The How and Why of Ufos Kenneth W. Behrendt, 2011-04-29 The How and Why of UFOs is the much anticipated sequel to Kenneth W Behrendt s previous groundbreaking work on the subject Secrets of UFO Technology The present work begins with a detailed review of the revolutionary anti mass field theory explanation for UFO propulsion and its secondary effects which is critical to understanding how these craft can easily overcome the usual limitations imposed by gravity and inertia upon our present massive earthly air and spacecraft This cutting edge theory is then applied to several classic UFO cases to provide previously unsuspected insights into them Even the often overlooked topic of small automated alien probes is explored as a highly detailed probe case personally investigated by the author is presented and analyzed in order to reveal the amazing interior

structures of the object sighted After providing an analysis of the planets of origin of advanced spacefaring extraterrestrial beings the possible reasons for their visitations to our Earth are considered The author then goes on to describe the most likely biological mechanism behind the mental telepathy process that is the principle mode of communication for most extraterrestrial beings and even suggests a variety of simple methods that might actually allow human researchers to communicate with the alien pilots of the UFOs now operating in Earth's atmosphere All of this is only a small sample of the many intriguing topics awaiting the reader in this abundantly illustrated volume The many revelations found in *The How and Why of UFOs* are sure to delight and intrigue any student of ufology who wishes to explore this fascinating subject at its very deepest level

PhotoGraphic Encounters William F. Garrett-Petts, Donald Lawrence, Kamloops Art Gallery, 2000-10 Literacy is broadly understood to refer to the ability to read and write But the term is heavily value laden and is often used to elevate print at the expense of other forms of communication In *PhotoGraphic Encounters* the authors challenge this reductive notion of literacy and propose instead an integrated span of literacies reaching across disciplinary boundaries to discover a text that draws upon both the visual and the verbal *PhotoGraphic Encounters* discusses Canadian writers like Margaret Atwood George Bowering Robert Kroetsch and Daphne Marlatt and Canadian artists like Fred Douglas Ernie Kroeger Brenda Pelkey and Michael Snow then looks at the cross fertilization of visual and verbal processes in their works The authors present a new narrative practice one that fully engages lived experience The vernacular they argue is vital to our participation as readers and viewers of high art Making the connection between the vernacular and high culture creates an enabling moment in artistic production and reception and in teaching learning and talking about art and literature *PhotoGraphic Encounters* offers a compelling perspective on questions of literacy in a postmodern culture Artists writers scholars and critics alike will want this volume in their libraries Includes more than 120 B W photographs 20 colour plates index bibliography
