In depth intense insightful For more than a decade radical science fiction author and activist journalist Terry Bisson interviewed some of the most provocative and outspoken authors of the twentieth and twenty first centuries Anarchism sexuality creativity and the future of humanity itself no topic was taboo Bisson s prankster spirit also shone through as he quizzed his subjects about what cars they drove played free association games and created an atmosphere of two old friends having intimate late night chats Collected from PM Press s award winning Outspoken Authors series for the first time The Outspoken and the Incendiary showcases insightful and long form explorations into the lives and minds of some of today s most politically charged fiction writers PM s Outspoken Authors series looks almost like a science fiction Who s Who or Hall of Fame except that I included myself Because I could Terry Bisson Words and Thoughts By Eleanor Arnason Terry Bisson Michael Blumlein John Crowley Samuel R Delany Cory Doctorow Meg Elison Karen Joy Fowler Eileen Gunn Elizabeth Hand Cara Hoffman Nalo Hopkinson James Patrick Kelly John Kessel Paul Krassner Joe R Lansdale Jonathan Lethem Ursula K Le Guin Ken MacLeod Nick Mamatas Michael Moorcock Paul Park Gary Phillips Marge Piercy Rachel Pollack Rudy Rucker Kim Stanley Robinson Carter Scholz Nisi Shawl John Shirley Vandana Singh and Norman Spinrad with additional new contributions by Nalo Hopkinson Jonathan Lethem Nisi Shawl Peter Coyote and Rudy Rucker **Dangerous Visions and New Worlds** Andrew Nette, Iain McIntyre, 2021-10-26 Much has been written about the long Sixties the era of the late 1950s through the early 1970s It was a period of major social change most graphically illustrated by the emergence of liberatory and resistance movements focused on inequalities of class race gender sexuality and beyond whose challenge represented a major shock to the political and social status quo With its focus on speculation alternate worlds and the future science fiction became an ideal vessel for this upsurge of radical protest Dangerous Visions and New Worlds Radical Science Fiction 1950 to 1985 details celebrates and evaluates how science fiction novels and authors depicted interacted with and were inspired by these cultural and political movements in America and Great Britain It starts with progressive authors who rose to prominence in the conservative 1950s challenging the so called Golden Age of science fiction and its linear narratives of technological breakthroughs and space conquering male heroes The book then moves through the 1960s when writers including those in what has been termed the New Wave shattered existing writing conventions and incorporated contemporary themes such as modern mass media culture corporate control growing state surveillance the Vietnam War and

rising currents of counterculture ecological awareness feminism sexual liberation and Black Power The 1970s when the genre reflected the end of various dreams of the long Sixties and the faltering of the postwar boom is also explored along with the first half of the 1980s which gave rise to new subgenres such as cyberpunk Dangerous Visions and New Worlds contains over twenty chapters written by contemporary authors and critics and hundreds of full color cover images including thirteen thematically organised cover selections New perspectives on key novels and authors such as Octavia Butler Ursula K Le Guin Philip K Dick John Wyndham Samuel Delany J G Ballard John Brunner Judith Merrill Barry Malzberg Joanna Russ and many others are presented alongside excavations of topics works and writers who have been largely forgotten or undeservedly ignored

An Experiment in Autobiography , Raising Hell Norman Spinrad, 2014-07-01 As an ambitious alienated and awesomely talented kid from the Bronx Norman Spinrad rode the revolutionary New Wave of 1960s science fiction to fame if not fortune His usually angry often hilarious and always radical novels changed the field forever Once devoted to interplanetary adventure SF began to explore the uneasy intersection between today's illusions and tomorrow's dystopian disasters It grew dark grew wild grew up An all new novella designed to take a poke at both Christian fundamentalists and corporate CEOs Raising Hell is a rousing account of the fight to improve working conditions in Hell for both demons and the damned with the help of such deceased immortals as Jimmy Hoffa John L Lewis and Cesar Chavez Plus The Abnormal New Normal an impolite inquiry into today's high finance low jinks which unmasks the manipulations of the 1% and proposes a radical fix And Featuring our Outspoken Interview the usual mix of intimate revelation gossip and tales from the front lines of writing and publishing

After Human Thomas Connolly, 2021-04-01 Shortlisted for the British Fantasy Awards Non Fiction 2022 Shortlisted for the Locus Science Fiction Foundation Non Fiction Award 2022 SF has long been understood as a literature of radical potential capable of imagining entirely new worlds and ways of being Yet SF has been slow to embrace posthumanist ideas about the human subject The human of the SF tradition is instead a liminal being caught somewhere between the transcendent Man of classical humanism and the subversive cyborg of posthumanist thought This study offers a critical history of the human in SF By examining a range of SF works from 1818 to the 1970s it seeks to answer some key questions What role does technology play in defining what it means to be or not to be human How do these writers understand the relationship between humanity and the rest of nature And how can we use SF to re-examine our ethical position towards the non-human world and move to more egalitarian understandings of the human subject

