Buffalo Shield:

Native North American Armor, Shields, and Fortifications David E. Jones, 2010-01-01 The first systematic comparative study of the defensive armor and fortifications of aboriginal Native Americans From the Chickasaw fighting the Choctaw in the Southeast to the Sioux battling the Cheyenne on the Great Plains warfare was endemic among the North American Indians when Europeans first arrived on this continent An impressive array of offensive weaponry and battle tactics gave rise to an equally impressive range of defensive technology Native Americans constructed very effective armor and shields using wood bone and leather Their fortifications ranged from simple refuges to walled and moated stockades to multiple stockades linked in strategic defensive networks In this book David E Jones offers the first systematic comparative study of the defensive armor and fortifications of aboriginal Native Americans Drawing data from ethnohistorical accounts and archaeological evidence he surveys the use of armor shields and fortifications both before European contact and during the historic period by American Indians from the Southeast to the Northwest Coast from the Northeast Woodlands to the desert Southwest and from the Sub Arctic to the Great Plains Jones also demonstrates the sociocultural factors that affected warfare and shaped the development of different types of armor and fortifications Extensive eyewitness descriptions of warfare armor and fortifications as well as photos and sketches of Indian armor from museum collections add a visual dimension to the text This succinct book is well written and systematically organized and it will serve as the starting point for any future studies on the subject Military History of the West This book provides the first and only comprehensive survey of armor shields and fortifications of American Indians It has left me with a new appreciation for the sheer diversity of warfare armor and fortifications used by Native Americans and it shatters stereotypes about the nature of aboriginal warfare Wayne Van Horne associate professor of Anthropology Kennesaw State University

Some Protective Designs of the Dakota Clark Wissler, 2022-07-20 In *Some Protective Designs of the Dakota* Clark Wissler meticulously explores the rich tapestry of Dakota culture through the lens of their symbolic protective designs Employing a combination of ethnographic detail and artistic analysis Wissler invites readers into the world of Dakota spiritual beliefs art and their connection to the natural and supernatural realms The book is a product of early 20th century anthropology contributing to the understanding of Native American art as a vital expression of identity spirituality and resistance against cultural erasure Utilizing both descriptive and analytical styles Wissler s work stands as a testament to the intricate relationship between indigenous artistry and cultural preservation Clark Wissler was an influential American anthropologist whose extensive fieldwork among Native American tribes significantly shaped the study of indigenous cultures His experiences and observations particularly prior to the acceleration of modernization enabled him to capture the complexities

and subtleties of Dakota life Wissler's scholarly pursuits were deeply rooted in a desire to document and respect these cultural narratives at a time when they faced substantial threats from colonial expansion and assimilation I highly recommend *Some Protective Designs of the Dakota* to readers interested in anthropology indigenous studies and the art of cultural resistance Wissler's insightful analysis and passionate dedication to his subject will not only illuminate the richness of Dakota designs but also encourage reflection on the broader implications of cultural identity and preservation
