

Building The Ecological City

Xuefei Ren

Building The Ecological City:

Building the Ecological City R R White, 2002-02-22 Building the Ecological City puts forward solutions to the question how can we build cities that provide an acceptable standard of living for their inhabitants without depleting the ecosystems and bio geochemical cycles on which they depend The book suggests and examines the concept of urban metabolism which characterizes the city as a set of interlinked systems of physical flows linking air land and water A series of chapters looks at the production and management of waste energy use and air emissions water supply and management urban land use and air quality issues Within the broader context of climate change the book then considers a range of practical strategies for restoring the health of urban ecosystems from the remediation of brownfield land to improving air quality and making better use of water resources

Building the Ecological City R R White, 2002-02-22 If the modern city is a monument to anything it is a monument to man's inefficiency Our cities are plagued by problems of congestion waste and pollution that deplete natural resources damage the environment and reduce the quality of life of citizens The irony is as this fascinating new study shows that it doesn't have to be like this Building the ecological city describes the problems we face and puts forward solutions to the question how can we build cities that provide an acceptable standard of living for their inhabitants without depleting the ecosystems and bio geochemical cycles on which they depend The book suggests and examines the concept of urban metabolism in which the city is characterized as a set of interlinked systems of physical flows linking air land and water A series of chapters looks at the production and management of waste energy use and air emissions water supply and management urban land use and air quality issues Within the broader context of climate change the book then considers a range of practical strategies for restoring the health of urban ecosystems from the restoration of brownfield land to productive use through to improving air quality and making better use of water resources Building the ecological city is a major contribution to better urban management and planning for both citizens and the environment and is an invaluable sourcebook for urban and national planners architects and environmental agencies Authoritative review of the environmental impact of modern cities Seeks to identify a viable model for urban living in relation to all the resources land air and water upon which cities depend but currently tend to deplete or destroy Essential reading for urban planners architects local and national government officers environmental agencies worldwide and students of ecology and environmental sciences **The**

Ecological City Conny Bakker, 2002 Since 1997 the Ecological City researchers TU Delft have been working on several innovative and practical proposals to create a sustainable and livable environment This book presents ten complementary and occasionally overlapping versions of an ecological city China's Eco-city Construction Jingyuan Li, Tongjin Yang, 2015-11-04 This book introduces the concept of Eco civilization highlights the construction and development of eco cities in China and assesses the achievements and shortcomings of China's eco city construction projects As both China and Western countries face an impending ecological crisis responding to that crisis is a common challenge for all human beings

There is an overwhelming consensus among Chinese scholars that in order to successfully address the ecological crisis successfully we must establish an eco civilization and one important step toward accomplishing that goal is to plan and construct eco cities

The Development of Eco Cities in China Juke Liu, Weiping Sun, Wenzhen Hu, 2016-10-17 This book presents an in depth study on and summary of the current practice and theories for the construction of eco cities in China in the context of the country's rapid urbanization It argues that by 2020 60% of China's population will live in cities And the evolution from green cities to eco cities and subsequently to smart cities is crucial to China's sustainable development The book presents a feasible and objective quantitative evaluation system for the sustainable and healthy development of eco cities It summarizes the Chinese experience in building eco cities as the coordinated development of economy society resources and environment with the goal being to make cities inclusive safe resilient and sustainable This is essential to achieving a number of the United Nations Sustainable Development Goals In addition the book defines the current stage of development Chinese cities have reached in terms of ecological construction and offers guidance on selecting suitable urban ecological construction modes and improvement approaches It provides a valuable reference source and guidebook for research on and the practice of eco city construction Accordingly it will help other countries around the world especially the developing countries to benefit from China's successful experience

Green Building in Developing Countries

Zhonghua Gou, 2019-07-30 The book reveals how green buildings are currently being adapted and applied in developing countries It includes the major developing countries such as China Indonesia Malaysia Thailand Pakistan Cambodia Ghana Nigeria and countries from the Middle East and gathers the insights of respected green building researchers from these areas to map out the developing world's green building revolution The book highlights these countries contribution to tackling climate change emphasising the green building benefits and the research behind them The contributing authors explore how the green building revolution has spread to developing countries and how national governments have initiated their own green building policies and agendas They also explore how the market has echoed the green building policy and how a business case for green buildings has been established In turn they show how an international set of green building standards in the form of various techniques and tools has been incorporated into local building and construction practices In closing they demonstrate how the developing world is emerging as a key player for addressing the energy and environmental problems currently facing the world The book helps developers designers and policy makers in governments and green building stakeholders to make better decisions on the basis of global and local conditions It is also of interest to engineers designers facility managers and researchers as it provides a holistic picture of how the industry is responding to the worldwide call for greener and more sustainable buildings

