Arms Control The Frg And The Future Of East West Relations:

Arms Control, the FRG, and the Future of East-West Relations Wolfram F. Hanrieder, 2019-04-05 The political dimension of arms control has always had special significance for the Federal Republic of Germany not only because of the issue of a divided Germany and a partitioned Europe but also because of the country's key position in the Western security alliance In the wake of NATO's recent decision to deploy more nuclear weapons on German soil and in the absence of progress on arms control it has become clear that arms control measures and negotiations have assumed an importance far beyond their military technical components fundamental questions about the nature of East West relations and the future shape of the transatlantic alliance and the European political order also have been raised These essays explore the implications of arms control negotiations for the Federal Republic of Germany and consider why Germany has traditionally found it impossible to divorce considerations of arms control from their larger political context The Future: Warfare, military forces and technology, 1989 **The Department of State Bulletin**, 1989 The official monthly record of United States foreign policy The German Problem Transformed Thomas Banchoff, 1999-05-24 A systematic examination of Germany's post reunification foreign policy from a broader historical and analytical perspective **Conventional Arms Control and East-West Security** Institute for East-West Security Studies, 1989 This important and timely work prepared by the leading researchers planners and policymakers from both Eastern and Western alliances analyzes the major issues in the Vienna talks on conventional forces in Europe involving NATO and Warsaw Pact nations It is likely to have a significant influence on the course of these negotiations and on emerging debate on conventional arms control The contributors met in Moscow prior to the Vienna conference to review and compare their analyses and revised them thereafter for publication in this work *Rethinking National Security* Frances Scott, 1990 **Bases Abroad** Robert E. Harkavy, 1989 Analyzing the modern status of military bases and the diplomacy that defines their location and access this book explores the global basing networks of the world's major military powers their type location and the politics and economics of their acquisition It provides data on armaments intelligence communications research and space facilities tables and maps that display U S and Soviet global networks and the various military roles and nuclear deterrence capabilities for global power projection and support of client states in the Third World Harkavy also discusses emerging political and technological developments that could alter basing diplomacy **Future Soviet Interests in Arms Control** Institute for Defense Analyses. Flanagan, 1992-05 **European Peace Movements and the Future of the Western Alliance** Walter Laqueur, 2017-09-08 This extraordinary compendium concerns the future of the Western alliance and the development of the peace movements in Europe and in the United States The peace movement is an old phenomenon given new life by NATO decisions concerning nuclear deployment in Europe and the Soviet responses along the same lines After a long postwar marriage Europeans and Americans alike are reexamining the premises of the Western alliance The contributors provide a variety of scenarios extending from the maintenance of the status quo to the complete dismantling of the Western alliance or at least of its NATO component In a context of rapid change and new challenges to the democratic bloc the editors and authors argue for higher levels of economic integration and caution that competition might spill over into political collapse The work deals with thorny security issues in a frank and policy oriented way While each contributor expresses a unique standpoint a surprising consensus emerges The need for democratic nations to move toward a higher policy ground in order to preserve the fundamental alliance that led to the postwar consensus to begin with Some contributors feel this is still possible others that the time has passed and that national rather than regional interests will once more prevail The work contains an extraordinary array of talent from both the American and European perspectives Among the major contributors and their themes are Henry Kissinger on A Plan to Reshape NATO William G Hyland on The European Peace Movement and NATO Irving Kristol on What s Wrong with NATO Theodore Draper on The Western Misalliance Niels Haagerup on The Nordic Peace Movements Martin Ceadel on The British Nuclear Disarmers and Jeffrey Herf on The SPD and the Peace Movement in West Germany This is a well integrated text with no random essays **Proceedings of the Pugwash Conference on Science and World Affairs.** ,1987 *North Atlantic Treaty Organization* Phil Williams, 2024-11-01 This volume consists of major books written in the English language on NATO as well as an extensive listing of journal articles that deal with various aspects of the Alliance All the major debates that have taken place over the last forty years are discussed Securing Europe's Future Stephen J.