A Critic at Large in the Multiverse , Fights of Fancy George Edgar Slusser, Eric S. Rabkin, 1993 This collection of fifteen original essays offers new perspectives on armed conflict as a central aspect of science fiction and fantasy writing Looking past the superficial conventions associated with ray guns and aliens swords and sorcerers the contributors show how writers in the genre today are not so much imagining war more fully as they are completely re-imagining it Science fiction and fantasy writing is no longer mired in epic or chivalric models but is responding to new and more complex real world

motivations for armed aggression advances in weaponry shifts in the theaters of war and changes in battlefield conditions Most of the papers were presented at the annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field's most prestigious international gathering The trend throughout the book is away from critical interest in stories of spatial or territorial conquest and toward works that deal with topics related to wars of temporal logistics and the internationalization of the combat zone including urban street violence gender conflicts and resistance to runaway technology The essays range from studies of the semantics and linguistics of warfare in science fiction to a critique of Osip Senkovsky's *Fantastic Journeys of Baron Brambeus* from writer Joe Haldeman's assessment of the impact of his Vietnam experiences on his fiction to inquiries into a shared author reader agenda in novels concerning potential mass destruction including Stephen King's *Dead Zone* and M J Engh's *Arslan* The collection also charts new directions in writing such as the anti-apocalyptic science fiction of Samuel R Delany and embraces new modes of presentation particularly computer animation and the bande dessinée or illustrated narrative as exemplified by French novelist Phillippe Druillet's *La Nuit* Musician Bob Marley film actor directors Sylvester Stallone and Bruce Lee and the cyberpunk film classics *Terminator* and the *Road Warrior* series are among other topics discussed Together the essays reinforce the editors contention that the true function of these fantasies and science fictions is neither nostalgia nor fancy but analysis The contributors treat the texts they examine as a means not of playing war games but of understanding the role of war in the present and the future

Macroscope Piers Anthony, 2003 Throughout history man has been searching for better ways to gather information about his universe But although they may have longed for it not even the most brilliant minds could conceive of a device as infinitely powerful or as immeasurably precise as the *Macroscope* until the twenty first century This is a story of man's desperate search for a compromise between his mind and his heart between knowledge and humanity *The Country You Have Never Seen* Joanna Russ, 2007 In 1959 at the age of 22 Joanna Russ published her first science fiction story *Nor Custom Stale* in *The Magazine of Science Fiction and Fantasy* In the forty five years since Russ has continued to write some of the most popular creative and important novels and stories in science fiction She was a central figure along with contemporaries Ursula K Le Guin and James Tiptree in revolutionizing science fiction in the 1960s and 1970s and her 1970 novel *The Female Man* is widely regarded as one of the most successful and influential depictions of a feminist utopia in the entire genre *The Country You Have Never Seen* gathers Joanna Russ's most important essays and reviews revealing the vital part she played over the years in the never ending conversation among writers and fans about the roles boundaries and potential of science fiction Spanning her entire career the collection shines a light on Russ's role in the development of new wave science fiction and feminist science fiction while at the same time providing fascinating insight into her own development as a writer

Brave New Words Jeff Prucher, 2007-05-07 Winner of a 2008 Hugo Award this new paperback takes readers on a spectacular tour of the language created by science fiction From *Stargate* to *Force Field* this dictionary opens a fascinating

window into an entire genre through the words invented by science fiction's most talented writers, critics and fans. Each entry includes numerous citations of the word's usage from the earliest known appearance forward. Drawn not only from science fiction novels and stories, citations also come from fanzines, screenplays, comics, songs, and the Internet.

The Routledge Concise History of Science Fiction Mark Bould, Sherryl Vint, 2011-02-23 The Routledge Concise History of Science Fiction provides students with an accessible overview of the genre that explores how it emerged through competing multifarious versions and the struggle to define its limits. Discussing the place of key works and looking forward to the future of the genre, this book is the ideal starting point for students and all those seeking a better understanding of science fiction.

Science Fiction: A Guide for the Perplexed Sherryl Vint, 2014-03-13 From its beginnings in the works of H. G. Wells and Jules Verne to the virtual worlds of William Gibson's *Neuromancer* and *The Matrix*, *Science Fiction: A Guide for the Perplexed* helps students navigate the often perplexing worlds of a perennially popular genre. Drawing on literature as well as example from film and television, the book explores the different answers that criticism has offered to the vexed question: what is science fiction? Each chapter of the book includes case studies of key texts, annotated guides to further reading, and suggestions for class discussion to help students master the full range of contemporary critical approaches to the field, including the scientific, technological, and political contexts in which the genre has flourished. Ranging from an understanding of the genre through the stereotypes of 1930s pulps through more recent claims that we are living in a science fictional moment, this volume will provide a comprehensive overview of this diverse and fascinating genre.

[All the Wonder that Would Be](#) Stephen Webb, 2017-05-03 It has been argued that science fiction (SF) gives a kind of weather forecast, not the telling of a fortune, but rather the rough feeling of what the future might be like. The intention in this book is to consider some of these bygone forecasts made by SF and to use this as a prism through which to view current developments in science and technology. In each of the ten main chapters, dealing in turn with antigravity, space travel, aliens, time travel, the nature of reality, invisibility, robots, means of transportation, augmentation of the human body, and last but not least, mad scientists, common assumptions once made by the SF community about how the future would turn out are compared with our modern understanding of various scientific phenomena and, in some cases, with the industrial scaling of computational and technological breakthroughs. A further intention is to explain how the predictions and expectations of SF were rooted in the scientific orthodoxy of their day and use this to explore how our scientific understanding of various topics has developed over time, as well as to demonstrate how the ideas popularized in SF subsequently influenced working scientists. Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester, Stephen Webb has worked in a variety of universities in the UK. He is a regular contributor to the *Yearbook of Astronomy* series and has published an undergraduate textbook on distance determination in astronomy and cosmology, as well as several popular science books.
