Precarious Balance Bardwell L. Smith, 2022-08-18 Since the third century BCE when the king of Sri Lanka converted to Buddhism the island nation off the southern coast of India has represented a central interest of Buddhist scholarship The association between its politics and religious life has not always remained harmonious however and

has contributed to the contemporary turmoil that threatens to tear it apart In this valuable book renowned religious scholar Bardwell Smith elucidates the history of Buddhism in Sri Lanka from the time of one of its earliest rulers through to its present day strife The essays collected here for the first time explore various themes of Sri Lanka s long history in novel and constructive ways Topics include Sinhala Buddhists sense of manifest destiny arising from Sri Lanka s oldest historical chronicles the Mahavamsa and the Dipavamsa the nationalist implications of the chronicles depiction of the third century Mahavihara monastery as the site of original Buddhism and concepts of order and legitimation of power in ancient Ceylon With a new introduction and final chapter Smith sheds fresh light on today s Sri Lanka connecting historical studies with contemporary issues

Integral Advantage Ronnie Lessem, 2017-05-15 The BRICS countries are heralded for their double digit economic growth rates and while this has indeed been impressive particularly in India and China it is clear that significant social and environmental fault lines have developed in these regions Building on the integral heritage of Ronnie Lessem s previous work through Trans4m s Centre for Integral Development here he makes the case for integral advantage a philosophy inclusive of nature and culture technology and economy altogether accommodated by an integral polity Moreover and as will be illustrated in each of the cases of the five BRICS countries each one is an integral entity in its own particular right and needs to be viewed and duly evolved as such In the final analysis he argues then that around the world the failure of a society to develop is not due to its economic limitations in isolation but to the failure of nature and culture technology and economy to co evolve in unison under the

rubric of an integral polity altogether aligned with that particular society Drawing on the approach he has developed towards the release of a society's genius in each case he demonstrates how the pursuit of integral advantage may actually arise Most specifically he indicates how a balance between the spiritual and the material on the one hand and the natural and the social on the other needs to be achieved

Peacemaking in International Conflict I. William Zartman, 2007 This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peacemaking that are currently available and critically assesses their usefulness and limitations

Integral Renewal Ronnie Lessem, Alexander Schieffer, 2016-03-09 In 2010 Ronnie Lessem and Alexander Schieffer published their seminal work on Integral Research and Innovation whereby they identified the four R's: relational and renewal, reason and realization based research paths that altogether encompass the major qualitative research methods and methodologies Within each path they identified a trajectory from origination to transformation via foundation and emancipation However these paths underlying the research process conventionally termed method were disconnected from the integral economic and enterprise content conventionally termed literature with which they were concerned In this book *Integral Renewal* they seek to remedy such in two major respects As transformative masters and PhD programs are focused on the Global South where the vast majority of the world's population is based as well as those developmental agencies focused on such the great majority of the people with whom the authors deal select the relational research path and the path of renewal over and above the paths of reason and realization The focus of this book will be on these two paths of integral research now interconnected with integral enterprise and economics Uniquely the authors pursue research and innovation in a systematic way In that respect while their prior *Integral Research* book still provides the research foundation for the four southern and eastern northern and western paths this book will focus on the former two relational southern and renewal eastern from the combined perspectives of research process and economic and enterprise content

Towards a Just and Ecologically Sustainable Peace Joseph Camilleri, Deborah Guess, 2020-08-13 This book addresses the need to develop a holistic approach to countering violence that integrates notions of peace justice and care of the Earth It is unique in that it does not stop with the move toward articulating Just Peace as a human concern but probes the mindset needed for the shift to a Just and Ecologically Sustainable Peace It explores the values and principles that can guide this shift theoretically and in practice International in scope and grounded in the reality of Indigenous and non Indigenous Australia and the wider Asia Pacific context the book brings together important insights drawn from the Indigenous relationship to land ecological feminism ecological philosophy the social sciences more generally and a range of religious and non religious cosmologies Drawn from diverse disciplinary backgrounds the contributors in this book apply their combined professional expertise and active engagement to illuminate the difficult choices that lie ahead

