*Creating a Life Together* Diana Leafe Christian, 2003-06-01 Everything you need to know to create an intentional community from scratch An intentional community is a group of people who have chosen to live or work together in pursuit of a common ideal or vision An ecovillage is a village scale intentional community that intends to create ecological social economic and spiritual sustainability over several generations The 90s saw a revitalized surge of interest in intentional communities and ecovillages in North America the number of intentional communities listed in the Communities Directory increased 60 percent between 1990 and 1995 But only 10 percent of the actual number of forming community groups actually succeeded Ninety percent failed often in conflict and heartbreak After visiting and interviewing founders of dozens of successful and failed communities along with her own forming community experiences the author concluded that the successful 10 percent had all done the same five or six things right and the unsuccessful 90 percent had made the same handful of mistakes Recognizing that a wealth of wisdom were contained in these experiences she set out to distill and capture them in one place *Creating a Life Together* is the only resource available that provides step by step practical how to information on how to launch and sustain a successful ecovillage or intentional community Through anecdotes stories and cautionary tales about real communities and by profiling seven successful

communities in depth the book examines the successful 10 percent and why 90 percent fail the role of community founders getting a group off to a good start vision and vision documents decision making and governance agreements legal options finding financing and developing land structuring a community economy selecting new members and communication process and dealing well with conflict Sample vision documents community agreements and visioning exercises are included along with abundant resources for learning more     Encyclopedia of Community DAVID LEVINSON,KAREN

CHRISTENSEN,2003-06-30 Click Additional Materials for downloadable materials and samples Incredibly this is the first encyclopedia to focus on community as concept and experience so stands alone in its field as the one title any library must buy to cover this topic Essential for all readerships CHOICEA timely comprehensive and very welcome overview of a rich and rapidly growing field of inquiry Robert D Putnam Professor at Harvard University and author of Bowling Alone With every passing minute it becomes more and more apparent that our world is one community The Encyclopedia of Community serves as recognition of this trend and as a needed resource The four volume set not only explains the emerging buzz words of community such as social capital or civic engagement but also tells many stories of community institutions that work such as public libraries Sarah Ann Long Past President 1999 2000 American Library Association As we yearn to connect with our fellow citizens during these uncertain times we have a unique moment to encourage greater participation in our democracy and reinvigorate our communities The Encyclopedia of Community provides a timely diverse array of theories and practices that will help citizens understand the value of engaging together to make the critical choices that enrich the way we live learn work and govern in our local communities The Encyclopedia deserves a prime spot in the libraries homes and offices of all communities that want to invest in a brighter future for their residents and their children Nancy Kranich Past President of the American Library Association whose presidential theme was Libraries The Cornerstone of Democracy 2000 2001

American politicians often pair the word community with the word freedom to describe our basic values Yet though used constantly the word community is defined in widely different and contested ways Most people like the idea of community but some intellectuals worry that it might imply collectivism The great value of this new Encyclopedia is that it gives readers a chance to sample the many uses of the term and gain clarity about the issues at stake It is a major contribution to a more coherent understanding of this fundamental idea Robert Bellah Professor of Sociology Emeritus University of California Berkeley and co author of Habits of the Heart SAGE Publications is proud to announce the Encyclopedia of Community a major reference work that summarizes the many fascinating and important concepts of a global topic Community itself is a concept an experience and a central part of being human Whether the reader is a student researcher or professional in the field of psychology sociology or even economics this three volume work will provide the necessary definitions of community beyond traditional views Arranged in an A to Z fashion the Encyclopedia can also be viewed topically via a Reader s Guide This allows for interdisciplinary compare and contrast among topics such as types of communities social capital technology

urban life politics and law community design and global studies Edited by the award winning team at Berkshire Reference and assisted by an editorial board of world renowned scholars the Encyclopedia of Community will prove to be one of the most widely used reference works in your collection Key Features 500 signed articles 3 volumes 2000 pages Reader s Guide Master bibliography 250 sidebars Appendices Resource Guides Master Bibliography Libraries Build Community Libraries and Popular Culture *Eco-Homes* Doctor Jenny Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States *Eco Homes* examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us **The Routledge Companion to**

**Alternative Organization** Martin Parker,George Cheney,Valérie Fournier,Chris Land,2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields

*Damanhur* Stefania Palmisano,Nicola Pannofino,2022-11-26 The Damanhur Federation situated in Valchiussella North

West Italy is one of Europe's longest lasting spiritual esoteric communities. Nevertheless, there has hitherto been nearly no scientific study of this group, with the exception of a handful of specialised journal articles. This collection fills that gap by collating the various scholarly contributions which over the years have dealt with Damanhur, aiming to present the phenomenon to a public of specialists, students and people who are just curious, in a volume focusing on the multidisciplinary nature of the community as a whole. We consider the various spheres making up the social, cultural, spiritual and organisational life of Damanhur through analysis and interpretation of its historical evolution and more recent changes which have affected the community since its founder's death. The contributions combine field research with theoretical reflection, making use of both qualitative discursive interviews and participant observation and quantitative questionnaires methods.

*Rethinking Community through Transdisciplinary Research* Bettina Jansen, 2019-12-31. This book offers the first interdisciplinary survey of community research in the humanities and social sciences, to consider such diverse disciplines as philosophy, religious studies, anthropology, sociology, disabilities studies, linguistics, communication studies and film studies. Bringing together leading international experts, the collection of essays critically maps and explores the state of the art in community research while also developing future perspectives for a cross-disciplinary rethinking of community. Pursuing such a critical transdisciplinary approach to community, the book argues can counteract reductive appropriations of the term community and instead pave the way for a novel assessment of the concept's complexity. Since community is above all a lived practice that shapes people's everyday lives, the essays also suggest ways of redoing community; they discuss concrete examples of community practice, thereby bridging the gap between scholars and activists working in the field. Space, Power and the Commons Samuel Kirwan, Leila Dawney, Julian Brigstocke, 2015-10-23. Across the globe, political movements opposing privatisation, enclosures and other spatial controls are coalescing towards the idea of the commons. As a result, struggles over the commons and common life are now coming to the forefront of both political activism and scholarly enquiry. This book advances academic debates concerning the spatialities of the commons and draws out the diverse materialities, temporalities and experiences of practices of commoning. Part one, *Materialising the Commons*, focuses on the performance of new geographical imaginations in spatial and material practices of commoning. Part two, *Spaces of Commoning*, explores the importance of the turn from commons to commoning, bringing together chapters focusing on the doing of commons and how spaces, materials, bodies and abstract flows are intertwined in these complex and excessive processes. Part three, *An Expanded Commons*, explores the broader registers and spaces in which the concept of the commons is at stake and highlights how and where the commons can open new areas of action and research. Part four, *The Capture of the Commons*, questions the particular interdependence of the commons and enclosure assumed within commons literature framed by the concept of neoliberalism. Providing a comprehensive introduction to the diverse ways in which ideas of the commons are being conceptualised and enacted both throughout the social sciences and in practical action, this book foregrounds the commons.

as an arena for political thought and sets an agenda for future research
