Armed Humanitarians Robert C. DiPrizio, 2002-09-27 Since the end of the Cold War the US military has found itself embroiled in many operations other than war most controversially in humanitarian interventions DiPrizio examines the factors that lay behind decisions to send in troops analyzing the decision making process and its constraints *Civil-Military Cooperation in Post-Conflict Operations* Christopher Ankersen, 2007-09-28 Civil Military Cooperation CIMIC is the relationship between militaries and humanitarians This book demonstrates the wide variety of national approaches to CIMIC activities introducing some theoretical and ethical considerations into a field that has largely been bereft of this type of debate *Motivations for Humanitarian intervention* Andreas Krieg, 2012-09-03 This Brief sheds light on the motivation of humanitarian intervention from a theoretical and empirical point of view An in depth analysis of the theoretical arguments surrounding the issue of a legitimate motivation for humanitarian intervention demonstrate to what extent either altruism or national self interests are considered a righteous stimulus The question about what constitutes a just intervention has been at the core of debates in Just War Theory for centuries In particular in regards to humanitarian intervention it is oftentimes difficult to define the criteria for a righteous intervention More than in conventional military interventions the motivation and intention behind humanitarian intervention is a crucial factor Whether the humanitarian intervention cases of the post Cold War era were driven by altruistic or by self interested considerations is a question is covered within and enables a comprehensive and holistic evaluation of the question of what motivates Western democracies to intervene or to abstain from intervention in humanitarian crises [The Prevention and Intervention of Genocide](#) Samuel Totten, 2011-12-31 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community s efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti genocide regime is examined in terms of progress in developing such

a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions

Understanding Victory and Defeat in Contemporary War Jan Angstrom,Isabelle Duyvesteyn,2006-12-05 Bringing together leading contributors in the field this new volume analyzes how victory and defeat in modern war can be understood and explained It does so by confronting two inter related research problems the nature of victory and defeat in modern war and the explanations of victory and defeat By first questioning the extent to which the concepts of victory and defeat are meaningful to describe the outcomes of modern wars and whether the contents of these concepts are changing it then evaluates different theories purporting to explain the outcomes of war and the impact of variables ranging from technology to culture The book tackles several key questions What is the definition of victory in the War on Terror What is the meaning of victory and defeat in contemporary insurgencies such as those in Iraq and Afghanistan Are the counterstrategies that were developed in the mid twentieth century valid in order to deal with present and future conflicts With case studies ranging from the Malayan Emergency to the current conflict in Iraq Understanding Victory and Defeat in Contemporary War will be of great interest to students of war and conflict studies security studies military history and international relations

Insurrection and Intervention Ned Dobos,2011-10-27 Domestic sovereignty the right of a government not to be resisted by its people and international sovereignty the moral immunity from outside intervention have both been eroded in recent years but the former to a much greater extent than the latter An oppressed people's right to fight for liberal democratic reforms in their own country is treated as axiomatic as the international responses to the revolutions in Tunisia Egypt and Libya illustrate But there is a reluctance to accept that foreign intervention is always justified in the same circumstances Ned Dobos assesses the moral cogency of this double standard and asks whether intervention can be consistently and coherently opposed given our attitudes towards other kinds of political violence His thought provoking book will interest a wide range of readers in political philosophy and international relations

The United Nations, Peace and Security Ramesh Thakur,2006-06-08 Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter state war In this book Ramesh Thakur examines the transformation in UN operations analysing its changing role and structure He asks why when and how force may be used and

argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US with its capacity to use force and project power and the UN as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics law and international relations departments as well as policymakers in the UN and other NGOs.

International and Regional Security Benjamin Miller, 2016-11-10. This volume is a collection of the best essays of Professor Benjamin Miller on the subjects of international and regional security. The book analyses the interrelationships between international politics and regional and national security with a special focus on the sources of international conflict and collaboration and the causes of war and peace. More specifically it explains the sources of intended and unintended great power conflict and collaboration. The book also accounts for the sources of regional war and peace by developing the concept of the state to nation balance. Thus the volume is able to explain the variations in the outcomes of great power interventions and the differences in the level and type of war and peace in different eras and various parts of the world. For example the book's model can account for recent outcomes such as the effects of the 2003 American intervention in Iraq the post 2011 Arab Spring and the conflicts between Russia and Ukraine. The book also provides a model for explaining the changes in American grand strategy with a special focus on accounting for the causes of the invasion of Iraq in 2003. Finally the book addresses the debate on the future of war and peace in the 21st century. This book will be essential reading for students of international security regional security Middle Eastern politics foreign policy and IR.

Humanitarian Military Intervention Taylor B. Seybolt, 2007. Military intervention in a conflict without a reasonable prospect of success is unjustifiable especially when it is done in the name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional just war principles the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks: Have past humanitarian military interventions been successful? It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s: northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor shows that the majority were successful by this measure. In every conflict studied however some military interventions succeeded while others failed raising the question: Why have some past interventions been more successful than others? This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy

within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types Humanitarian military intervention is controversial Scepticism is always in order about the need to use military force because the consequences can be so dire Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic humanrights This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances

Encyclopedia of United States National Security Richard J. Samuels,2006 Covers the origin development and results of all major national security policies over the last seven decades A thoroughly interdisciplinary work the encyclopedia views national security from a historical economic political and technological perspective *America in the World* Frank Costigliola,Michael J. Failing to Win Dominic D. P. Johnson,Dominic Tierney,2006-10-30 How do people decide which country came out ahead in a war or a crisis Why for instance was the Mayaguez Incident in May 1975 where 41 U S soldiers were killed and dozens more wounded in a botched hostage rescue mission perceived as a triumph and the 1992 94 U S humanitarian intervention in Somalia which saved thousands of lives viewed as a disaster In *Failing to Win* Dominic Johnson and Dominic Tierney dissect the psychological factors that predispose leaders media and the public to perceive outcomes as victories or defeats often creating wide gaps between perceptions and reality To make their case Johnson and Tierney employ two frameworks Scorekeeping which focuses on actual material gains and losses and Match fixing where evaluations become skewed by mindsets symbolic events and media and elite spin In case studies ranging from the 1962 Cuban Missile Crisis and the current War on Terror the authors show that much of what we accept about international politics and world history is not what it seems and why in a time when citizens offer or withdraw support based on an imagined view of the outcome rather than the result on the ground perceptions of success or failure can shape the results of wars the fate of leaders and the lessons we draw from history

Professional Journal of the United States Army ,2012 *Diplomatic Interventions* K. Fierke,2005-04-22 *Diplomatic Interventions* argues that war is a social construction In so doing it unsettles the definition of intervention as a coercive interference by one state in the affairs of another to examine the range of communicative or diplomatic practices which through their presence modify the experience of war The tension between claims that war is pervasive and that war is a social construct is analysed in relation to a range of moral legal military economic cultural and therapeutic interventions The concluding chapter highlights how the book itself is a critical intervention that requires us look
