With this latest resource, authors Patricia Wolfe and Pamela Nevills provide insight and assistance for preschool teachers, parents, and care providers and nursery and primary teachers by explaining the development of the young brain, the acquisition of language as preparation for reading, and the nurturing and instruction process from birth to age eight. This unique guide demonstrates how the brain of a child masters the reading process of decoding print and reading with fluency and comprehension and addresses related literacy skills of writing and spelling. Brain-friendly strategies that lay the groundwork for reading success include activities to support phonemic awareness, phonics, vocabulary, comprehension, and fluency; applications of games, music, play, and instruction; intervention suggestions for children who are challenged or discouraged; early readers. Basic Skills Spelling, Grade 5 Maribelle Betterton, 1999-01-29. This spelling book provides a basis for a fun and exciting spelling curriculum in your classroom. Each Word List has been carefully selected to focus on a specific spelling element that fifth-grade students would encounter in their reading and writing. In addition to the Word List and activity on each worksheet, students are encouraged to make a list of special words that they would like to learn to spell. Each lesson also suggests a writing activity that complements the page and is intended to encourage student writing. Extensions pages provide exercises that require the students to build more words based on the spelling patterns of the previously studied Word Lists.
