stance early in the Civil War on ironclads and coolness toward John Ericsson have been consistently misunderstood Lenthall accepted the Navy's need for armored warships but objected to a fleet of only brown water capable monitors When he retired in 1871 he had been bureau chief for over seventeen years and responsible for the building of nearly all the Navy's ships during an era of unprecedented technological evolution John Lenthall *The Life of a Naval Constructor* is thoroughly documented with previously untapped primary archival source material from Philadelphia's Independence Seaport Museum and the Franklin Institute and the U S Naval Academy Museum John Lenthall is written by a historian and naval architect who can clearly explain the nuances of ship design The author's treatment of Lenthall and the legacy of his fellow

constructors brings to life a previously untold chronicle of American ingenuity and achievement **A History of the World in Sixteen Shipwrecks** Stewart Gordon, 2015-05-05 Roman triremes of the Mediterranean The treasure fleet of the Spanish Main Great ocean liners of the Atlantic Stories of disasters at sea fire the imagination as little else can whether the subject is a historical wreck the Titanic or the Bismark or the recent capsizing of a Mediterranean cruise ship Shipwrecks also make for a new and very different understanding of world history A History of the World in Sixteen Shipwrecks explores the ages long immensely hazardous persistently romantic and still ongoing process of moving people and goods across far flung maritime worlds Telling the stories of ships and the people who made and sailed them from the earliest ancient Nile craft to the Exxon Valdez A History of the World in Sixteen Shipwrecks argues that the gradual integration of localized and separate maritime regions into fewer larger and more interdependent regions offers a unique window on world history Stewart Gordon draws a number of provocative conclusions from his study among them that the European Age of Exploration as a singular event is simply a myth many cultures east and west explored far flung maritime worlds over the millennia and that technologies of shipbuilding and navigation have been among the main drivers of science and technology throughout history Finally A History of the World in Sixteen Shipwrecks shows in a series of compelling narratives that the development of institutions and technologies that made terrifying oceans familiar and turned unknown seas into sea lanes profoundly matters in our modern world **Artillery of the Napoleonic Wars: Artillery in Siege, Fortress and Navy, 1792-1815** Kevin F.

Kiley, 2020-01-24 Filled with statistical information on the guns ammunition and carriages used by the armies places the reader on the ground with the gunners The Napoleon Series Napoleon was an artilleryman before he was an emperor He understood the power and effectiveness of cannon and their ability to pulverize defenses reduce fortresses and destroy attacks In return the guns won Napoleon battles This impressive study chronicles the story of the guns and men during the twenty three years of almost continuous warfare from 1792 1815 from the battlefields of continental Europe to the almost primitive terrain of North America and of the seas lakes and rivers that connected them Detailed technical information is accompanied by vivid descriptions which allow the reader to imagine what it must have been liked to maneuver and man the guns in a variety of situations whether on the march or on the battlefield Based on years of research into regulations of the

period eyewitness accounts of artillerymen and material culled from official reports the scope and depth of material will satisfy the serious researcher while the lively narrative will appeal to the casual reader Kiley's research is impeccable and deserves the highest praise Moreover he writes in so entertaining a manner that he informs and educates without effort For the enthusiastic student of the attack and defense of fortified places this is an essential book of reference Fortress Study Group

Iron Coffin David A. Mindell, 2012-03-01 The USS Monitor famously battled the CSS Virginia the armored and refitted USS Merrimack at Hampton Roads in March 1862 This updated edition of David A Mindell's classic account of the ironclad warships and the human dimension of modern warfare commemorates the 150th anniversary of this historic encounter Mindell explores how mariners fighting blindly below the waterline lived in and coped with the metal monster they called the iron coffin He investigates how the ironclad technology new to war in the nineteenth century changed not only the tools but also the experience of combat and anticipated today's world of mechanized pushbutton warfare The writings of William Frederick Keeler the ship's paymaster inform much of this book as do the experiences of everyman sailor George Geer who held Keeler in some contempt Mindell uses their compelling stories and those of other shipmates to recreate the thrills and dangers of living and fighting aboard this superweapon Recently pieces of the Monitor wreck have been raised from their watery grave and with them information about the ship continues to be discovered A new epilogue describes the recovery of the Monitor turret and its display at the USS Monitor Museum in Newport News Virginia This sensitive and enthralling history of the USS Monitor ensures that this fateful ship and the men who served on it will be remembered for generations to come
