Building Mycology Dr Jagjit Singh, Jagjit Singh, 2006-01-16 Biodeterioration is the most common problem of mankind and its record can be traced back to biblical times or probably earlier Building Mycology deals with the study of fungi in and around the building environment having direct and indirect effect on the health of the building its materials structures and occupants Building Mycology J. Singh, 1994 **Building Mycology** Dr Jagjit Singh, Jagjit Singh, 2006-01-16

Biodeterioration is the most common problem of mankind and its record can be traced back to biblical times or probably earlier Building Mycology deals with the study of fungi in and around the building environment having direct and indirect effect on the health of the building its materials structures and occupants *Microorganisms in Home and Indoor Work Environments* Brian Flannigan, Robert A. Samson, J. David Miller, 2002-01-03 Despite the large amount of money spent on research into pollution of the indoor environment the problem remains complex with major gaps in our knowledge of the identities and sources of pollutants and of the effects of prolonged exposure to indoor pollutants on health *Microorganisms in Home and Indoor Work Environments* considers one such group o *Windows* James Campbell, Michael Tutton, 2025-09-18 In *Windows History Repair and Conservation* readers are guided through the history dating development care repair and conservation of windows by authors who are experts in their fields Each chapter covers a different aspect of the subject from the dating of windows and their separate parts through to surveying and engineering recording and curation of historic windows their ironmonger and surrounds As this book shows windows vary in complexity and form from the very simplest glazed openings to intricate medieval stained glass masterpieces combining the work of stone masons smiths woodworkers glaziers and artists This book traces the history of windows and provides guidance on their upkeep and conservation It is thus an essential reference work for all those involved in care of historic buildings *Windows History Repair and Conservation* was the first major book devoted to the understanding of windows This new revised edition brings the book up to date and provides additional chapters to provide a complete overview of the subject that will inform research and practice for years to come **Building Adaptation** James Douglas, 2006-08-11

As existing buildings age nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world *Building Adaptation Second Edition* is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of *Building Adaptation* reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition

continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance. **Building Pathology** David S. Watt, 2025-06-30. Well illustrated introduction to building pathology bridging the gap between building surveying and the detailed understanding of building defects, their prognosis and remediation. Building Pathology introduces the concept of building pathology and aims to give the reader a greater awareness and understanding of buildings and their users to assist in defect diagnosis and the design and implementation of specific and appropriate remedial measures. By focusing on the process rather than specific solutions, the book helps the reader to use the information in their practice in a wide variety of situations. The new third edition features new case studies which have been integrated into the text. Written by a highly qualified author with significant experience in the field, the third edition of Building Pathology contains information on Building performance covering environmental factors, user requirements, building structures and materials. Defects, damage and decay covering atmospheric and climatic action, excess moisture, chemical, physical and biological action, movement, fire and human factors. Survey and assessment covering building inspections and surveys, how to prioritize defects, unoccupied buildings and sites, and redundant and ruined buildings. Remediation in practice covering real world examples. With comprehensive coverage of the subject, Building Pathology is an essential learning resource for students of building surveying as well as professional architects, building surveyors, property managers and those working in heritage disciplines.

Surveying Historic Buildings David Watt, 2015-07-17. This bestselling book has been fully revised and updated to include valuable new case studies and examples which help to demonstrate the common problems found in older buildings. It features many additional photographs illustrating the decay mechanisms and individual issues associated with damp, timber decay, masonry defects, roofing problems and many other aspects. The book begins by summarizing the basics of surveying practice, including the inspection, assessment, defect diagnosis and monitoring of defects. It then examines the building elements, discussing their construction, typical faults and their diagnoses. This section provides specific advice on assessing industrial monuments and features concise inspection checklists for ease of reference. In the final section, the author looks to the future, considering the specific challenges faced by property professionals when employed to survey historic buildings. The book is accompanied by comprehensive appendices including sample survey forms and a list of useful contacts, followed by an extensive bibliography. This book will be of particular interest to conservation officers, surveyors, architects, archaeologists and planners.

