Budgeting Aaron B. Wildavsky, 1986-01-01 In this completely revised edition of his classic work Aaron Wildavsky collects in one place the existing knowledge on budgeting Realistic budgets are an expression of practical politics Budgeting is so basic it reveals the norms by which men live in a particular political culture In dealing directly with the universe of governmental activity Wildavsky uses reliable accounts of how budgeting is carried on to capture a great deal of national political life The focus is explicitly comparative After developing a general theory of budgeting he analyzes four rich countries Britain France Japan and the United States followed by poor countries American cities and American states Wildavsky uses this analysis to develop and apply a cultural theory of budgeting explaining the degree of balance between revenue and expenditure why government grows in all industrial democracies and why there are still different rates of growth in spending He offers a critical evaluation of the first edition linking the ability of nations to make history and the various strategies of change they adopt to explain a wider range of budgetary processes

Toward Next-Generation Performance Budgeting Donald Moynihan, Ivor Beazley, 2016-11-14 Toward Next Generation Performance Budgeting Lessons from the Experiences of Seven Reforming Countries analyzes the difficulties that national governments have had in linking measurement of performance and results to the annual budget process The book is based on intensive reviews of four advanced countries that were early reformers and three pioneers in Central and Eastern Europe In addition to looking at their current systems Toward Next Generation Performance Budgeting looks at how their approaches have evolved over time This book attempts to fill a gap between survey based self assessments and best practice guides It was compiled in response to the concerns of budget departments in countries in Eastern Europe and Central Asia many of which are committed to adopting some form of performance based budgeting and are seeking to learn from the experiences of previous reformers what the practical challenges are and how they can adapt best practice approaches to a messy reality The case studies demonstrate a general pattern of disappointment with the results of performance budgeting balanced by a strong belief in the underlying logic which has resulted in repeated efforts to modify approaches to tighten the links between budgeting and performance These efforts have resulted in significant variation in how countries have implemented performance budgeting and in the benefits they have derived These variations offer guidance for models of next generation performance budgeting avoiding classic pitfalls and incorporating modifications introduced by those who have used it longest and found it useful
