Design Process Hand-Sketching for Interiors by Rick Bartholomew, 2013. This book is designed to develop your student's hand sketching skills. The book will enhance your students' basic knowledge of drawing techniques they can use throughout the educational design process. A review of basic drawing types is discussed in Ideation. Chapters 2 through 4. The text is also intended to be a visual resource to aid design students. Various types of visual presentation techniques used to portray concepts are demonstrated. The practice of creating hand-sketched concept presentations is still viewed as an important design process and the building blocks prior to final CAD-generated documents. One course in hand drafting and/or sketching is not enough experience for the student learner; it must be fostered, developed, and practiced in subsequent coursework that enhances the design process. Hand sketching techniques for plans, elevations, sections, various 3-dimensional illustrations, millwork, and construction details are covered in the book. Also covered are important issues used in the initial design processes of bubble diagramming, block, and space plans. The topics of information graphics, delineations, and visual composition are addressed to enhance the visual communication of preliminary design concepts. Ideation. Chapter 10 is a

series of copyright free line drawings your students can use to explore skill building through practice exercises referenced within each chapter The book will be a valuable resource for each student s educational career as well as a refresher from time to time during their professional endeavors *Touring Hot Springs Arizona* Matt C.
