Clark,Abby McGehee,2016-12-05 This collection of essays presents the exciting and innovative work being done in the field of medieval architectural history by scholars affiliated with AVISTA one of the most active sponsors of such research in the Anglo American scholarly community These studies constitute a snapshot of the range of new interpretive strategies being deployed by researchers in the reassessment of previous scholarship and identification of new modes of inquiry In recent years the study of medieval architecture has been transformed by the emergence of new critical perspectives and new technologies The contributors to this book are among those at the forefront of these developments Several of the essays present dramatic reinterpretations of canonical monuments including the Abbey of Saint Denis Beauvais Cathedral and Notre Dame in Paris Others consider broader methodological issues such as the applications of geometry workshop practice and the shaping of historical narratives Still others demonstrate how high tech scanning and visualization methods can enhance our understanding of construction methods and the behavior of buildings The publication of this collection of pioneering essays should foster further exploration by clarifying the state of research by establishing specific historical arguments and by providing models of inquiry to inspire emerging scholars RACAR, Revue D'art Canadienne ,1990 **Disciplined Exuberance** Linda Elaine Neagley,2010-11-01 The Gothic Enterprise Robert A. Scott,2011-06-28 The great Gothic cathedrals of Europe are among the most astonishing achievements of Western culture Evoking feelings of awe and humility they make us want to understand what inspired the people who had the audacity to build them This engrossing book surveys an era that has fired the historical imagination for centuries In it Robert A Scott explores why medieval people built Gothic

cathedrals how they built them what conception of the divine lay behind their creation and how religious and secular leaders used cathedrals for social and political purposes As a traveler's companion or a rich source of knowledge for the armchair enthusiast *The Gothic Enterprise* helps us understand how ordinary people managed such tremendous feats of physical and creative energy at a time when technology was rudimentary famine and disease were rampant the climate was often harsh and communal life was unstable and incessantly violent While most books about Gothic cathedrals focus on a particular building or on the cathedrals of a specific region *The Gothic Enterprise* considers the idea of the cathedral as a humanly created space Scott discusses why an impoverished people would commit so many social and personal resources to building something so physically stupendous and what this says about their ideas of the sacred especially the vital role they ascribed to the divine as a protector against the dangers of everyday life Scott's narrative offers a wealth of fascinating details concerning daily life during medieval times The author describes the difficulties master builders faced in scheduling construction that wouldn't be completed during their own lifetimes how they managed without adequate numeric systems or paper on which to make detailed drawings and how climate natural disasters wars variations in the hours of daylight throughout the year and the celebration of holy days affected the pace and timing of work Scott also explains such things as the role of relics the quarrying and transporting of stone and the incessant conflict cathedral building projects caused within their communities Finally by drawing comparisons between Gothic cathedrals and other monumental building projects such as Stonehenge Scott expands our understanding of the human impulses that shape our landscape

Brunelleschi's Egg
Mary D. Garrard, 2010 Garrard one of a small handful of truly distinguished feminist art historians presents a detailed and visually convincing account of the relationship between nature and art in all its fraught and gendered cultural meaning from antiquity on Brunelleschi's Egg constitutes an exemplary feat of interdisciplinary study that requires no specialized theoretical baggage to follow and emulate Mieke Bal author of *Of What One Cannot Speak* Doris Salcedo's *Political Art* Mary Garrard's discerning eye and deep knowledge of Renaissance art informs this fascinating book She offers a sophisticated exploration of a rich artistic conversation on the relationship of nature and art describing the central role of gender in structuring artists' complex and changing attitudes toward nature Brunelleschi's Egg is so much more than a history of style it maps the changing mindsets of Renaissance society in the several centuries during which scientific developments gradually seized masculine authority relegating both art and nature to mastered femininity This book provides new perspective on Italian Renaissance masterworks it will be central to future discussion of Renaissance art Margaret R. Miles author of *A Complex Delight: The Secularization of the Breast 1350-1750* In this sweeping study the magnum opus of one of feminist art history's founding mothers Mary Garrard extends the gendered critique of art into the realms of philosophy and science psychology and myth Her eloquently prophetic and richly detailed synthesis chronicles western culture's increasing feminization of nature and art and its parallel masculinization of the human mind both male and female as a Renaissance

tragedy on an epic scale The book is a must read for historians of the early modern period with a theme also of urgent contemporary concern James M Saslow author of *Pictures and Passions A History of Homosexuality and Art* A completely new and thoroughly convincing way of looking at the major monuments of the Italian Renaissance The ideas in Brunelleschi's Egg are so compelling that it is hard to imagine a reader who would not be drawn into the analysis Jacqueline Marie Musacchio author of *Art Marriage and Family in the Italian Renaissance* Palace Garrard offers an unprecedented perspective on an amazing plethora of seminal works Written beautifully Brunelleschi's Egg is nothing but exemplary Yael Even University of Missouri St Louis

