Sample Book Insights 1 The period between 1890 and 1930 was a pivotal time for the future of the world All notions of Biblical inerrancy and historical accuracy had been discarded by the intellectual elite Radical new inventions created by scientists and engineers were revolutionizing both the physical and social world 2 The French philosopher Auguste Comte was the founder of Positivism a philosophy that was very popular in the late 1800s Positivism claimed that only scientific knowledge was authentic and discarded all notions of absolute truth based on the Bible or metaphysical truth based on man s imaginations 3 Scientism takes Positivism to an extreme by claiming that science alone can produce truth about the world and reality It rejects all philosophical religious and metaphysical claims to understand reality since the truth it portends cannot be validated by the Scientific Method 4 The philosophy of Darwinism grew out of Charles Darwin s book The Origin of Species which proposed that all life naturally evolved over long periods of time from the most simple creature to the most complex It specifically rejected the Biblical account of creation and in general all thoughts of intelligent design

Unequal Partners Sidney Weintraub,2010-03-28 Since Mexico s defeat in the Mexican American War of the 1840s the United States has dominated Mexico economically militarily and politically This long history of asymmetry has created a Mexican distaste for American arrogance and an American vision of Mexico as its backyard and has damaged political negotiations trade pacts and capital flows as suspicions and protectionism have undermined diplomacy Despite this the two nations remain joined at the hip more than 80 percent of Mexico s exports are to

the United States and the majority of foreign investment in Mexico comes from America In Unequal Partners Sidney Weintraub examines the current relationship of Mexico and the United States as one of sustained dependence and dominance The chapters examine the consequences of this imbalance in six major policy areas trade investment and finance narcotics energy migration and the border The book begins in 1954 when the Mexican growth miracle was at its apex and proceeds to the present Special attention is paid to the post 1982 debt crisis era when Mexico began a more outward looking trade policy As this study reveals Mexico has often been its own worst enemy in foreign relations Over the past thirty years the country has been plagued by debt currency fluctuations tax collection problems political corruption and state controlled business monopolies that block foreign investment and importation These factors have created an environment of instability damaged outside perceptions and weakened Mexico's bargaining position Weintraub considers future policy changes that would help Mexico to level the playing field Improving the education system he argues will benefit nearly every other activity and institution and opening the oil market to private investment and technology will help develop deep water drilling and revitalize this significant export commodity In foreign relations Mexico must be assertive as it has been in easing U S restrictions on goods traded through NAFTA and demanding U S aid to fight drug cartels not passive as it currently is on U S anti immigration policy and the proposed border wall Perhaps most importantly the study points to the deeper development of policies that are proactive and outward looking

Making North America James A. Thompson, 2014-02-05 Much has been written about the trilateral relationship between Canada the United States and Mexico and the free trade agreements that this relationship has spawned In Making North America James Thompson uses the Canada US Free Trade Agreement of 1988 and the North American Free Trade Agreement of 1994 to demonstrate that there has been an often unrecognized impulse behind the process of North American integration national security Featuring interviews with key decision makers from all three countries including Brian Mulroney George H W Bush and Carlos Salinas Making North America is a rigorous analysis of the role national security has played in North American integration Furthermore Thompson's evidence suggests that the processes at work in North America are part of a global phenomenon where regions are progressively coalescing into larger scale political entities