Integral Dynamics Ronnie Lessem, Alexander Schieffer, Samuel D. Rima, 2016-05-23 The theory of integral dynamics is based on the view that the development of individual leaders or entrepreneurs requires the simultaneous development of

institutions and societies It seeks a specific way forward for each society fundamentally different from but drawing on its past Nearly every natural science has been transformed from an analytically based approach to a dynamic one now it is time for society and culture to follow suit locally and globally Each culture discipline and person is incomplete and is in need of others in order to develop and evolve This book sets out a curriculum for a new integral trans cultural and trans disciplinary area of study inclusive of but extending beyond economics and enterprise It embraces a trans personal perspective linking self with community enterprise and society and focusing on the vital relationship between local identity and global integrity For the government policy maker the enlightened business practitioner and the student and researcher into economics and enterprise the new discipline is set out here in complete detail by a multi national team of Gower s Transformation and Innovation Series authors Illuminated with examples relating the conceptual to the practical this is a text not for a pre modern modern or even post modern era but for what has been called our trans modern age

The Integrators Panos Vostanis, Ronnie Lessem, 2016 Hope for Children of Trauma An International Perspective synthesizes all the existing evidence policy and practice from around the world for children and youth who have experienced different forms of complex trauma such as abuse neglect and war violence and also presents a real advance in the literature by covering new material from the author s extensive visits and collaborations in low and middle income countries in Asia Africa and Latin America The book covers a historical and research overview of developments in trauma and child mental health global policy and evidence on the impact of trauma on child mental health In particular this book communicates real experiences through narratives and supporting photographic material from children in slum areas orphanages or on the streets and explores the application of therapeutic approaches by frontline practitioners therapeutic interventions service development and training programmes

Integral Economics Ronnie Lessem, Alexander Schieffer, 2016-05-23 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In Integral Economics Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos

the philosophical principles and the mathematical models that influence events Integral Economics is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework

Integral Polity Ronnie Lessem,Ibrahim Abouleish,Louis Herman,2016-05-23 Releasing the genius of an individual an enterprise and a society is a central pre occupation of the contemporary business environment A fascinating approach to how we can begin to tackle this challenge is presented by the authors of Integral Polity Integral spirituality integral philosophy and the integral age at an overall or holistic level of consciousness has therefore become a strong enough idea to form the genesis of a movement over the course of the last half century Taking as a starting point the ground breaking work of the Trans4m Centre for Integral Development this book applies such an integral notion to the realms of business economics and enterprise To be successful an integral approach must recognise the nuances of its environment an integral approach in India is different from that in Indonesia or Iceland and they may in fact complement rather than conflict Therefore this book also provides a fascinating alignment of such integrality with and between different southern and eastern northern and western worlds Using case studies ranging across the globe this review of a newly integral theory and practice provides a new lease of life to what may increasingly be perceived as the self seeking insulated and occasionally violent and corrupt realm of the political

Buddhism Kevin Trainor,2004 In this strikingly illustrated and authoritative volume readers have an introduction to one of the world s greatest living faiths 200 color photos maps drawings

Rethinking Karma Jonathan S. Watts,2009 What is a Buddhist response to political oppression and economic exploitation Does Buddhism encourage passivity and victimization Can violent perpetrators be brought to justice without anger and retributive punishment What does Buddhism say or imply about collective karma and social justice Rethinking Karma addresses these questions and many more through the lens of the Buddhist teachings on karma Acknowledging that a skewed understanding of karma serves to perpetuate structural and cultural violence specifically in the Buddhist societies of South and Southeast Asia the book critically reexamines the teachings on karma as well as important related teachings on equanimity upekkha generosity dana and merit punna The eleven authors featured in this volume are thinker activists who have been deeply involved in issues of social justice at a grassroots level and speak from their own experience in trying to solve them For them these issues are seminal ones requiring deeper contemplation and greater sharing not only within the Buddhist community at large but among all those who seek to bridge the gaps between our idealization of human harmony our tendencies toward violent confrontation and the need for greater social justice
