around the time I started writing these poems I was catching my first real and protracted study of philosophy in particular Nietzsche's *The Birth of Tragedy* And technically as well as the ideas astounded me really and it really felt great to be able to read and then write hoping to run parallel with philosophy and whatnot This then these precarious poems where walking the plank is for real is my attempt to climb out of my self the ole mind cage of lonesome fears the shadowland and enter in into the now of the implacable hub of no perspective but that of now If there is a message to these poems its probably just in the inherent fact that one exists lives delves under and to the very heart where mind and soul dance that eternity dance of one any how way and who

**God Is Still Talking** James E. Hamer, 2009-09 Is God still talking This book makes the question a statement God is still talking The real question is Are you listening God is still talking to you Did God have anything more to say after the completion of Scripture or has he retreated into silence In *God Is Still Talking* Dr James E Hamer explores these and other questions pertaining to a daily relationship with Christ He takes the reader on a journey to the greater dimension of living in the Spirit where there is daily access to the presence of God It is an invisible reality there to be explored and experienced rather than argued and analyzed if believers want to hear God talking Dr Hamer sees a capacity for more in our personal relationships with Christa sacred places where God is still speaking How is it possible to have a personal relationship with someone who is invisible *God Is Still Talking* will help you recognize the various ways that God is communicating his direction insights and truth to your life What is God saying to you

Minai, Yaneer Bar-Yam, 2007-06-24 Recent advances in science and technology have led to a rapid increase in the complexity of most engineered systems In many notable cases this change has been a qualitative one rather than merely one of magnitude A new class of Complex Engineered Systems CES has emerged as a result of technologies such as the Internet GPS wireless networking micro robotics MEMS fiber optics and nanotechnology These complex engineered systems are composed of many heterogeneous subsystems and are characterized by observable complex behaviors that emerge as a result of nonlinear spatio temporal interactions among the subsystems at several levels of organization and abstraction Examples of such

systems include the World Wide Web air and ground traffic networks distributed manufacturing environments and globally distributed supply networks as well as new paradigms such as self organizing sensor networks self configuring robots swarms of autonomous aircraft smart materials and structures and self organizing computers Understanding designing building and controlling such complex systems is going to be a central challenge for engineers in the coming decades 100
