Cini, Nieves Pérez-Solórzano Borragán, 2019 Subject This sixth edition of *European Union Politics* builds on the success of the previous five editions by retaining and updating the chapters published in the previous version of the book Innovations in this edition include a new chapter on Brexit and a section on the migration crisis in Chapter 22 Preface **Political Actors' Narratives on the Reforms of the European Union** Magdalena Góra, Elodie Thevenin, Katarzyna Zielińska, 2025-10-27 This book provides essential insights into contemporary political actors' narratives of European integration Focusing on the Future of Europe debate in parliaments the book reveals how the question of democracy in Europe is addressed Through the lens of differentiation it explores the numerous nuances within narratives on the EU Based on an extensive empirical analysis of debates from 11 national parliaments and the European Parliament over a period of seven years 2015-2021 it provides

Restraining Power through Institutions Alexandru V. Grigorescu, 2023-10-09 This book challenges the traditional view that meaningful analogies cannot be drawn between domestic and international politics Alexandru V Grigorescu shows that there are important parallels to be drawn across these two realms if political interactions among states over the past two centuries are compared to those within states going back about a thousand years He focuses specifically on the evolution of institutions that restrain concentrated power such as courts assemblies and bureaucracies Restraining Power through Institutions begins by developing a set of theoretical arguments about the emergence change and consolidation of institutional restraints on power These are primarily derived from literature focusing on domestic politics going back to events such as those surrounding the signing of the Magna Carta and the emergence and evolution of the Curia Regis in England or of the Estates General and Parlements in France It then assesses the relevance of such arguments for the evolution of numerous international institutions international courts such as the Permanent Court of Arbitration International Court of Justice and International Criminal Court international assemblies and parliaments such as the Assembly of the League of Nations UN General Assembly and European Parliament and international secretariats such as those of the Central Commission for the Navigation of the Rhine League of Nations UN and World Bank The similarities between developments in the domestic and international realms lead to a number of important conclusions about future expectations for international institutions and for world politics more broadly In particular the book argues that complementing the traditional focus on efforts to acquire power with the Lockean focus on restraining power offers a more complete depiction of international politics This novel perspective consequently shifts the focus from the interests and actions of a handful of powerful states to those of virtually all states and groups of states regardless of how powerful they are

Previously published as a special issue of the Journal of European Public Policy this volume presents a theory of constitutionalization as well as comparative analyses and case studies to underscore the claim that the European integration process itself engenders a democratic self healing mechanism There exists a consensus among academics politicians and the

public that the European Union suffers from a democratic deficit But how can it be resolved This book deals with two core areas central for the development of the liberal democratic constitutional state the extension of the powers of representative assemblies and the institutionalization of human rights The European Union has made remarkable progress in these two areas over the past half century Whenever a planned step of European integration through transfers of sovereignty threatens to undermine domestic standards of parliamentary control and human rights standards political elites in the member states regularly mobilize to counteract these developments The proponents of the Union s constitutionalization regularly invoke democratic and human rights norms shared by all members of the European Union to successfully exercise moral pressure on the sceptics of further constitutionalization

The Parliamentary Roots of European Social Policy

Mechthild Roos, 2021-09-01 The European Parliament EP a powerful actor in today s European Union was not intended to be more than a consultative assembly at first Yet this book shows that the EP was much more influential in shaping Community policy in the early years of the integration process than either the founding Treaties or most existing scholarship would allow It studies the EP s institutional evolution through the lens of Community social policy a policy area with a particularly strong ideational dimension By promoting a European social dimension Members of the EP MEPs presented the Parliament as the true representative of European citizens by channelling their interests and needs MEPs thus emphasised the EP s role as a provider of democratic legitimacy for Community politics whilst at the same time trying to convince European citizens that the Communities could have a real and positive impact on their everyday lives