Medieval Urban Planning Mickey Abel, 2017-03-07 Broadly defined urban planning today is a process one might describe as half design and half social engineering It considers not only the aesthetic and visual product but also the economic political and social implications as well as the environmental impact This collection of essays explores the question of whether this sort of multifaceted planning took place in the Middle Ages and how it manifested itself outside of the monastic realm Bringing together the monastic historian and archaeologist with scholars of art and architecture this volume expands our comprehension of how those in roles of authority saw the planning process and implemented their plans to structure a particular outcome The examination of architectural complexes literary sources commercial ledgers and political records highlights the multiple avenues for viewing the growing awareness of the social potential of an urban environment

Early Gothic Column-Figure Sculpture in France Janet E. Snyder, 2017-07-05 Richly illustrated *Early Gothic Column-Figure Sculpture in France* is a comprehensive investigation of church portal sculpture installed between the 1130s and the 1170s At more than twenty great churches beginning at the Royal Abbey of Saint Denis and extending around Paris from Provins in the east south to Bourges and Dijon and west to Chartres and Angers larger than life-size statues of human figures were arranged along portal jambs many carved as if wearing the dress of the highest ranks of French society This study takes a close look at twelfth-century human figure sculpture describing represented clothing

defining the language of textiles and dress that would have been legible in the twelfth century and investigating rationale and significance The concepts conveyed through these extraordinary visual documents and the possible motivations of the patrons of portal programs with column figures are examined through contemporaneous historical textual and visual evidence in various media Appendices include analysis of sculpture production and the transportation and fabrication in limestone from Paris Janet Snyder's new study considers how patrons used sculpture to express and shape perceived reality employing images of textiles and clothing that had political economic and social significances *The Artful Mind* Mark Turner, 2006-10-26 All normal human beings alive in the last fifty thousand years appear to have possessed in Mark Turner's phrase irrepressibly artful minds Cognitively modern minds produced a staggering list of behavioral singularities science religion mathematics language advanced tool use decorative dress dance culture art that seems to indicate a mysterious and unexplained discontinuity between us and all other living things This brute fact gives rise to some tantalizing questions How did the artful mind emerge What are the basic mental operations that make art possible for us now and how do they operate These are the questions that occupy the distinguished contributors to this volume which emerged from a year long Getty funded research project hosted by the Center for Advanced Study in the Behavioral Sciences at Stanford These scholars bring to bear a range of disciplinary and cross disciplinary perspectives on the relationship between art broadly conceived the mind and the brain Together they hope to provide directions for a new field of research that can play a significant role in answering the great riddle of human singularity *The Gothic Screen* Jacqueline E. Jung, 2012-12-28 This book reveals how Gothic choir screens through both their architecture and sculpture were vital vehicles of communication and shapers of community within the Christian church *Masons, Tricksters and Cartographers* David Turnbull, 2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys **A Gothic Sermon** Stephen Murray, 2004-11-01 In this groundbreaking work Stephen Murray seizes a rare opportunity to explore the relationship between verbal and visual culture by presenting a sermon that may have been preached during the second half of the thirteenth century in or near the cathedral of Notre Dame of Amiens whose sculptural program was completed at about the same time In addition to providing a complete transcription and translation of the text Murray examines the historical context of the sermon and draws comparisons between its underlying structure and the Gothic portals of the cathedral In the sermon as in the cathedral he finds a powerful motivational mechanism that invites the repentant sinner to enter into a new contract with the Virgin Mary The correlation between elements of the sermon's text

and the sculptural components of the cathedral leads to an exploration of the socioeconomic conditions in Picardy at the time and a vivid sketch of how the cathedral and its images were used by ordinary people The author finds parallels in the rhetorical tools used in the sermon on the one hand and stylistic and compositional tools used in the sculpture on the other In addition to providing a fascinating and cogent consideration of medieval beliefs about salvation and redemption this book also lays the groundwork for a long overdue examination of the performative and textual in relationship to sculpture
