Buffalo Chips:

Ron Stephenson, 2007-05-01 *Black Cloud Rising* is about Alex Hunter who is a former FBI agent who has a microchip implanted in his head that is connected to a mainframe computer called Michelangelo. With a direct connection to the computer, he is able to do things a normal person can't do. Valuable antiques began to disappear around the world, and a special investigator for the FBI, Linda Lovely, who went to the FBI Academy with Alex Hunter, enlists his help to solve the problem. Linda Lovely enters Alex Hunter's world of technology that is far beyond what anyone else in the world has. While trying to get Alex Hunter to help, a Senator Norris disappears at a skiing lodge in Aspen, Colorado. Alex takes Linda to Aspen, Colorado, to his Aspen facility in a way she has never traveled before. Alex Hunter is more interested in Linda Lovely than in helping the FBI. He agrees to help her because of his interest in her. Nancy Robinson is an investigator for all American Insurance Company and is sent to Aspen, Colorado, to help find Senator Norris because of the life insurance policy they have on him. Strange things happen around Nancy Robinson, and if you're not careful, you could get hurt. There are people in this world who have a black cloud over their head, and Nancy is one of them. With her roommate Candice Davis, a fiery redhead who likes kinky sex, they head for Aspen, Colorado, where they meet up with Alex Hunter and Linda Lovely. For some reason, while Nancy Robinson is around Alex Hunter, the black cloud disappears, but as soon as he is gone, trouble begins. The story travels through several cities and countries around the world. This science fiction story may even explain what flying saucers are.

Encyclopedia of the Great Plains David J. Wishart, 2004-01-01 Wishart and the staff of the Center for Great Plains Studies have compiled a wide-ranging, un-intended encyclopedia of this important region. Their objective was to give definition to a region that has traditionally been poorly defined, and they have.

Hard Road West Keith Heyer Meldahl, 2020-03-04 The dramatic journeys of the 19th century Gold Rush come to life in this geologist's tour of the American West and the events that shaped the land. In 1848, news of the discovery of gold in California triggered an enormous wave of emigration toward the Pacific. The dramatic terrain these settlers crossed is so familiar to us now that it is hard to imagine how frightening even godforsaken, sheer rock faces and barren deserts once seemed to them. *Hard Road West* brings their perspective vividly to life, weaving together the epic overland journey of the covered wagon, trains, and the compelling story of the landscape they encountered. Taking readers along the 2,000-mile California Trail, Keith Meldahl uses settler's diaries and letters as well as his own experiences on the trail to reveal how the geology and geography of the West shaped our nation's westward expansion. He guides us through a landscape of sawtooth mountains, following the meager streams that served as lifelines through an arid land all the way to California itself, where colliding tectonic plates created breathtaking scenery and planted the gold that lured travelers west in the first place. Alternates seamlessly between vivid accounts of the 19th century journey and lucid explanations of the geological events that shaped the landscape. *Library Journal*