From Eco-Cities to Sustainable City-Regions Ernest J. Yanarella, Richard S. Levine, 2020-05-29 A political scientist and an urban architect explore China's odyssey to become an ecological civilization and transform its massive unsustainable urbanization process into one that creates hundreds of eco

cities The resulting *From Eco Cities to Sustainable City Regions* is the first book length study combining analysis of politics and power urban design and planning issues derived from the co authors interdisciplinary research and on site fieldwork from their political science and architectural area specialties *Eco-Cities* Zhifeng Yang,2012-10-15 As cities undergo vast changes due to industrialization urbanization and globalization environmental considerations assume a growing importance in the urban planning processes of an increasing number of governments around the world Several cities and regions around the world have already enacted policies that signal the emergence of a paradigm of sustainability in eco cities planning Providing an overview of urban ecosystem structure function and change *Eco Cities A Planning Guide* addresses how to successfully accomplish eco city planning that meets government requirements It adds a new dimension to the understanding and application of the concept of urban sustainability based on hypotheses about feedback between social and biogeophysical processes Emphasizing integration the first part of the book discusses various aspects of planning theory It presents three innovative theories for socioeconomic models a theory on the locational choices made by households and firms an urban version of the stream continuum concept and an application of metacommunity theory to the fragmented urban biota These theories raise new urban planning questions and stimulate integrated modeling The book also introduces urban planning modeling that uses existing social vegetation ecohydrological and ecosystem service modules but is refined and operated for enhanced cross disciplinary integration and prediction The second part of the book consists of several case studies of Chinese eco cities covering a majority of the urban development patterns that offer in depth examples of planning practices currently in use Drawing on experimentation comparison long term measurement and modeling this fascinating guide helps readers better understand eco cities and eco landscapes as integrated spatially extensive complex adaptive systems It lays a solid foundation for engagement between urban planners researchers educators policy makers and citizens as they work to adapt to changing environmental social and economic conditions **Eco-city Planning** Tai-Chee Wong,Belinda Yuen,2011-05-02 Eco city planning is a key element of urban land use planning in perspective and of ongoing debate of environmental urban sustainable development with a spatial and practical dimension The conceptual basis of ecological planning is that we can no longer afford to be merely human centred in approach Instead the interdependency of human and non human species has forced us to appreciate the rights and intrinsic values of non human species in our pursuit for a sustainable ecosystem This volume has as approach an emphasis on environmental planning policies whereby for example energy saving anti pollution measures use of non car modes construction of green buildings safeguarding of nature and natural habitats in urban areas and use of more renewable resources are promotional norms Their aims and leading outcome serve to protect the Earth from adverse effects of global warming and different sources of pollution threatening the quality of life of human societies *Constructing Utopias* Zhongjie Lin,Benjamin Lin Presidential Professor Weitzman School of Design Zhongjie Lin,2025-06-16 Amid its groundbreaking political reforms and largest mass migration ever seen in human history

China created over 3 800 new towns to accommodate its burgeoning urban population and sustain economic growth

Constructing Utopias examines four decades of Chinese urbanization focusing on a series of model new towns that showcase innovative planning design technologies policies and China's broader vision for a modern urban nation These case studies highlight fundamental issues in new town development including economic vitality cultural identity environmental sustainability and socio spatial dynamics and illuminate the complex interplay between space production and social transformation within the context of neoliberalism and globalization

China's Urban Agglomerations Chuanglin Fang, Danlin Yu, 2020-01-03 The book combs through extensively 32 231 urban agglomeration related works during the past 120 years to explore a theoretically supported and practically based definition of urban agglomeration Based on the definition the authors explore intensively the fundamental characteristics spatiotemporal differentiation properties and existing issues for China's sustainable urban agglomeration development for the past 35 years The study proposes that China shall focus on the construction and sustainable development of five primary national level urban agglomerations In the meantime China shall also steadily and gradually construct 9 regional urban agglomerations and guide the development and growth of 6 local urban agglomerations In the long run China will have a hierarchical 5 9 6 closely integrated hierarchical urban agglomeration spatial structure The study also proposes to coordinate the construction and development of urban agglomerations on the two belts and one road to form a national new urbanization development strategic pattern that enables the axis to connect the agglomerations while the agglomerations support the axis Furthermore the study investigates a variety of strategic thinking and suggestions for creating innovative green and ecologically friendly intelligent low carbon open culture oriented market oriented and shared urban agglomerations in China This book will be a comprehensive reference both for scholars and decision makers engaged in urban development and planning and environmental protection departments It can also serve as textbook for graduate students of relevant fields

