Patricia DeMarco, Guy DeMarco

Building Architectural Models:

Model Making for Architects Matt Driscoll, 2013-06-30 Model making is a beautiful and skilful craft and architectural model making is a vital part of the building process The architectural model is often the first time that a building is visualized in 3D It can capture the excitement of the architect's vision but can also reveal unforeseen difficulties Model Making for Architects explains the role of the model within the architectural and planning process It advises on the many ways of representing a building and the many techniques of making a model With practical instruction throughout it is an invaluable tool both for the model maker and for the architect seeking to commission a model of their building With contributions from leading practitioners case studies on multi million pound projects and step by step exercises this new book provides a unique insight into the process of architectural model making and looks at the new technology and opportunities available to the model maker What and who is an architectural model for What type of model should be used and when What scale is most appropriate These questions are answered in this new book which provides a unique insight into the process of architectural model making Illustrated with examples of top models of multi million pound projects Will be invaluable for architectural model makers architects surveyors and interior designers Superbly illustrated with 227 colour photographs Matt Driscoll is the founding director of Base Models renowned for creating beautiful yet practical architectural models

Building Architectural Models Patricia DeMarco, Guy DeMarco, 2000 This book is a primer for the design construction and presentation of the three dimensional model from conceptual drawings Ideal for use inside or outside the classroom the process begins with the construction of a cube and tetrahedron and moves on to encompass manufactured modules a commercial building a single story house and a city rowhouse Landscaping and presentation details are also provided to make your creations look their absolute best

Architecture and Modelbuilding Alexander Schilling, 2018-09-10 Architectural models are used at various stages of a project As working models they support the design process they are made up from time to time using simple materials such as cardboard without any attempt at accuracy and continue to be adjusted and added to as the ideas and the design progress The point here is to swiftly check a design idea to allow it to be continued or dismissed Presentational models are more involved at this stage the design has been completed and the purpose of the model is to convey the ideas to the potential user in a clear and easy to understand way The book Architecture and Model Building includes outstanding examples explaining the possibilities of this medium and at the same time provides comprehensive information on materials and techniques

Architectural Models Wolfgang Knoll, Martin Hechinger, 2007-12-15 Architects models serve as bridge between an idea and its realization Models are one of the three means by which an architect invents and develops his design sketch model computer model No other representational form is as effective in enabling the viewer to perceive the spaces shapes surfaces and textures created by the architect's design it is therefore a prerequisite in the design process Architectural Models provides clear and comprehensible instruction explaining

how design ideas can be skillfully translated into models Some 200 black and white illustrations and new to this edition more than 40 extraordinary full color photographs provide a comprehensive visual explication of the text In this completely revised edition the authors convey practical basics and offer a wealth of innovative and valuable suggestions for students of architecture or graphic arts as well as for experienced architectural model makers

Architectural and Industrial Scale Model Building Graham Day Pattinson,1982 *Architecture's Model Environments* Lisa Moffitt,2023-02-20 Seen through the distilling lens of the architectural model *Architecture's Model Environments* is a novel and far reaching exploration of the many dialogues buildings have with their environmental surroundings Expanding on histories of building technology the book sheds new light on how physical models conventionally understood as engineering experimentation devices enable architectural design speculation The book begins with a catalogue of ten original model prototypes of wind tunnels water tables and filling boxes and is the first of its kind to establish an architectural approach to fabricating such environmental models Subsequent chapters feature three precedent models that have been largely overlooked within the wider oeuvres of their authors French polymath tienne Jules Marey's 1900 2 wind tunnels Hungarian American architects Victor and Alad r Olgyay's 1955 63 thermoheliodon and Scottish chemist and building ventilation expert David Boswell The Ventilator Reid's 1844 test tube convection experiments Moving between historic moments and the present day between case studies and original prototypes the book reveals the potent ability for models as both physical artefacts and mental ideals to reflect prevailing cultural views about the world and to even reshape those views Fundamentally *Architecture's Model Environments* illustrates how environmental models reveal design insights across scales from the seam that leaks to the body that feels to the building that mediates to the world that immerses

The Architectural Model Matthew Mindrup,2019-10-08 An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect's muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model's development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti's dictum that models be simple lest they distract from the architect's ideas analyzing

the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup's histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways

Worldmodelling Mark Morris, Mike Aling, 2021-05-07 In light of current developments in modelling and with the aim of reinvigorating debates around the potentiality of the architectural model its philosophies technologies and futures this issue of AD examines how the model has developed to become an immersive worldbuilding machine Worldbuilding is the creation of imaginary worlds through forms of cultural production Although this discourse began with an analysis of imaginary places constructed in works of literature it has evolved to encompass worlds from fields such as cinema games design landscape urbanism and architecture Worldbuilding differs from the notion of worldmaking which deals with how speculative thinking can influence the construction of the phenomenal world As architects postulate ever increasingly complex world models from which to draw inspiration and inform their practice questions of scale representation and collaboration emerge Discussed through a range of articles from acclaimed international contributors in the fields of both architecture and media studies this issue explores how the architectural model is situated between concepts of worldbuilding and worldmaking in the creative space of worldmodelling Contributors Kathy Battista Thea Brejzek and Lawrence Wallen Pascal Bronner and Thomas Hillier Mark Cousins James A Craig and Matt Ozga Lawn Kate Davies Ryan Dillon Christian Hubert Chad Randl Theodore Spyropoulos and Mark JP Wolf Featured architects Phil Ayres FleaFolly Architects Minimaforms and Stasus

Architectural Model as Machine Albert Smith, 2007-03-30 This book offers an explanation of why scale models are important to the design process Albert Smith takes the reader through the history and significance of models in architecture from the magic of the Egyptian scale model to the present day Through this description of the relationship between architecture and the scale model Smith demonstrates the most effective process between concept and machine between the idea and the final building The great value of this book is to reveal the nature of the scale model and to unlock the tremendous potential of this design tool as a thinking and communicative advice His chronological analysis goes on from Egypt through Rome to the relationship between the Greek paradigm scale model and then on to Medieval and Renaissance models It concludes with the models of the Spanish architect Antonio Gaudi the Russian Constructivists the American architect Louis Khan and finally looks at the role of scale models in the present day through the work of the Polish American architect Daniel Libeskind and the American Frank Gehry

The Ecology of the Architectural Model Nick Dunn, 2007 For architectural educators models are not only as near to a realised building as one can get but for their students they are the means by which architecture itself its processes concepts strategies and tactics are learned This book describes the environment of architectural models in an educational context
