Crafting State-Nations Alfred Stepan, Juan J. Linz, Yogendra Yadav, 2011-03-31 Political wisdom

holds that the political boundaries of a state necessarily coincide with a nation's perceived cultural boundaries. Today the sociocultural diversity of many polities renders this understanding obsolete. This volume provides the framework for the state nation, a new paradigm that addresses the need within democratic nations to accommodate distinct ethnic and cultural groups within a country while maintaining national political coherence. First introduced briefly in 1996 by Alfred Stepan and Juan J. Linz, the state nation is a country with significant multicultural even multinational components that engenders strong identification and loyalty from its citizens. Here Indian political scholar Yogendra Yadav joins Stepan and Linz to outline and develop the concept further. The core of the book documents how state nation policies have helped craft multiple but complementary identities in India in contrast to nation state policies in Sri Lanka which contributed to polarized and warring identities. The authors support their argument with the results of some of the largest and most original surveys ever designed and employed for comparative political research. They include a chapter discussing why the U.S. constitutional model often seen as the preferred template for all the world's federations would have been particularly inappropriate for crafting democracy in politically robust multinational countries such as India or Spain. To expand the repertoire of how even unitary states can respond to territorially concentrated minorities with some secessionist desires, the authors develop a revised theory of federacy and show how such a formula helped craft the recent peace agreement in Aceh, Indonesia. Empirically thorough and conceptually clear, *Crafting State Nations* will have a substantial impact on the study of comparative political institutions and the conception and understanding of nationalism and democracy.

Politics in Austria Richard Luther, Wolfgang C. Mueller, 2014-04-08. First Published in 1992. This is a collection of eight articles looking at consociationalism in the Austrian political system. Areas covered are the decline of the Lager Mentalität parties and the party system, governmental institutions, changing priorities in Austrian economic policy, Austria in the European arena, and the success of consociationalism.

The Ambivalence of Identity Peter Thaler, 2001

The *Ambivalence of Identity* examines nation building in Austria and uses the Austrian experience to explore the conceptual foundations of nationhood. Traditionally, Hapsburg Austria has provided the background for these works. In the course of this study, it should become clear that Republican Austria is as valuable in understanding national identity as its monarchic predecessor. Historical interpretations of Austrian nation building give the Austrian experience special relevance for the larger debate about the nature of history. Such aspects in the analysis of the post-war Austrian nation building are the role of consciousness during the building process, the role of neighboring countries, and the role of World War II.

Austria today offers the picture of a small neutral and economically successful country in the heart of Europe Yet modern Austria is the product of a complex and violent history After the First World War Vienna changed overnight from being the capital of a large continental and multi ethnic Empire to being an alpine Republic surrounded by larger states This study examines Austria's transition from a major power and multi ethnic Empire to a militarily marginalised alpine Republic and asks how those often sudden and violent changes including two world wars and one civil war in the twentieth century have been reflected in the way Austrians have perceived themselves Whilst many studies map out the political events this study places special emphasis on the language used by Austrians as they struggled to define themselves **World History** Steven