Silent Invaders Miriam Jacobs And Barbara Dinham, 2004. Silent Invaders deals with the ubiquitous overuse of pesticides which has led to unsustainable farming practices imperiling the health of workers, consumers and the environment. The effects of these legal toxic products are studied from the perspective of women, as in some countries, particularly in the South, women make up 85 per cent or more of pesticide applicators. The volume covers a broad range of issues from health to the need for regulation to action that has been taken so far. It contains thirty-two essays.

written by authors from many nations including India and covers topics such as the Union Carbide gas leak at Bhopal twenty years ago essay 29 The issue of pesticides is of particular interest at the moment due to the Centre for Science and Environment's reports on the presence of pesticide in mineral water and soft drinks Survey and Repair of Traditional Buildings Richard Oxley, 2015-11-17 Understanding the unique requirements of traditional buildings is crucial to providing appropriate guidance on their care and repair This book will help practitioners identify the particular issues relating to older buildings and the problems they may encounter when surveying and repairing them With the use of examples the author provides invaluable information on how traditional buildings perform emphasizing the need for a sensitive and sustainable approach which also takes account of the specific needs of the building The book examines all aspects to be included in any assessment for survey and repair and points out in detail the potential pitfalls It also explores the controversial issues surrounding the treatment of damp and timber decay advocating solutions that are appropriate to older buildings rather than using standard often damaging methods of treatment The extensive case studies not only illustrate good conservation in practice but also how projects can go badly wrong and how mistakes could have been avoided This title explores the causes of movement and the actions required It advises on alternatives to chemical treatment for damp and timber decay It provides fully illustrated case studies with numerous photographs It emphasizes a sustainable approach to conservation It outlines the key legislation issues It includes the Historic Buildings Prosecution Fines Database and other useful appendices

Building Surveys and Reports James Douglas, 2010-12-13 This book provides guidance on building survey work for typical residential commercial and industrial buildings with advice on how to diagnose a wide range of defects It considers both modern and older construction methods together with new and traditional materials The particular problems of alteration and renovation work are discussed with guidance on how to carry out measured surveys A separate chapter covers survey problems after flood and fire damage and the legal section takes account of recent developments in case law relating to inspections and surveys of properties This new edition continues to provide a thorough treatment of all the key issues relating to surveying buildings dealing with the problems that surveyors are likely to encounter when inspecting buildings Changes for the new edition include Examples and references have been updated Evaluation of condition rating systems for domestic and commercial buildings A new section on the home condition reports More information on slate defects Bibliography revised and expanded to make it more comprehensive Additional appendix showing the home condition report format Sick Building Syndrome Sabah A. Abdul-Wahab, 2011-05-03 This volume throws light on the Sick Building Syndrome in Libraries and other public buildings and the extent to which it is influenced by the internal environment of libraries One of the signs of this disease is that the person suffers from a set of symptoms closely related to his/her presence in the building without the identification of any clear causes and his/her relief of these symptoms when he/she is out of the building Hence the book sheds on the extent to which the interior environment impacts upon the health of the people and the

extent to which this is reflected in their performance The book can be used for teaching research and professional reference It concludes with the recommendation that is essential to observe environmental dimensions when designing library and public buildings taking into consideration the expected impact of SBS in library and public buildings on people The significance of the book derives from the fact that it is the first of its kind to examine the issue of the interior environment and SBS of library and public building worldwide

Residential Property Appraisal Phil Parnham, Larry Russen, 2022-11-30 Residential Property Appraisal Volumes 1 and 2 are handbooks not only for students studying residential surveying but also for those involved in the appraisal of residential property Volume 1 has been updated and covers the valuation process as it relates to residential properties particularly when valuation is undertaken for secured lending purposes It addresses the basic skills required the risks posed in a valuation the key drivers of value emerging issues that impact valuation and the key legal and RICS regulatory considerations that a valuer needs to understand Volume 2 of the series goes on to consider the practical aspects of the survey and inspection of residential properties in more detail Not only does this include updated sections on the most common defects for example building movement moisture problems wood rot and wood boring insects it also covers emerging challenges including assessing personal safety hazards modern construction technologies and materials and invasive plants The volume also takes account of the Home Survey Standard recently published by the RICS and the changes resulting from climate change the energy crisis and concerns about fire safety Building services in domestic residential properties is another area of rapid change especially with the development of low carbon and renewable technologies To ensure that this aspect is covered in sufficient detail the content is to be included in Volume 3 Assessing Building Services An essential book for students studying to enter the residential survey and valuation profession and for existing practitioners who wish to improve their knowledge of current practices