Towards A Liveable And Sustainable Urban Environment: Eco-cities In East Asia Liang Fook Lye, Gang Chen, 2010-06-17 With cities rapidly encroaching onto surrounding lands the notion of eco city proposes an innovative yet pragmatic approach to designing building and operating cities in a way that the destructive impact of human urban activity upon nature will be significantly reduced This book comprises of papers from a workshop organized by the East Asian Institute on Eco cities in East Asia on 27 February 2009 in Singapore Contributed by scholars officials and environmental specialists from Japan China Malaysia Indonesia Thailand and the Philippines the papers focus on how individual governments in these countries undertake eco city projects The book also highlights best practices that are useful to policy makers and anyone else who seeks to learn from the experiences of other countries in order to reduce their ecological footprints

Green Infrastructure in Chinese Cities Ali Cheshmehzangi, 2022-03-19 Since 2014 and the start of the New type Urbanization Plan NUP we see a turning point in the sustainability agenda of China One of the main indicators is greening cities and the built environments which will be covered

holistically in this edited book From the perspective of green infrastructure in particular the book approaches key areas of forest city development sponge city program green roofing nature based solutions urban farming eco city development etc This is the first time that such important areas of research come together under the perspective of green Infrastructure The results would be beneficial to policymakers practitioners and researchers in China and across the globe The comprehensive set of findings from this book will benefit other countries as we aim to highlight some of the best practices of the current age The main aim of the book is to put together an excellent group of scholars and practitioners from the field focusing on the topic of Green Infrastructure in Chinese Cities In doing so we aim to cover some of the key best practices for sustainable urbanism Divided into four parts the book covers four key areas of 1 Policy Interventions 2 Planning Innovation 3 Design Solutions and 4 Technical Integration In doing so we cover an array of best practices related to green infrastructures of various types and their impacts on cities and communities in China We expect the book to be a valuable resource for researchers in the areas of sustainability urbanism urban planning urban geography urban design geographical sciences environmental sciences landscape architecture and urban ecology The book covers essential factors such as policy regulations and programs in Part 1 planning paradigms and their impacts on urban development in Part 2 integrated design solutions that suggest sustainable urbanization progression in Part 3 and technical knowledge that would be utilized for the future development of green infrastructure practices in China and beyond Lastly this edited book aims to provide a collaborative opportunity for experts and researchers of the field who could contribute to the future pathways of sustainable urbanization of China Lessons extracted from these contributions could be utilized for other contexts which will benefit a wider group of stakeholders

Low-carbon City and New-type Urbanization Songlin Feng, Weiguang Huang, Jun Wang, Mingquan Wang, Jun Zha, 2015-01-23 In the face of increasingly serious resource and environmental challenges the world has already accepted low carbon development as the main way forward for future city construction Chinese cities have encountered many problems during their development including land constraints energy shortages traffic congestion and air pollution For this reason the national meeting of the Central Work Conference on Urbanization made the strategic decision to take a new approach to urbanization and indicated that in future the key features of urbanization in China will be low carbon development and harmony between the environment and resources This book discusses the low carbon city as the new pattern of Chinese urbanization This represents a major change and takes intensive land use intelligent green and low carbon as its key words Low carbon will become an important future development direction for Chinese urbanization development In the twenty first Century in response to the global climate change countries have started a wave of low carbon city construction But in China there are still many disputes and misunderstandings surrounding the issue Due to a lack of research low carbon city construction in China is still in the early stages and while there have been successes there have also been failures There are complex and diverse challenges in applying low carbon development methods in the context of today

s Chinese cities The construction of low carbon cities requires efficient government the technological innovation of enterprises and professional scholars but also efforts on the part of the public to change their daily activities Based on the above considerations the collection brings together experts from urban planning and design clean energy systems low carbon transportation new types of city infrastructure and smart cities etc in the hope of forming some solutions for Chinese low carbon city development

Proceedings of 3rd International Sustainable Buildings Symposium (ISBS 2017) Seyhan Fırat, John Kinuthia, Abid Abu-Tair, 2018-03-28 This book describes the latest advances innovations and applications in the field of building design environmental engineering and sustainability as presented by leading international researchers engineers architects and urban planners at the 3rd International Sustainable Buildings Symposium ISBS held in Dubai UAE from 15 to 17 March 2017 It covers highly diverse topics including smart cities sustainable building and construction design sustainable urban planning infrastructure development structural resilience under natural hazards water and waste management energy efficiency climate change impacts life cycle assessment environmental policies and strengthening and rehabilitation of structures The contributions amply demonstrate that sustainable building design is key to protecting and preserving natural resources economic growth cultural heritage and public health The contributions were selected by means of a rigorous peer review process and highlight many exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists

