Crazy Therapies What Are They Do They Work:

Therapy Thieves Francis A. Martin, 2020 Why are we practicing counselors and psychotherapists committed to failure This is the question that has haunted Dr Francis Martin as he has cataloged well over 20 000 distinct psychotherapy approaches advertised on the websites of licensed mental health professionals No doubt some of these are harmful most of them ineffective and many simply made up but the sheer volume of such techniques and practices advertised by licensed professionals holding advanced degrees whose services are billed to clients and insurance companies calls the credibility of the entire mental health profession into question Based on significant original research that joins research from others this book describes a near universal crisis in mental health care and recommends ways to rescue the field from itself The crisis is caused by declining competence among counselors and psychotherapists who have failed to regulate themselves and who therefore deliver inadequate if not harmful services The book calls for major specific and urgently needed reforms *What Happened? Re-presenting Traumas, Uncovering Recoveries* Elspeth McInnes, Danielle Schaub, 2018-11-26 Traumatic experiences with an overwhelming life threatening feel affect numerous people s lives Death and disablement through accident illness war family violence natural and human induced disaster can be experienced variously at an individual level through to whole communities and nations Traumatic memories are intrusive and insistent but fragmented and distorted by the power of sensory information frozen in time This volume examines the ways individuals families communities and nations have engaged with representations of traumas and the ethical dimensions embedded in those re presentations Contributors also explore the work of recovering from trauma and finding resilience through working with narrative and embodied forms such as dance and breathing The ubiquity of trauma in human experience means that pathways to recovery differ emerging from the way each engages with the world Sharing and reflecting on the ways each copes with trauma contributes to its understanding as well as pathways to recovery and new strengths Contributors are Svetlana Antropova Peter Bray Kate Burton Mark Callaghan Marie France Forcier Monica Hinton Gen ichiro Itakura Danielle Schaub Zeina Tarraf and Paul Vivian *The Cult Next Door* Judith L. Carlone, Elizabeth R. Burchard, LSW, 2017-03-18 During Thanksgiving vacation of her freshman year at Swarthmore College 1977 Elizabeth at her mother s insistence attended a stress reduction session with a biofeedback technician on staff at a Manhattan psychologist s office During that first visit this man filled her ears with prophetic visions of a glorious future the inheritance of those fortunate few who might choose to accompany him His confidence and charisma entranced her and she soon recruited two of her college roommates When the psychologist fired his assistant two years later Elizabeth and her mother followed Over the next decade this man a malevolent genius and master of manipulating metaphysical concepts to benefit a self serving agenda organized a small dedicated band of followers The Group evolved into an incestuous family a cult Their brainwashed minds became fused with a distinctive New Age doctrine A coterie of spiritual Navy Seals they scrambled in terror training to survive the inevitable cataclysm one man s divine vision of

Armageddon Subsequent to a momentous event in August 1994 with the guru as high priest The Black Dog Religion was born Elizabeth sank into a pit of despair darker than she ever could have imagined was possible From the adolescent gullibility which seduced her astray to the enlightenment which led her to freedom you will travel an incredible journey For anyone who has ever been trapped by a person who would not let them go within this book lies a message of hope

The Dark Side of Transformational Leadership Dennis Tourish,2013-03-12 Most research into leadership has presented leaders as heroic charismatic and transformational visionaries The leader whether in business politics or any other field is the most important factor in determining whether organizations succeed or fail Indeed despite the fundamental mistakes which have arguably directly led to global economic recession it is often still taken for granted that transformational leadership is a good thing and that leaders should have much more power than followers to decide what needs to be done The Dark Side of Transformational Leadership confronts this orthodoxy by illustrating how such approaches can encourage narcissism megalomania and poor decision making on the part of leaders at great expense to those organizations they are there to serve Written in a lively and engaging style the book uses a number of case studies to illustrate the perils of transformational leadership from the Jonestown tragedy in 1978 when over 900 people were either murdered or committed suicide at the urging of their leader to an analysis of how banking executives tried to explain away their role in the 2008 financial crisis This provocative and hugely important book offers a rare critical perspective in the field of leadership studies Concluding with a new approach that offers an alternative to the dominant transformational model The Dark Side of Transformational Leadership will be an invaluable text for academics interested in leadership students on leadership courses requiring a more critical perspective and anyone concerned with how people lead people and the lessons we can learn

The Great Psychotherapy Debate Bruce E. Wampold,Zac E. The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and

women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves Cursillo Brian V. Janssen,2010-01-01 Since its inception in Roman Catholic Spain in the 1940s the Cursillo movement has been a steadily growing phenomenon and has spread into many Protestant churches worldwide under various names The weekend initiation is often a deeply felt experience that boasts of many conversions and recommitments Yet in this comprehensive analysis of Cursillo the author finds theological concerns questions about the propriety of the methods and complications such as disaffection from the local church transfer of loyalty to the Cursillo community and a significant drop out rate raising implications for similar spiritual movements Interviews with former Cursillo participants confirmed many of these conclusions but also raised a challenge to the church many Cursillo participants do not perceive vital faith in their local church The author suggests that the Cursillo attempts to imitate the work of the church in an extraordinary form and that this might initiate some of the unhelpful results The church would be better served by seeking to revitalize its ordinary ministries of Word and sacrament prayer community and Sabbath observance **Psychology Gone Wrong** Tomasz Witkowski,2015-01-29 Psychology Gone Wrong The Dark Sides of Science and Therapy explores the dark sides of psychology the science that penetrates almost every area of our lives It must be read by everyone who has an interest in psychology by all those who are studying or intend to study psychology and by present and potential clients of psychotherapists This book will tell you which parts of psychology are supported by scientific evidence and which parts are simply castles built on sand This is the first book which comprehensively covers all mistakes frauds and abuses of academic psychology psychotherapy and psycho business **Cultic Studies Journal** ,1997
