Building Cities That Work Edmund P. Fowler, 1990-07-01 Using Jane Jacobs' critique of postwar city building as a starting point Fowler shows that recent North American urban development has been characterized by development projects on a massive scale an indiscriminate use of vast areas of land and an increasingly evident homogeneity These are characteristics Fowler argues of a perverse and unnatural way of building that is wrecking the planet and enfeebling our social and political networks In exploring how the built environment contributes to social problems Fowler used Toronto as a case study conducting extensive field work in nineteen areas of the city He shows not only that postwar building was the result of conscious public policy but goes further arguing that our cities reflect deep seated insecurities and cultural malaise in surprisingly direct ways

Robert GELL (D.D.),1659 **The Meaning of the City** Jacques Ellul,2011-06-17 Jacques Ellul a former member of a Law Faculty at the University of Bordeaux was recognized as a brilliant and penetrating commentator on the relationship between theology and sociology In the Meaning of the City he presents what he finds in the Bible a sophisticated coherent theology of the city fully applicable to today s urbanized society Ellul believes that the city symbolizes the supreme work of man and as such represents man s ultimate rejection of God Therefore it is the city where lies man s rebellious heart that must be reformed The author stresses the fact that the Bible does not find man s fulfillment in a return to an idyllic Eden but points rather to a life of communion with the Savior in the city transfigured The Meaning of the City says John Wilkinson in his introductory essay to the book is the theological counterpoint to Ellul s Technological Society a work that analyzed the phenomenon of the autonomous and totally manipulative post industrial world Ellul takes issue with those who idealistically plan new urban environments for man as though man alone can negate the inherent diabolism of the city For Ellul the history of the city from the times of Cain and Nimrod through to Babylon and Jerusalem reveals a tendency to destroy the human being for the sake of human works Nevertheless continuing the theme of the tension between two realities that characterizes all his works Ellul sees God as electing the city as itself an instrument of grace for the believer William Stringfellow describes The Meaning of the City as a book of startling significance which should rank beside Reinhold Niebuhr s Moral Man and Immoral Society as a work of truly momentous potential Douglass D McFerran adds that it is a book worth serious consideration by anyone interested in the relationship between religious commitment and secular involvement And John Wilkinson sums it up There are very few convincingly religious analyses of the sociological phenomena of the present day Ellul s biblically based sociology is today furnishing the matter for a large and growing group of social protestants particularly in the United States

Roads and Road Building United States. Congress. Senate. Committee on Agriculture and Forestry,1904 **State of Nature Or Eden?** Helen Thornton,2005 State of Nature or Eden Thomas Hobbes and his Contemporaries on the Natural Condition of Human Beings aims to explain how Hobbes s state of nature was understood by a contemporary readership whose most important reference point for such a condition was the original condition of human

beings at the creation in other words in Eden The book uses ideas about how readers brought their own reading of other texts to any reading that reading is affected by the context in which the reader reads and that the Bible was the model for all reading in the early modern period It combines these ideas with the primary evidence of the contemporary critical reaction to Hobbes to reconstruct how Hobbes s state of nature was read by his contemporaries The book argues that what determined how Hobbes s seventeenth century readers responded to his description of the state of nature were their views on the effects of the Fall Hobbes s contemporary critics the majority of whom were Aristotelians and Arminians thought that the Fall had corrupted human nature although not to the extent implied by Hobbes s description Further they wanted to look at human beings as they should have been or ought to be Hobbes on the other hand wanted to look at human beings as they were and in doing so was closer to Augustinian Lutheran and Reformed interpretations which argued that nature had been inverted by the Fall For those of Hobbes s contemporaries who shared these theological assumptions there were important parallels to be seen between Hobbes s account and that of scripture although on some points his description could have been seen as a subversion of scripture The book also demonstrates that Hobbes was working within the Protestant tradition as well as showing how he used different aspects of this tradition Helen Thornton is an Independent Scholar She completed her PhD at the University of Hull
