**Building Trust** Robert C. Solomon, Fernando Flores, 2001 Examines the effects of mistrust and shows how to move from naive trust that is easily destroyed to authentic trust that is sophisticated reflective and renewable Demonstrates that the key to creating authentic trust is communication which requires one to address problems openly so that they can be analysed understood and rationally negotiated Building Trust Robert C. Solomon, Fernando Flores, 2003-05-01 In business politics marriage indeed in any significant relationship trust is the essential precondition upon which all real success depends But what precisely is trust How can it be achieved and sustained And most importantly how can it be regained once it has been broken In *Building Trust* Robert C Solomon and Fernando Flores offer compelling answers to these questions They argue that trust is not something that simply exists from the beginning something we can assume or take for granted that it is not a static quality or social glue Instead they assert that trust is an emotional skill an active and dynamic part of our lives that we build and sustain with our promises and commitments our emotions and integrity In looking closely at the effects of mistrust such as insidious office politics that can sabotage a company's efficiency Solomon and Flores demonstrate how to move from naive trust that is easily shattered to an authentic trust that is sophisticated reflective and possible to renew As the global economy makes us more and more reliant on strangers and as our political and personal interactions become more complex *Building Trust* offers invaluable insight into a vital aspect of human relationships The Politics of Hope Donna Zajonc, 2004 *The Politics of Hope* presents cogent research on human potential and leadership against the backdrop of an insider's political war stories The result is a clear picture of American democracy as an exciting four step evolutionary process that mirrors the macrocosm of the evolution of all humanity That the scope of our world has narrowed due to rapid and chaotic social change brought on by the Internet and other global communication technologies is a fact not lost on Zajonc *The Politics of Hope* is a call to action for American citizens recognizing that to revive the dream of democracy worldwide our nation must set the stage for political greatness on a global scale *A Defense of Ignorance* Cynthia Townley, 2011-01-01 By exploring diverse and sometimes positive roles for ignorance *A Defense of Ignorance* offers a revisionary approach to epistemology that challenges core assumptions about epistemic values Townley contributes innovative ways of thinking about the practicalities and politics of knowledge and argues for an expanded domain of responsible epistemic conduct All social scientists especially those interested in knowledge and in feminist scholarship stand to benefit from Townley's arguments *Culture and Politics* Jan-Erik Lane, Uwe Wagschal, 2013-06-17 This concise accessible text presents an overview of the relevance of culture for politics Culture figures prominently in the theories of the great classics such as Marx Durkheim and Weber Recently the cultural approach to politics has developed quickly and the concept of political culture has played a role in these developments particularly given the emergence of large scale survey research into political value orientations Seeking to outline this rapid development the book is divided into three sections

Section I of the book discusses the relevance of cultural perspectives to political analysis including discussion of the most significant concepts and methods Section II looks at the core elements of political culture tradition ethnicity and religion Section III examines emerging research avenues and opportunities including social capital value orientations in the postmodern world newer formulations of political culture such as gender and sexuality and the influence of the environment Drawing on a wealth of examples and a comprehensive analysis of comparative data this textbook is essential reading for all students of political culture research methods political sociology and comparative politics *Competing for Knowledge* Robert Huggins,Hiro Izushi,2007-08-09 As yet little is understood about how the knowledge based economy differs from the old traditional economy Digesting up to date cross disciplinary thinking this significant volume provides an account of the transformation of advanced economies **The Philosophy and Practice of Coaching** Diane Brennan,Kim Gortz,2008-04-30 The Philosophy and Practice of Coaching will help to advance the global conversation about the future of coaching The book is organized into three key sections Foundations for Coaching Applications of Coaching and Organizations and Coaching and the focus is on enabling the reader to astutely link theory and practice **Dialogical Approaches to Trust in Communication** Per Linell,Ivana Markova,2013-10-01 Trust has a constituent role in human societies It has been treated as a scientific topic in many disciplines Yet despite the fact that trust and distrust come to life primarily in human communication and through language it has seldom been analyzed from a communicative or linguistic perspective This is the theme of this path breaking volume This volume contains 12 chapters plus introduction and epilogue by the editors They have been authored by leading specialists on trust in language and communication coming from many disciplines and from different cultures and countries Most of the authors share a conceptual basis in dialogical theories This book is a follow up volume to two previous volumes on trust within cultural psychology Trust and Distrust Markov Gillespie 2008 and Trust and Conflict Markov Gillespie 2012 It will be of interest to anyone seriously interested in trust in societies and in trust and distrust as displayed in communication and language Practical Ways to Lead & Serve (Manage) Others Johanna Rothman,2020-12-23 You can excel at managing people when you lead and serve them You might have only seen managers try to direct and control others You might think you can't possibly lead and serve others Especially not with all the pressure you feel You can Great managers create an environment where people can do their best work These excellent managers lead and serve others not control or direct them Based on research and backed up by personal stories this book will show you how modern managers lead and serve others Through questions and stories learn how you can Change your focus from individuals to teams Create more capability in each person and as a team Create more engaged teams or workgroups Support people as they manage their careers and eliminate the need for performance reviews Support teams as they can learn to manage themselves And much more With its question and myth each chapter offers you options to rethink how you lead and serve others Become a modern manager Learn to lead and serve others to deliver the results everyone needs
