On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops Zahir Tari, Angelo Corsaro, 2004-10-14
A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection. A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience. These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself. In fact, their attendance was largely sponsored by the other participants. If evaluated as successful, it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum. All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications created by the Internet and the so-called Semantic Web. For DOA 2004, the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004; it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004, the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations. These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them.

On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops R. Meersman, 2004-10-14
This book constitutes the joint refereed proceedings of seven international workshops held as part of OTM 2004 in Agia Napa, Cyprus, in October 2004. The 73 revised papers presented together with 31 abstracts of posters from the OTM main conferences were carefully reviewed and selected from more than 150 submissions. In accordance with the 7 workshops, the papers are organized in topical sections on grid computing and its applications to data analysis, Java technologies for real time and embedded systems, modeling inter-organizational systems, regulatory ontologies, semantics, and e-learning. PhD symposium and interoperability.

Euro-Par 2009 - Parallel Processing
Dick Epema, 2009-08-17
This book constitutes the refereed proceedings of the 15th International Conference on Parallel Computing, Euro-Par 2009, held in Delft, The Netherlands, in August 2009. The 85 revised papers presented were carefully reviewed and selected from 256 submissions. The papers are organized in topical sections on support tools and environments, performance prediction and evaluation, scheduling and load balancing, high performance architectures and compilers, parallel and distributed databases, grid, cluster and cloud computing, peer-to-peer computing, distributed systems and algorithms, parallel and distributed programming, parallel numerical algorithms, multicore and manycore programming, theory and algorithms for parallel computation, high performance networks, and mobile and ubiquitous computing.

SDL 2011: Integrating System and Software Modeling Iulian Ober, Ileana Ober, 2011-12-03
This book constitutes the thoroughly refereed post-conference proceedings of the 15th International SDL Forum, SDL 2011, held in Toulouse, France, in July 2011.

The 16 revised full papers presented together were carefully reviewed and selected for inclusion in the book. The papers cover a wide range of topics such as SDL and related languages testing and services and components to a wide range presentations of domain specific languages and applications going from use maps to train station models or user interfaces for scientific dataset editors for high performance computing.

Structural Analysis of Historical Constructions - 2 Volume Set Claudio Modena, P.B. Lourenço, P. Roca, 2004-11-15 Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November 2004 in Padova Italy. Following publications of previous seminars that were organized in Barcelona Spain 1995 and 1998 and Guimarães Portugal 2001 state of the art information is presented in these two volumes on the preservation protection and restoration of historical constructions both comprising monumental structures and complete city centers. These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures. In this respect the papers originating from over 30 countries are subdivided in the following areas: Historical aspects and general methodology; Materials and laboratory testing; Non destructive testing and inspection techniques; Dynamic behavior and structural monitoring; Analytical and numerical approaches; Consolidation and strengthening techniques; Historical timber and metal structures; Seismic analysis and vulnerability assessment; Seismic strengthening and innovative systems; Case studies. Structural Analysis of Historical Constructions is a valuable source of information for scientists and practitioners working on structure related issues of historical constructions.

Cold Aqueous Planetary Geochemistry with FREZCHEM Giles M. Marion, Jeffrey S. Kargel, 2007-12-20 Written by two of the best US researchers in the field this text investigates issues of astrobiological relevance in the context of cold aqueous planetary geochemistry. At the core of the technical chapters is the FREZCHEM model initially developed over many years by one of the authors to quantify aqueous electrolyte properties and chemical thermodynamics at subzero temperatures. FREZCHEM is of huge relevance to scientists in a number of fields including biogeochemists.

Microbial Source Tracking: Methods, Applications, and Case Studies Charles Hagedorn, Anicet R. Blanch, Valerie J. Harwood, 2011-06-08 Understanding the origin of fecal pollution is essential in assessing potential health risks as well as for determining the actions necessary to remediate the quality of waters contaminated by fecal matter. As a result microbial source tracking (MST) has emerged as a field that has evolved and diversified rapidly since the first approaches were described only a decade ago. In response to the emergence of MST there have been three large multi laboratory method comparison studies: two in the US and one in Europe plus numerous workshops, book chapters and review articles dedicated to synthesizing information on the topic. Furthermore a federal USEPA guide document describing the uses and limitations of MST methods was published in 2005 and a book dedicated to MST as an emerging issue in food safety was published in 2007. These documents provide a collective body of literature on MST that is both conflicting and complementary, often repetitious and difficult to condense and interpret. In

addition it does not reflect the current diversity of MST approaches with different organisms newer methodologies such as quantitative PCR and anthropogenic chemicals nor does it embrace the scope of MST research being conducted around the world The three editors of the book all with extensive MST expertise have developed chapters and invited authors who reflect the rich diversity and truly international scope of MST The unifying theme throughout the book is the design of more standardized approaches to MST that include performance criteria regardless of method or organism plus recommendations for field study design and MST implementation The editors intend that this book will serve as a valuable reference for all those who are involved with *Assessment of Grassland Ecosystem Conditions in the Southwestern United States: without special title* ,2004 **Assessment of grassland ecosystem conditions in the southwestern United States** ,2004

Lead in Glassy Materials in Cultural Heritage Anne Bouquillon,Patrice Lehuédé,2024-02-21 Although the development of lead crystal was a major step in the history of glass in the late 17th century the presence of lead in vitreous matrices glass and glazes is much older dating back to the second millennium BCE Lead in Glassy Materials in Cultural Heritage traces the history of these skills and also looks at the most recent developments in materials science concerning the role played by lead in the properties of glass including coloring It develops an understanding of weathering processes and notions of the durability of leaded glass It also examines public health issues and current recommended standards for the use of lead in industrial glass This multidisciplinary book is intended for a wide audience art and technical historians museum curators restorers materials specialists manufacturers and engineers **Treatise on Geomorphology** ,2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth s surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth s diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research

directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned

Transformational Collaborative Outcomes Management John S. Lyons,2022-08-22 Transformational Collaborative Outcomes Management TCOM is a comprehensive multi level conceptual framework for system management and improvement This book provides a comprehensive understanding of TCOM by using person centered collaborative processes for decision making The issue with current human services systems is that there is a lack of access to care and that the system is focused on providing services as cheaply as possible TCOM focuses on helping the greatest number of people while maximizing effectiveness By fully understanding the nature of the business of helping the author seeks to offer ways to create and sustain effective and positively evolving helping systems He lays out a series of goal directed social change processes which allow people at every level of a system to begin a shift towards transformational practice and the emergence of

transformational systems Building on three decades of work in a large community of scholars and practitioners this book will represent the first full description of the conceptual framework and will appeal to an interdisciplinary group of scholars across nonprofit management healthcare management and social work The Challenge to Academic Freedom in Hungary Andrew Ryder,2022-02-21 The Challenge to Academic Freedom in Hungary A Case Study in Culture War Authoritarianism and Resistance presents a case study as to how an authoritarian regime like the one in Hungary seeks to tame academic freedom Andrew Ryder probes the reasons for ideological conflict within the academy through concepts like culture war and authoritarian populism He explores how the Orb n administration has introduced a series of reforms leading to limitations being placed on the Hungarian Academy of Sciences Gender Studies no longer being recognized by the State the relocation of the Central European University because of government pressure and new reforms that ostensibly appear to give universities autonomy but critics assert are in fact changes that will lead to cronyism and pro government interference in academic freedom *General Technical Report RMRS* ,1998 *Journal of Technology Education* ,2012 *Biodiversity across Afromontane Environments* David Horák,Vincent Ralph Clark,Kevin Y.
