division of the Association of American Publishers Richard A Goldthwaite a leading economic historian of the Italian

Renaissance has spent his career studying the Florentine economy In this magisterial work Goldthwaite brings together a

lifetime of research and insight on the subject clarifying and explaining the complex workings of Florence s commercial

banking and artisan sectors Florence was one of the most industrialized cities in medieval Europe thanks to its thriving

textile industries The importation of raw materials and the exportation of finished cloth necessitated the creation of

commercial and banking practices that extended far beyond Florence s boundaries Part I situates Florence within this wider

international context and describes the commercial and banking networks through which the city s merchant bankers

operated Part II focuses on the urban economy of Florence itself including various industries merchants artisans and

investors It also evaluates the role of government in the economy the relationship of the urban economy to the region and the

distribution of wealth throughout the society While political social and cultural histories of Florence abound none focuses

solely on the economic history of the city The Economy of Renaissance Florence offers both a systematic description of the

city s major economic activities and a comprehensive overview of its economic development from the late Middle Ages

through the Renaissance to 1600 **R. A. Goldthwaite** Andreas Tönnemann,1984 *The Renaissance Print, 1470-1550*

Modern Built Environment ,2012-08-01 Today the bulk of tangible wealth around the globe resides in buildings and

physical infrastructure rather than moveable goods This situation was not always the case Investing in the Early Modern

Built Environment represents the first attempt to delve into the period's enhanced architectural investment, its successes, its failures, and the conflicts it provoked. Not just cultural but clear economic and environmental reasons existed for a rejection of the new architectural agenda. Whatever its efficacy or flaws, it ultimately served as a model worldwide for cityscapes and housing well into the twentieth century. Contributors include Jordan Sand, Robin Pearson, John Broad, Kiyoko Yamaguchi, Steven W. Hackel, Susan E. Hough, Johnathan Farris, Matthew Mulcahy, Charles Walker, Emma Hart, Chad Anderson, Ross H. Cordy, Grace Karskens, and Carole Shammas. *Pre-Industrial Cities and Technology* Colin Chant, David

Goodman, 2005-11-08. This is the first book in the series, exploring cities from the earliest earth built settlements to the dawn of the industrial age, exploring ancient, Medieval, early modern, and renaissance cities. Harris, David M. Lewis, Mark Woolmer, 2016

Markets, Households, and City States in the Ancient Greek Economy brings together sixteen essays by leading scholars of the ancient Greek economy. The essays investigate the role of market exchange in the economy of the ancient Greek world in the Classical and Hellenistic periods. Managing Construction Projects Graham M. Winch, 2012-11-20. Project management is

of critical importance in construction, yet its execution poses major challenges. In order to keep a project on track, decisions often have to be made before all the necessary information is available. Drawing on a wide range of research, Managing Construction Projects proposes new ways of thinking about project management in construction, exploring the skills required to manage uncertainty and offering techniques for thinking about the challenges involved. The second edition takes the information processing perspective introduced in the first edition and develops it further. In particular, this approach deepens the reader's understanding of the dynamics in the construction project process, from the value proposition inherent in the project mission to the functioning asset that generates value for its owners and users. Managing Construction Projects is a unique and indispensable contribution to the available literature on construction project management. It will be of particular benefit to advanced students of construction and construction project management, as well as contractors and quantity surveyors. **Reviews of the First edition:** A massive review of the art and science of the management of projects that has the great virtue of being a good read wherever it is touched. It spills the dirt on things that went wrong, elucidates the history so you can understand the industry's current stance, draws on other countries' experience, and explains the latest management processes. Throughout, it is liberally sprinkled with anecdotes and case histories which amply illustrate the dos and don'ts for practitioners wishing to deliver projects on time, to expected quality, and price. A valuable book for students and practitioners alike. John D. Findlay, Director, Stent. This is a valuable source for practitioners and students. It covers the A-Z of project

management in a confident contemporary manner and provides a powerful and much needed conceptual perspective in place of a purely prescriptive approach. The engaging presentation introduces a range of challenges to established thinking about project management often by making comparisons between practices in the UK and those of other countries. Peter Lansley, Professor of Construction Management, University of Reading. A refreshing and unique study of information management and its impact upon international construction project management. The book is well presented and written logically and succinctly and is flexible enough to allow readers to either read from start to finish or to dip into selected chapters. This book deserves to be an established text for any construction or civil engineering undergraduate and/or postgraduate course. CNBR, 25th November 2003. Generous use is made of anecdotes and case histories throughout to support the theory the book illustrates the mistakes made by others and the means to deliver projects on time and to cost. *Building Services Journal*, April 2004.

The Birth of Modern Europe, 2010-12-07. It seems undeniable that Jan de Vries has cast an indelible impression upon the field of early modern economic history. With his rejection of traditional models that left pre-industrial Europe with little to no role to play in modern development, de Vries' work has laid claim to the rich significance of the early modern period as the birth of the contemporary West. Culminating in *The Industrious Revolution: Consumer Behavior and the Household Economy, 1650 to the Present* (2008), his work has changed the way scholars conceptualize and study this dynamic period, as the contributors in this volume attest. Utilizing the methods and concepts pioneered by de Vries, these authors display the depth and breadth of his influence with applications ranging from trade to architecture, from the Netherlands to China and from the 1400s to the present day.

The Medieval Mediterranean City, Felicity Ratté, 2021-08-18. This book is a study of architecture and urban design across the Mediterranean Sea from the 12th to the 14th Century, a time when there was no single hegemonic power dominating the area. The focus of the study is four cities on the Italian peninsula and four in Syria and Egypt, illustrating the interconnectedness of the design and use of urban structures, streets and open space. Each chapter offers an historical analysis of the buildings and spaces used for trade, education, political display and public action. The work includes historical and social analyses of the mercantile, social, political and educational cultures of the eight cities, highlighting similarities and differences between Christian and Islamic practices. Sixteen new maps drawn specifically for this book are based on the writings of medieval travelers.

The Grove Encyclopedia of Medieval Art and Architecture, Colum Hourihane, 2012. Drawing upon the expansive scholarship in the celebrated *Grove Dictionary of Art* and adding hundreds of new entries, it offers students, researchers and the general public a reliable up-to-date and convenient resource covering this field of major importance in the development of Western history and international art and architecture.

Crises and Transformation in the Mediterranean World, Jordi Catalan Vidal, 2023-08-16. This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day. It

considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705 1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia's past might shed light on the long term consequences of the Great Recession of 2007-9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With a comprehensive overview of major events in Catalonian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics
