The Mirage of China Xin Liu, 2009 Today's world is one marked by the signs of digital capitalism and global capitalist expansion and China is increasingly being integrated into this global system of production and consumption As a result China's immediate material impact is now felt almost everywhere in the world however the significance and process of this integration is far from understood This study shows how the a priori categories of statistical reasoning came to be re born and re lived in the People's Republic as essential conditions for the possibility of a new mode of knowledge and governance From the ruins of the Maoist revolution China has risen through a mode of quantitative self objectification As the author argues an epistemological rift has separated the Maoist years from the present age of the People's Republic which appears on the global stage as a mirage This study is an ethnographic investigation of concepts of the conceptual forces that have produced and been produced by two forms of knowledge life and governance As the author shows the world of China contrary to the common view is not the Chinese world it is a symptomatic moment of our world at the present time

Red Legacies in China Jie Li, Enhua Zhang, 2020-10-26 What has contemporary China inherited from

its revolutionary past How do the realities and memories aesthetics and practices of the Mao era still reverberate in the post Mao cultural landscape The essays in this volume propose red legacies as a new critical framework from which to examine the profusion of cultural productions and afterlives of the communist revolution in order to understand China s continuities and transformations from socialism to postsocialism Organized into five parts red foundations red icons red classics red bodies and red shadows the book s interdisciplinary contributions focus on visual and performing arts literature and film language and thought architecture museums and memorials Mediating at once unfulfilled ideals and unmourned ghosts across generations red cultural legacies suggest both inheritance and debt and can be mobilized to support as well as to critique the status quo

Crime Control as Industry Nils Christie, 2000 Christie argues that crime control rather than crime itself is the real danger for our future He documents the forces driving the prison industry in Europe and the United States offering an explanation of increased incarceration rates in the 1980s and 1990s The growing use of prisons has paralleled two important social changes both with a potential for unrest the increasingly unequal distribution of wealth and restriction of access to well paid work Instead of attempting to deal with these problems through positive social changes developed countries have called on the crime control industry to deal with the consequences The desire for security stability and predictability among the more affluent elements of society has fuelled the willingness of politicians and policymakers to make huge investments in the crime control industry particularly its most costly feature prisons and jails The book shows how trends in the use of imprisonment have risen and fallen over time and it traces this to underlying societal values as to what is right and fair in the treatment of other human beings It is finally such values that will determine the limits societies will choose to impose on the crime control industry Thoughts values and ethics not the drive for profit must ultimately determine the limits of control