CEO Guide to Doing Business in Asia Ade Asefeso MCIPS MBA, 2012-06-17 Are you a CEO consultant or entrepreneur interested in entering or expanding your activity in Taiwan Hong Kong and Macao s market Then this book is for you The main objective of this book is to provide you with basic knowledge about Taiwan Hong Kong and Macao an overview of their economy business culture potential opportunities and an introduction to other relevant issues Novice exporters in particular will find it a useful starting point Hong Kong is an international city with a population of almost seven million It the world s 12th largest trading economy and one of Asia s leading financial and business centres Its per capita Gross Domestic Product ranks 7th highest in the world Hong Kong has been ranked as the world s freest economy in the Wall Street Journal and Heritage Foundation s Index of Economic Freedom for 15 consecutive years on the other hand Taiwan s strategic location is one of its most significant advantages for international investors

Population Mobility, Urban Planning and Management in China Tai-Chee Wong, Sun Sheng Han, Hongmei Zhang, 2015-03-24 This volume contains essays that examine contemporary urban and regional planning and development in China Through in depth theoretical and empirical analysis it provides insights into the urban policies and operational mechanisms of this colossal transitional economy which has presented unprecedented challenges and dynamics Inside readers will discover the causes and consequences of rapid urbanization that have led to a series of environmental economic and social planning and management measures designed to achieve quality urban living The essays also detail efforts in adopting the latest options in city building such as specific urban planning approaches in developing large city

regions building cities without slums constructing new townships and green urbanism including eco city and sustainable transport In addition coverage explores financial management and support as a means to encourage urbanization and urban economic growth in less developed regions Overall the volume offers a wealth of concrete detailed information on conditions in different regions of China and features an extensive range of content methods and theory It provides readers with a comprehensive portrait of the chain relationship between rapid urbanization spatial planning and management throughout the country The book will serve as a useful reference for national and international consultancy services doing business or serving public interest in China It will also be of interest to an international audience seeking a better understanding of urban development and planning in China including university teachers students government agencies and general readers

Environmental Principles of Formation of Architecture Public Buildings Oksana Zaporozhchenko, 2017-07-04 Exposition in edition materials assist forming of the system of knowledge of future specialists for the decision of architectural and scientific tasks from creation of perfect decisions of ecological architectural environment Considered ecological principles of forming of architecture of public building and features of forming by volume of of plan decisions of separate types of houses Counted on the students of higher educational establishments can be used for specialists that work in the field of

architecture design and building *Urban China* Xuefei Ren, 2013-04-23 Currently there are more than 125 Chinese cities with a population exceeding one million The unprecedented urban growth in China presents a crucial development for studies on globalization and urban transformation This concise and engaging book examines the past trajectories present conditions and future prospects of Chinese urbanization by investigating five key themes governance migration landscape inequality and cultural economy Based on a comprehensive evaluation of the literature and original research materials Ren offers a critical account of the Chinese urban condition after the first decade of the twenty first century She argues that the urban rural dichotomy that was artificially constructed under socialism is no longer a meaningful lens for analyses and that Chinese cities have become strategic sites for reassembling citizenship rights for both urban residents and rural migrants The book is essential reading for students and scholars of urban and development studies with a focus on China and all interested in understanding the relationship between state capitalism and urbanization in the global context **Sustainable**

Cities for the Third Millennium: The Odyssey of Urban Excellence Voula P. Mega, 2010-09-21 At the dawn of the third millennium planet Earth entered a zone of turbulence The 2008 crisis added economic uncertainty to the threat of global warming and extreme events such as droughts floods and cyclones the persisting crisis of poverty and the spectrum of pandemics and terrorism Against this global landscape in an era of fragility cities already sheltering more than half of humankind appear as Janus faced realities the best and worst of places vulnerable but still full of hope and will to overcome the crisis of societal values and progress in the path of sustainable development This book addresses the most critical challenges for cities humanity's collective masterpieces in danger and analyses breakthrough responses for sustainable dev

opment a globalisation with human face and the transition to inclusive post carbon communities The ultimate wish is that experts city planners decision makers and citizens in search of sustainable cities could find here some sources of information and inspiration to enhance the immense possibilities of cities and embrace the best possible trajectories of change
