Building Cities in America Daniel Judah Elazar, 1987 What is the distinctive character of America's cities How have our metropolitan regions evolved since the Colonial period What effect will local politics have on the future of the American city These are the questions Daniel J Elazar addresses in this third volume of his highly acclaimed Cities of the Prairie trilogy Recognizing the growing alienation from local institutions on the part of city dwellers nation wide Elazar explains why the restoration of local attachments should be a matter of first priority Co published with Jerusalem Center for Public Affairs

The City: The city in global context Michael Pacione, 2002 American Studies Jack Salzman, 1990-05-25 This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988 There are more than 6 000 descriptive entries in a wide range of categories anthropology and folklore art and architecture history literature music political science popular culture psychology religion science and technology and sociology *A Fragile Capital* Charles Chester Cole, 2001 Overall the book is organized by topic including business politics education religion the arts transportation and the press Cole shows how Columbus residents reacted to and reflected the major political economic and social trends in the United States at the time In contrast to earlier accounts that focused primarily on the male white leadership this book tries to encompass all economic classes and ethnic and racial groups *Identifying Models of National Urban Agendas* Francesca Gelli, Matteo Basso, 2022-11-17 This book utilises comparative diachronic and synchronic analyses to investigate models of national urban agendas Encompassing cases from Europe North America South America and Asia it examines the changing global geography of national urban agendas since the second post war period The book demonstrates that whilst some discontinuities and differences exist between countries they each demonstrate a common systematic investment in urban policies that are considered as programmes of intervention and funding schemes for cities Furthermore in such programmes a political vision is evident which recognizes an important role for cities and urbanization processes at a national level The book will appeal to scholars and students of public policy urban planning and public administration as well as practitioners and policymakers at the national and local levels *Metropolitan Organization*, 1992 *American Capitals* Christian Montès, 2014-01-10 State capitals are an indelible part of the American psyche spatial representations of state power and national identity Learning them by heart is a rite of passage in grade school a pedagogical exercise that emphasizes the importance of committing place names to memory But geographers have yet to analyze state capitals in any depth In *American Capitals* Christian Montès takes us on a well

researched journey across America from Augusta to Sacramento Albany to Baton Rouge shedding light along the way on the historical circumstances that led to their appointment their success or failure and their evolution over time While all state capitals have a number of characteristics in common as symbols of the state as embodiments of political power and decision making as public spaces with private interests Mont s does not interpret them through a single lens in large part because of the differences in their spatial and historical evolutionary patterns Some have remained small while others have evolved into bustling metropolises and Mont s explores the dynamics of change and growth All but eleven state capitals were established in the nineteenth century thirty five before 1861 but rather astonishingly only eight of the fifty states have maintained their original capitals Despite their revered status as the most monumental and historical cities in America capitals come from surprisingly humble beginnings often plagued by instability conflict hostility and corruption Mont s reminds us of the period in which they came about an era of pioneer and idealized territorial vision coupled with a still evolving American citizenry and democracy

Building Toward Civil War Daniel Judah Elazar, 1992 In the years between 1846 and 1861 foundations were laid for new forms of political organization in the United States Unfortunately these foundations were not strong enough to prevent civil war Daniel Elazar one of the world's leading authorities on constitutional issues goes beyond the usual discussion of the southern slave economy and the northern disapproval of the slave trade to get to the root of the problem He describes a fast changing culture underpinning explosive political differences and examines the specific social political and economic changes that were occurring at the time changes that tore communities and families apart drove northern and southern states into conflict and eventually led the nation into a bloody civil war
