Garry, 2012-09-28 When Meriwether Lewis began shopping for supplies and firearms to take on the Corps of Discovery s journey west his first stop was a federal arsenal For the following twenty nine months from the time the Lewis and Clark expedition left Camp Dubois with a cannon salute in 1804 until it announced its return from the West Coast to St Louis with a volley in 1806 weapons were a crucial component of the participants tool kit In Weapons of the Lewis and Clark Expedition historian Jim Garry describes the arms and ammunition the expedition carried and the use and care those weapons received The Corps of Discovery s purposes were to explore the Missouri and Columbia river basins to make scientific observations and to contact the tribes along the way for both science and diplomacy Throughout the trek the travelers used their guns to procure food they could consume around 350 pounds of meat a day and to protect themselves from dangerous animals Firearms were also invaluable in encounters with Indian groups as guns were one of the most sought after trade items in the West As Garry notes the explorers willingness to demonstrate their weapons firepower

probably kept meetings with some tribes from becoming violent The mix of arms carried by the expedition extended beyond rifles and muskets to include pistols knives espontoons a cannon and blunderbusses Each chapter focuses on one of the major types of weapons and weaves accounts from the expedition journals with the author s knowledge gained from field testing the muskets and rifles he describes Appendices tally the weapons carried and explain how the expedition s flintlocks worked Weapons of the Lewis and Clark Expedition integrates original research with a lively narrative This encyclopedic reference will be invaluable to historians and weaponry aficionados The Knight and the Blast Furnace Alan

Williams,2021-11-01 The suit of armour distinguishes the European Middle Ages Renaissance from all other periods and cultures Unlike flexible defences popular everywhere else in the world the rigid articulated exoskeleton of a suit of armour was a more extravagant and less adaptable means of personal protection It required greater metallurgical resources to make but offered far better protection against available weapons This book tells the story from its invention in 14th century Lombardy which depended on the production of the necessary steel until its eventual decline in the 17th century principally because of the development of another military technology the gun The metallurgy of 600 armours has been analysed and their probable effectiveness in battle is assessed by means of mechanical tests **Arms and Armour Annual** Robert

Held,1973 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976 **The Art of the English Trade Gun in North America** Nathan E. Bender,2018-07-06 Symbolic ornamentation inspired by ancient Greek and Roman art is a long standing Western tradition The author explores the designs of 18th century English gunsmiths who engraved classical ornamental patterns on firearms gifted or traded to American Indians A system of allegory is found that symbolized the Americas of the New World in general and that enshrined the American Indian peoples as noble savages The same allegorical context was drawn upon for symbols of national liberty in the early American republic Inadvertently many of the symbolic designs used on the trade guns strongly resonated with several Native American spiritual traditions A

Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries,2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle

East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense AB Bookman's Weekly ,1997 The Archaeology of Martin's Hundred Ivor Noël Hume,Audrey Noël Hume,2001 The Archaeology of Martin s Hundred explores the history and artifacts of a 20 000 acre tract of land in Tidewater Virginia one of the most extensive English enterprises in the New World Settled in 1618 all signs of its early occupation soon disappeared leaving no trace above ground More than three centuries later archaeological explorations uncovered tantalizing evidence of the people who had lived worked and died there in the seventeenth century Part I Interpretive Studies addresses four critical questions each with complex and sometimes unsatisfactory answers Who was Martin What was a hundred When did it begin and end Where was it located We then see how scientific detective work resulted in a reconstruction of what daily life must have been like in the strange and dangerous new land of colonial Virginia The authors use first person accounts documents of all sorts and the treasure trove of artifacts carefully unearthed from the soil of Martin s Hundred Part II Artifact Catalog illustrates and describes the principal artifacts in 110 figures The objects divided by category and by site range from ceramics which were the most readily and reliably datable to glass of which there was little to metalwork in all its varied aspects from arms and armor to nail splitters wedges and finally to tobacco pipes The Archaeology of Martin s Hundred is a fascinating account of the ways archaeological fieldwork laboratory examination and analysis based on lifelong study of documentary and artifact research came together to increase our knowledge of early colonial history Copublished with the Colonial Williamsburg Foundation Ophthalmology in Military and Civilian Casualty Care Christopher J.
