Sharara,2013-07-17 Over the past 10 years studies have shown that the rates of fertility vary in different ethnic groups Ethnic differences also play a significant role in the outcome of assisted reproductive technology ART cycles In the United States minority groups African Americans Hispanics mainly Mexicans and Central Americans East Asians Chinese Japanese Koreans Philipinos and South Asians Indians Pakistanis and Bengalis have significantly lower chances of live births compared to Caucasian women Birth outcome data collected by the Society for Assisted Reproductive Technology shows a worsening trend in conception rates between the years 1999 2000 and 2004 2006 raising more concern that the disparity in fertility rates between minority groups and white women is widening over time This comprehensive book serves to answer the questions that arise when managing infertility in a multi ethnic population An expert assembly of key leaders in the field of reproductive medicine imparts insight and clinical experience in order to identify and analyze the possible causes of racial disparities in fertility outcome Some of the reviewed causes include higher Body Mass Index BMI tubal diseases metabolic syndrome and fibroids in African Americans tubal disease and higher early pregnancy loss in Hispanics higher incidence of diminished ovarian reserve and lower BMI in East Asians and higher incidence of polycystic ovarian disease PCOS in South Asians The book also provides a review of data on access to care and ART services in developing countries A thoughtful combination of evidence based medicine and advanced treatment options this book is sure to distinguish itself as the definitive reference on ethnic differences in assisted reproduction *Ethnicity in Medieval Europe, 950-1250* Claire Weeda,2021 An investigation into how racial stereotypes were created and used in the European Middle Ages Students in twelfth century Paris held slanging matches branding the English drunkards the Germans madmen and the French as arrogant On crusade army recruits from different ethnic backgrounds taunted each other s military skills Men producing ethnography in monasteries and at court drafted derogatory descriptions of peoples dwelling in territories under colonisation questioning their work ethic social organisation religious devotion and humanness Monks listed and ruminated on the alleged traits of Jews Saracens Greeks Saxons and Britons and their acceptance or rejection of Christianity In this radical new approach to representations of nationhood in medieval western Europe the author argues that ethnic stereotypes were

constructed and wielded rhetorically to justify property claims flaunt military strength and assert moral and cultural ascendance over others The gendered images of ethnicity in circulation reflect a negotiation over self representations of discipline rationality and strength juxtaposed with the alleged chaos and weakness of racialised others Interpreting nationhood through a religious lens monks and schoolmen explained it as scientifically informed by environmental medicine an ancient theory that held that location and climate influenced the physical and mental traits of peoples Drawing on lists of ethnic character traits school textbooks medical treatises proverbs poetry and chronicles this book shows that ethnic stereotypes served as rhetorical tools of power crafting relationships within communities and towards others [A-E Library of Congress. A Journey of Ethnicity Rie Nakamura,2020-05-05 The Cham people are thought to be descendants of the kingdoms of Champa located in central Vietnam between the 2nd and 19th centuries Champa was one of the oldest Hinduinized kingdoms in Southeast Asia and

became prosperous through maritime trades and its high quality eaglewood from the central highlands made it famous. However, Champa disappeared from the political map of Southeast Asia after its defeats against the Vietnamese southward expansion. The Cham are now one of the 54 state-recognized national ethnic groups, but Champa's ancient brick structures and temples scattered along central Vietnam attest to its previous glory. Champa adapted a number of foreign religions such as Hinduism, Buddhism, and Islam in the course of its history, which made its culture and tradition rich and unique. This book is about a journey of understanding what it means to be Cham in the Socialist Republic of Vietnam. It is based on field studies in various Cham villages in three different localities: namely, the south-central coast area, Ho Chi Minh City, and the Mekong Delta region. It is grounded in information gathered through prolonged interactions with Cham individuals over recent decades. The book stresses the complexity of Cham communities and the diversity and dynamics of the Cham's understanding of who they are. It provides a comprehensive picture of Cham communities and the situation of ethnic minority people of Vietnam in general.
