CyberArts 2005, 2005 *Playful Disruption of Digital Media* Daniel Cermak-Sassenrath, 2018-04-07 This book starts with the proposition that digital media invite play and indeed need to be played by their everyday users Play is probably one of the most visible and powerful ways to appropriate the digital world The diverse emerging practices of digital media appear to be essentially playful Users are involved and active produce form and content spread exchange and consume it take risks are conscious of their own goals and the possibilities of achieving them are skilled and know how to acquire more skills They share a perspective of can do a curiosity of what happens next Play can be observed in social economic political artistic educational and criminal contexts and endeavours It is employed as a counter strategy for tacit or open resistance as a method and productive practice and something people do for fun The book aims to define a particular contemporary attitude a playful approach to media It identifies some common ground and key principles in this novel terrain Instead of looking at play and how it branches into different disciplines like business and education the phenomenon of play in digital media is approached unconstrained by disciplinary boundaries The contributions in this book provide a glimpse of a playful technological revolution that is a joyful celebration of possibilities that new media afford This book is not a practical guide on how to hack a system or to pirate music but provides critical insights into the unintended artistic fun subversive and sometimes dodgy applications of digital media Contributions from Chris Crawford Mathias Fuchs Rilla Khaled Sybille Lammes Eva and Franco

Sensory Perception Friedrich G. Barth, Patrizia Giampieri-Deutsch, Hans-Dieter Klein, 2012-02-01 Sensory perception mind and matter aims at a deeper understanding of the many facets of sensory perception and their relations to brain function and cognition It is an attempt to promote the interdisciplinary discourse between the neurosciences and psychology which speaks the language of cognitive experiences and philosophy which has been thinking about the meaning and origin of consciousness since its beginning Leading experts contribute to such a discourse by informing the reader about exciting modern developments both technical and conceptual and by pointing to the big gaps still to be bridged The various chapters provide access to scientific research on sensory perception and the mind from a broad perspective covering a large spectrum of topics which range from the molecular mechanisms at work in sensory cells to the study of the unconscious and to neurophilosophy *Culture as Capital* Slavko Kacunko, 2015-03-02 By following and reproducing the cultural turn the rhetoric of cultural mix and hybridism is disseminated today primarily in its crossing of trade barriers Cultures reduced to their exchange value function as capital an accumulative speculative and ultimately financial affair In some of its media and site un specific manifestations process art which aims to encompass both old and new media art seems to resist this pressure despite nonetheless not being protected from regulations and incorporations In the present collection of his recent essays Slavko Kacunko discusses the process art by crossing the disciplines of art history and comparative media visual and cultural studies As a first approximation several historiographical remarks on closed circuit video installations underline their importance as a core category of process art In the second part the problems of process art seen as a threshold of art history

are further examined in another retroanalytical step in which concepts and objects related to mirror frame and immediacy are analyzed as the triple delimitation of visual culture studies In the third part previously outlined manifestations of what is termed the post visual condition are summarized and projected to the coreless core of the emerging art and research related to the coreless beings par excellence the bacteria
