Harrison, 2010-03-31 American Culture in the 1990s focuses on the dramatic cultural transformations of the last decade of the millennium. Lodged between the fall of Communism and the outbreak of the War on Terror, the 1990s was witness to America's expanding influence across the world but also a period of anxiety and social conflict. National traumas such as the Los Angeles riots, the Oklahoma City bombing, and the impeachment of President Clinton lend an apocalyptic air to the decade, but the book looks beyond this to a wider context to identify new voices emerging in the nation. This is one of the first attempts to bring together developments taking place across a range of different fields from Microsoft to the Internet, from blank fiction to gangsta rap, from abject art to new independent cinema, and from postfeminism to posthumanism. Students of American culture and general readers will find this a lively and illuminating introduction to a complex and immensely varied decade.

Key Features 3 case studies per chapter featuring key texts, genres, writers, and artists. Chronology of 1990s American Culture. Bibliographies for each chapter. 18 black and white illustrations.

Anglo-American Exchange in Postwar Sculpture, 1945-1975 Rebecca Peabody, 2011-12-31 Anglo American Exchange in Postwar Sculpture 1945-1975 redresses an important art historical oversight. Histories of American and British sculpture are usually told separately, with artists and their work divided by nationality, yet such boundaries obscure a vibrant exchange of ideas, individuals, and aesthetic influences. In reality, the postwar art world saw dynamic interactions between British and American sculptors, critics, curators, teachers, and institutions. Using works of art as points of departure, this book explores the international movement of people, objects, and ideas, demonstrating the importance of Anglo American exchange to the history of postwar sculpture.

Installation Art and the Practices of Archivalism David Houston Jones, 2016-03-31 On the leading edge of trauma and archival studies, this timely book engages with the recent growth in visual projects that respond to the archive, focusing in particular on installation art. It traces a line of argument from practitioners who explicitly depict the archive (Samuel Beckett, Christian Boltanski, Art Language, Walid Raad) to those whose materials and practices are archival (Mirosław Bałka, Jean-Luc Godard, Silvia Kolbowski, Boltanski, Atom Egoyan). Jones considers in particular the widespread nostalgia for archival media such as analogue photographs and film. He analyses the innovative strategies by which such artefacts are incorporated, examining five distinct types of archival practice: the intermedial, testimonial, personal, relational, and monumentalist.

The Grove Encyclopedia of American Art Joan M. Marter, 2011 Arranged in alphabetical order, these 5 volumes encompass the history of the cultural development of America with over 2300 entries.

Appropriation David Evans, 2009 Many influential artists today draw on a legacy of stealing images and forms from other makers. The term appropriation is particularly associated with the Pictures Generation, centred in New York in the 1980s. This anthology provides a far wider context. Historically, it reappraises a diverse lineage of precedents from the Dadaist ready-made to Situationist détournement, while contemporary art after appropriation is considered from multiple perspectives within a global context. Found Sculpture and Photography from Surrealism to Contemporary Art Julia Kelly, 2017-07-05 Taking its departure point from the 1933 surrealist photographs of involuntary sculptures by Brassa and Dal Found Sculpture and Photography from Surrealism to Contemporary Art offers fresh perspectives on the sculptural object by relating it to both surrealist concerns with chance and the crucial role of photography in framing the everyday This collection of essays questions the nature of sculptural practice looking to forms of production and reproduction that blur the boundaries between things that are made and things that are found One of the book's central themes is the interplay of presence and absence in sculpture as it is highlighted disrupted or multiplied through photography's indexical nature The essays examine the surrealist three dimensional object its relation to and transformation through photographs as well as the enduring legacies of such concerns for the artwork's materiality and temporality in performance and conceptual practices from the 1960s through the present Found Sculpture and Photography sheds new light on the shifts in status of the art object challenging the specificity of visual practices pursuing a radical interrogation of agency in modern and contemporary practices and exploring the boundaries between art and everyday life

Sculpture and the Vitrine John C. Welchman, 2017-07-05 Vitrines and glass cabinets are familiar apparatuses that have in large part defined modern modes of display and visibility both within and beyond the museum They separate objects from their contexts group them with other objects both similar and dissimilar and often serve to reinforce their intrinsic or aesthetic values The vitrine has much in common with the picture frame the plinth and the gallery but it has not yet received the kind of detailed art historical and theoretical discussion that has been brought to these other modes of formal display The twelve contributions to this volume examine some of the points of origin of the vitrine and the various relations it brokers with sculpture first in the Wunderkammer and cabinet of curiosities and then in dialog with the development of glazed architecture beginning with Paxton's Crystal Palace 1851 The collection offers close discussions of the role of the vitrine and shop window in the rise of commodity culture and their apposition with Constructivist design in the work of Frederick Kiesler as well as original readings of the use of vitrines in Surrealism and Fluxus and in work by Joseph Beuys Paul Thek Claes Oldenburg and his collaborators Jeff Koons Mike Kelley Dan Graham Vito Acconci Damien Hirst and Josephine Meckseper among others *Sculpture and the Vitrine* also raises key questions about the nature and implications of vitrinous space including its fronts onto desire and the spectacle transparency and legibility and onto ideas and practices associated with the archive collecting preserving and ordering

Reuse Value Richard Brilliant, Dale Kinney, 2016-04-08 This book offers a range of views on spolia and appropriation in art and architecture from fourth century Rome to the late twentieth century Using case studies from different historical moments and cultures contributors test the limits of spolia as a critical category and seek to define its specific character in relation to other forms of artistic appropriation Several authors explore the ethical issues raised by spoliation and their implications for the evaluation and interpretation of new work made with spolia The contemporary fascination with spolia is part of a larger cultural preoccupation with reuse recycling appropriation and re presentation in the Western world All of these practices speak to a desire to make use of pre existing artifacts objects images expressions for contemporary purposes Several essays in this volume focus on the distinction between spolia and

other forms of reused objects While some authors prefer to elide such distinctions others insist that spolia entail some form of taking often violent and a diminution of the source from which they are removed The book opens with an essay by the scholar most responsible for the popularity of spolia studies in the later twentieth century Arnold Esch whose seminal article *Spolien* was published in 1969 Subsequent essays treat late Roman antiquity the Eastern Mediterranean and the Western Middle Ages medieval and modern attitudes to spolia in Southern Asia the Italian Renaissance the European Enlightenment modern America and contemporary architecture and visual culture
